American Railroad Journal.

Saturday March, 23, 1872.

Stock Exchange and Money Market.

Money has been in quite brisk request throughout the week, and call loans have been quoted very firm at from 7 per cent. currency to the large Government houses, to 7 per cent. gold, and in several instances, an additional commission of $\frac{1}{32}$, $\frac{1}{16}$, and even $\frac{1}{8}$ of one per cent., to the Stock brokers, whose wants have been decidedly the most urgent, in view of the unusually rapid development of speculative dealings at the Stock Exchange. The banks have been reserved in their advances, in view of their contracted resources. Private lenders have met the requirements of street borrowers with a fair degree of promptness at the extreme rates current in the open market. The discount movement has been on a limited scale, with choice to fair grades of business paper rated at from 8@12 per cent. per annum. The city banks reduced their loan and discount average nearly 1⅛ millions during the week while again contracting their outstanding circulation a trifle. The U. S. Sub-Treasury reduced its currency balance about 1⅜ millions. It also made a moderate reduction in its coin reserve. Its currency balance at the close of business on Tuesday was $6,486,232 and its coin reserve, $73,193,455.

The city banks, in their latest return, show a reduction of $1,373,100 of legal tender notes, and an increase of $418,200 of specie, with a decrease of $79,800 of deposits; also a decrease of $1,473,500 in their loan and discount averages, and of $23,500 in their item of circulation. The city bank exchanges, last week, averaged $110,192,453 and thus far, this week, about 118⅛ millions daily. The banks now hold $4,255,100 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,604,400, against $22,668,745 same time last year. The city bank deposits are now $206,049,900, against $230,945,643 week ending March 18, 1871. The legal tender reserve amounts to $43,187,800, against $55,623,645 same time last year. The circulation now stands at $28,098,500 against $31,605,215 same time last year. The loans are now $279,868,900 against $292,576,404 at this date last year.

The coin reserve of the city banks is now about 19⅝ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 43⅛ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $1,311,760 and its coin reserve $148,942 as the result of the week's business. The receipts of the office were $3,913,743 in coin, and $2,806,705 in currency; payments, $4,062,685 in coin, and $3,618,465 in currency. The office received $3,674,000 in coin or its equivalent, from customs; and disbursed $402,730 of coin interest.

The cash balance at the Treasury Department at the opening of business on Tuesday were: Coin, $117,000,000; currency, $9,500,000. Coin certificates were outstanding for $30,000,000.

Government revenues have been yielding fairly since our last. The excises yielded about two millions, and thus far since July 1, 1871, $92,284,793. The customs at the port of New York, last week were $3,594,066; at the outports, equal to about $1,200,000 more, all in coin, or coin certificates.

The specie shipments by rail, and steam from San Francisco, from Jan. 1, to March 7, were $2,845,446, against $3,270,783 same time last year.

Gold has been quite moderately dealt in and has been quoted weaker, particularly toward the close, influenced by the increased offerings of foreign exchanges, growing out of the extensive purchases of Erie shares for English and German account, which virtually place the Road in foreign ownership and control. The speculative call for Gold has been comparatively tame, and the customs and export drain moderate. The range of the price during the week has been from 109⅝ @110⅜ and the closing quotation on Wednesday was 109¾@109⅞ against 110@110⅛ the preceding Wednesday. The specie outflow, last week, was $730,640. The Gold Exchange Bank clearances have averages about 24 millions per day during the week.

The customs demand for Gold last week, averaged $612,334 a day; thus far, this week, it has averaged $460,000 a day, or equal to a weekly aggregate of $2,760,000. The arrivals of specie from Europe, Havana and other foreign ports

last week were $13,860, and since Jan. 1, 1872, $2,760,000 against $2,721,606 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $291,975, against $104,321,560 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to March 16, 1872, $61,858,664, against $66,003,646 same time in 1870-'71.

The export drain of specie was $730,640 last week, against $1,993,517, same week preceding year. The shipments since July 1, 1871, have been $26,294,054 against $53,475,702 same time in 1870-'71.

Foreign Exchange has been much more freely offered and quoted cheaper, closing weak, on a moderate movement. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, 109⅞@110⅛.

The produce exports from this port, week ending with March, 19th were to the currency value of $3,120,767.

Government securities have been in fair demand and prices have been generally well supported.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115¼@115½; U. S. Five-Twenties of 1862, (other than the bonds called in) 111¾@112; U. S. Five-Twenties of 1864 at 111¾@112; U. S. Five-Twenties of 1865, 112½ @112¾; U. S. Five-Twenties of 1865 consolidated, 110⅞@111⅛; U. S. Five-Twenties of 1867, 112⅜ @112½; U. S. Five-Twenties of 1868, 112⅜ 112⅝; U. S. Ten-forties at (ex March coupon) 108@108¼; U. S. Fives of 1881 (Funding Loan) 109¼@109½. Six per cent. currency bonds, 115 @115¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 6.	Mar. 13.	Mar. 20.
Consols.....	93	92⅝@92¾	92⅞
U.S. 5-20's of 1862..	92¼	92⅛	92⅜
U. S. 5-20s, 1865....	93⅝	93¼	93½
" 1867	92¾	92⅝	93½
" 10-40s	*88¾	89	89½
Erie.....	....	....	44⅛

* Ex March coupon.

State bonds have been in more general demand, as a rule, and quoted firmer in price. South Carolina Bonds have advanced sharply.

Railway bonds, have been in more confident demand and have been quoted strong and buoyant in price. Central Pacific Sixes have been in good request at 102@102⅛. Chesapeake and Ohio Sixes have been selling quite freely at 94 per cent. and accrued interest.

Notwithstanding the snow blockade on the Union Pacific Road, the Central Pacific Railroad made a handsome gain in its February earnings, as compared with the figures of February of last year. The increase in February was $59,997, making the gain in the first two months of the current year $157,978, over the corresponding period of last year. The earnings in February were $545,487, against $485,490 in February, 1871, and $394,176 in February 1870, and since January 1, $1,179,967 against $1,021,989 same time in 1871, and $807,280 same time in 1870. These figures clearly indicate the rapid growth of the traffic of the Central Pacific Road, particularly in its local or way business.

Railway and miscellaneous share property has been unusually active, and generally buoyant in price. The dealings in Erie shares have been remarkably extensive, largely on foreign (English and German) account, and the price has been more rapidly advanced, though closing irregularly. Boston, Hartford and Erie Shares have also been quite fairly purchased.

The transfer book of the Erie Railway Stock were to have been formally re-opened on Wednesday.

General business has been less active. Breadstuffs and Provisions favored buyers early in the week, but closed more firmly. Petroleum and Naval Stores were cheaper, Metals generally much heavier. Middling upland cotton closed on Wednesday at 22½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,356,372 bales, against 3,191,867 bales same time in the preceding year; exports 1,428,292 bales against 2,056,875 bales in the previous year; stock at the ports at latest dates, 482,061 bales against 692,692 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand at 10@14 cts.; Veals at 5@11 cts.; Sheep at 7¼@10½ cts. Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipt were 6,252 Beeves, 1,667 Veal Calves, 20,685 Sheep and Lambs; and 28,006 Swine.

Foreign merchandise has been less active, and rather weaker as to values. The week's imports of foreign goods reached the amount of $5,238,441 including $2,653,920 of dry goods.

Ocean freights have been moderately active, and quoted firm as to rates, in most instances.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Boston, Hartford and Erie, 6⅜; do. 1st mort., 41¼; do. guar. bonds, 49¾; Albany and Susq. 1st mort., 105⅛; do. 2d mort., 100; Central of New Jersey 1st mort. new, 104½; do. scrip, 106½; Galena and Chicago 1st mort., 104½; Ohio and Miss. 2d mort., 87; do. consol., 94¾; North Missouri 1st mort., 91½; New Jersey Southern R. Columbus, Springfield and Cincinnati R.R.

The Columbus, Springfield and Cincinnati Railroad is now completed, extending from the city of Columbus, O., to the city of Springfield, O., a distance of forty-five miles.

The amount of first and only mortgage bonds on the road is One Million Dollars, payable Sept. 1st, 1901. Coupons, at seven per centum per annum, payable Sept. 1st and March 1st, at the office of the Union Trust Company, New York.

The amount of Common Stock, is One Million Dollars. No Preferred Stock; the above being *all* the Bonds and Stock on the Road.

☞ The contract for the completion of the Paducah and Memphis Railroad was closed on Thursday. It is to be completed to Covington, Tenn., by the 1st of October.

BANKING HOUSE OF FISK & HATCH,
5 NASSAU STREET, NEW YORK, March 1, 1872.

We sell the CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100, registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin.

Descriptive pamphlets, with full information, furnished on application.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS at their current prices.

We receive deposits and allow interest at the rate of four per cent. on balances; make collections in all parts of the country; issue certificates of deposit, and do a general banking business.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

☞ At a recent meeting of the corporators of the Chesapeake and Cincinnati Railroad, held in Cincinnati, Chief Engineer Pryor stated that the surveys from Cincinnati to Huntington, the present terminus of the road, had been completed, and that the people living along the route manifested the warmest interest in the prospect of a railroad, and in many cases, unsolicited, offer the right of way free of cost, the general remark being, "Go anywhere you please, so you give us a railroad." From Huntington to Cincinnati the distance is 149 miles, and to build the road that distance will cost $1,985,546 70.

☞ The public will be glad to learn that railroad communication with Walton and Delhi, N. Y., has been opened, via Sidney, by the New York and Oswego Midland Railroad. Passengers by the 7:40 A. M. train from Albany, on the Albany and Susquehanna Railroad, connect with the passenger train for the above mentioned places. This will be good news to those going on business or for pleasure to either of these hitherto sequestered places, as the tedious stage ride to reach the same is a thing of the past.

☞ The Charleston (West Virginia) *Journal* states that the directors of the Parkersburg, Ripley and Charleston railroad have authorized the president to contract for the construction of the road out of Charleston as far as the two-mile valley, with its deposits of coal, iron and limestone. It is proposed that Parkersburg and Wood and Jackson counties shall subscribe toward the completion of the work to Parkersburg.

☞ The keel for the first of the iron steamships which the Harlan & Hollingsworth Company, of Wilmington, Del., will build for the Pacific Mail Steamship Company, was laid on the 2d instant at their yard. The dimensions of this vessel will be: Length over all 280 feet, width of beam 40 feet, depth of hold from base line to top of spar deck 30 feet 6 inches.

☞ The Maysville *Eagle* says that the contract for building the Kentucky and Great Eastern railroad had been signed, and that the work will commence at Maysville on April 1st.

☞ THE 8 PER CENT. FIRST MORTGAGE SINKING FUND
LAND GRANT BONDS OF THE
ST. JOSEPH AND DENVER CITY RAILROAD COMPANY,

in denominations of $1,000, $500 and $100, Coupon or Registered, can now be obtained to a limited amount only from the undersigned, or through the principal Banks and Bankers throughout the United States.

The safety and reliability of these Bonds is evidenced in the continued and increasing demand for them by prudent and careful investors, who have invested in them after a most thorough and rigid examination of the security pledged for their payment, both interest and principal.

THEY ARE SECURED by a *first* and *only mortgage* on the Company's *railroad* (*which will soon connect the Union Pacific Road at Fort Kearney with the City of St. Joseph, Mo., already an important railroad centre*)—upon the *Franchises* of the same—upon the *Equipment* and *personal property* of every description—upon the *Land Grant* of the Company granted by Special Act of Congress, approved July 23d, 1866, *amounting to* 1,700,000 *acres, which has been officially Certified to the Company by the Commissioner of the General Land Office in his official report to Congress, transmitted through the Secretary of the Interior on January 10th*, 1872.

The Bonds are issued only as they represent a completed and equipped Road; all proceeds of Bonds beyond this are held by the Trustees in trust until the necessary completion entitle the Company to these proceeds.

The Road is built first-class in every particular, and has been so received and accepted by the Department of the Interior.

The Mortgage Deed of Trust prohibits the sale of any of the Company's Lands at less than four ($4) dollars per acre, payable to the Trustees and applied to the payment of the Bonds, through the operation of the Sinking Fund. The payment of the Bonds before maturity is not compulsory upon the holders.

The Bonds are therefore secured by two classes of property *combined in one mortgage*, the value of either largely exceeding the amount of bonds which can be issued under the mortgage.

Trustees—Farmers' Loan and Trust Company of New York.

The Bonds have thirty years to run, with both principal and interest payable in Gold. The principal payable in New York, the interest at eight (8 p.c.) per cent., payable in February and August either in New York, London or Frankfort on-the-Main, free of tax.

Price 97½ and accrued interest in Currency. The Bonds are receivable at par and accrued interest in payment for the Company's Land Sales. Maps, circulars, documents and full information furnished on application.

The Bonds of this Company have always been received with favor by investors and capitalists, have always commanded a ready market, and we unhesitatingly recommend them—believing this loan will rank equally with that of the Eastern Division issues, which are now selling at a premium above par.

Journal of Railroad Law.

RAILROAD COMPANIES—WHETHER NEGLIGENCE IS A QUESTION OF LAW OR FACT—EVIDENCE AS TO SPEED OF ENGINE, RINGING OF BELL, REMARKS OF BY-STANDERS.

The facts in the recent case of the Detroit and Milwaukee Railroad Company *vs.* Jacob Van Steinburg (17 Mich. 99) are fully and clearly stated in the following opinion by

COOLEY, CH. J.—The action in the court below was brought by Van Steinburgh to recover of the railroad company for injury done him by one of their engines at Holly station, on September 15, 1865. The plaintiff, it appears, was a hotel-keeper at that place. The track passed between his house and the depot; and only about thirty feet therefrom. He heard the whistle of an approaching train when it called the station; started to cross over the track to the depot; was caught by the engine as it came up, and had one foot taken off, and the toe of another. The defendants insisted that the injury was attributable to his own carelessness: while he, on his part, claimed that the defendants were negligent and he was not. The counsel for the defendants requested the court to charge the jury.

First. That the conduct of the plaintiff, by leaving the hotel, with the knowledge that a train was coming, and walking upon the track in front of the train, which could be seen for fifty or sixty rods, is negligence, and he cannot recover.

Second. If the jury believe that the plaintiff heard the whistle announcing the approach of the train, and knew that any train was arriving, and that it could be seen for fifty or sixty rods during his walk from the hotel, and he went upon the track, this is such negligence as will prohibit his recovery.

Third. That if the defendant's employees were negligent in omitting to ring the bell, and also in approaching the station too rapidly, if the plaintiff heard the whistle announcing the approach of the train, and from negligence and inattention walked upon the track, he cannot recover.

Fourth. That if the plaintiff heard the whistle, and knew the time when this train was due, it is absence of ordinary care for the plaintiff to walk upon the track in front of the engine, and cannot recover.

Before noticing these requests, the Circuit Judge instructed the jury, that the first proposition for them to consider, was, whether the defendant, in running its engine and train, upon the occasion in question, immediately preceding and at the time of the accident complained of, was exercising or dinary care and diligence, and if the jury should find that the defendant was not guilty of a want of ordinary care and diligence, the plaintiff could not recover under any circumstances whatever; but, that if the jury should find the defendant did not use ordinary care and diligence, under all the circumstances, then the next question for them to consider was the conduct of the plaintiff in the occurrences that immediately preceded the injury complained of, and at the time it happened, and that if they should find the plaintiff under all the circumstances, did not use reasonable and ordinary care and diligence, and such conduct contributed to the injury, he could not recover, however negligent the defendant might have been; hat to entitle the plaintiff to recover, the jury must find that the plaintiff was not, and the defendant was guilty of a want of ordinary care and diligence. After instructing the jury as to what constituted ordinary care and diligence, the judge further charged them, that, inasmuch as the question of negligence was based upon facts disclosed by the proofs, about which there was dispute, and concerning which there was conflicting evidence, it was the peculiar and exclusive province of the jury to determine those facts, and upon their finding of facts, to determine the question of negligence. And, coming to the particular requests above set forth, the judge told the jury that he could not instruct them as requested; that he thought the questions of fact involved in the case were proper for the consideration of the jury, and that the court could not assume what the facts were, nor that they were or were not correctly stated in those propositions, or that they were all the facts proven upon which the question of negligence depended; that these were all matters for the consideration of the jury, under the rules of law laid down for them by court.

But the judge did then state to the jury, in reference to the said four requests, that if the plaintiff walked upon the track, with notice of the approach of a train upon that track, whether by signals or by seeing the train approaching, it is such negligence on his part as will prevent his recovery. And, also, that if the jury shall find that the defendant's employees were negligent in omitting to ring the bell, and also in approaching the station too rapidly, yet if the plaintiff knew that the train was approaching, and to come upon that track, or had good reason to suppose that it was, and from negligence or inattention walked upon the track and was injured, it was negligence on his part and he could not recover; for the object in requiring signals to be given of an approaching train, is to bring home to the wayfarer notice of its approach, and if he have that notice or knowledge, and from negligence or inattention, walk upon the track, and is injured, he cannot, under the law, recover. From this statement of the instructions to the jury, it must be evident, I think, that if the question of the plaintiff's negligence was one to be left to the jury at all, it was very fairly submitted to them by the judge; or, at least, that there was nothing in his charge of which the defendants could justly complain. Without entering upon the debatable ground of the degree of negligence on the part of the plaintive which should exonerate the defendants from liability; or on the part of the defendants which might justly subject them to responsibility, notwithstanding the plaintiff's want of prudence, he gave them to understand that a want of reasonable and ordinary care and diligence on the part of the plaintiff should entirely excuse the defendants from liability for any degree of negligence, however great, of which they may have been guilty. The disputed point in the present case is, whether they had not been shown by the evidence such a case of negligence on the part of the plaintiff as left nothing to be passed upon by the jury, but required the court to instruct them, as matter of law, that the plaintiff could not recover. In determining this question, we must look at the case as it appears from the plaintiff's own testimony, unqualified by any which was offered on the part of the defendants, and must concede to him anything which he could fairly claim upon that evidence. He had a right to ask the jury to believe the case as he presented it; and, however improbable some portions of his testimony may appear to us, we cannot say that the jury might not have given it full credence. It is for them, and not for the court to compare and weigh the evidence. For the purposes of any positive instructions which one party may demand upon the evidence, he must concede all that his opponent may claim from it. He must, therefore, concede in the present case that the train came in without sounding any other signal than the whistle which called the station; that it approached the station with a velocity which was unusual, and which would have carried it considerably beyond the usual place of stopping; that consequently it must have reached the place of the injury sooner than, and, perhaps, within half the time the plaintiff had any reason to expect, and that, in fact, others besides himself were surprised by its sudden arrival, and came near being run over and injured by it. All these facts might have been, and doubtless were urged upon the jury, as made out by the evidence, and the defendants must, therefore, claim that, admitting all these facts, the plaintiff is still shown to be guilty of such a want of ordinary care, as the law pronounces a bar to any recovery by him. As a general rule, it cannot be doubted that the question of negligence is a question of fact and not of law. Lynch & Nurdin, 1 Q. B. 29, Cotton & Wood, 8 C. B. N. S. 568. Negligence, as I understand it, consists in a want of that reasonable care which would be exercised by a person of ordinary prudence under all the existing circumstances, in view of the probable danger of injury. The injury is, therefore, one which must take into consideration all these circumstances, and it must measure the prudence of the party's conduct by a standard of behavior likely to have been adopted by other persons of common prudence. Moreover, if the danger depends at all upon the action of any other person under a given set of circumstances, the prudence of the party injured must be estimated in view of what he had a right to expect from such other person, and he is not to be considered blamable if the injury has resulted from the action of another which he could not reasonably have anticipated. Thus the problem is complicated by the necessity of taking into account the two sets of circumstances affecting the conduct of different persons, and is only to be satisfactorily solved by the jury placing themselves in the position of the injured person, and examining those circumstances as they then presented themselves to him, and from that stand point judging whether he was guilty of negligence or not. It is evident that such a problem cannot usually be one upon which the law can pronounce a definite sentence, and that it must be left to the sifting and determination of a jury. There are nevertheless, cases in which it has been held proper for the court to take the question altogether away from the jury, and decide it as one of law. It is generally held, and is, I think, the correct doctrine that it is incumbent on the plaintiff to show that the injury of which he complains was caused by the negligence of the defendant, and that it did not arise from his own negligence or want of skill. He takes it upon himself to prove both; and he

does not recover if he was negligent; because it cannot be said that the defendants' negligence has caused an injury which would not have happened but for his own want of due care. Lane & Crombie, 2 Pick. 176; Carsley & White, 21 Id. 254: Lucas & Taunton and New Bedford R. R. 6 Gray 70. The case, however, must be a very clear one which would justify the court in taking upon itself this responsibility. For when the judge decides that a want of due care is not shown, he necessarily fixes in his own mind the standard of ordinary prudence, and, measuring the plaintiff's conduct by that, turns him out of court upon his opinion of what a reasonably prudent man ought to have done under the circumstances, He thus makes his own opinion of what would be generally regarded as prudence a definite rule of law. It is quite possible that if the same question of prudence were submitted to a jury collected from the different occupations of society, and perhaps better competent to judge of the common opinion, he might find them differing with him as to the ordinary standard of proper care. The next judge trying a similar case may also be of a different opinion, and because the case is not clear, hold that to be a question of fact which the first has ruled to be one of law. Indeed, I think the cases are not so numerous as has sometimes been supposed, in which a judge could feel at liberty to take the question of the plaintiff's negligence away from the jury. The judge, it is said in one case, is not bound to submit to a jury the propriety of a particular course, when it is perfectly notorious that all prudent men conduct their own affairs differently. The uniformity of the conduct of business men becomes a rule of law. But while there is any uncertainty, it remains a matter of fact for the consideration of the jury. Briggs & Taylor, 28 Vt. 183. The difficulty in these cases of negligent injuries are repeated under the same circumstances; and, therefore, no common standard of conduct by prudent men becomes fixed or known. In North Pennsylvania R. R. and Heileman, 49 Penn. 63, it is said: "That what constitutes negligence in a particular case is generally a question for jury and not for the court is undoubtedly true, because negligence is want of ordinary care. To determine whether there has been any, involves, therefore, two inquiries:

First. What would have been ordinary care under the circumstances; and

Second. Whether the conduct of the person charged with negligence came up to that standard. In most cases the standard is variable, and it must be found by a jury. But when the standard is fixed, when the measure of the duty is defined by the law, entire omission to perform it is negligence. In such a case the jury have but one of these inquiries to make. They have only to find whether he, upon whom the duty rests, has performed it. If he has not, the law fixes the character of his failure and pronounces it negligence."

In Meesel and Lynn and Boston R. R. 8 Allen, 234, the court declined to instruct the jury that riding upon the outside platform of a horse railroad car was such a want of ordinary care as would prevent a recovery for an injury sustained by being thrown therefrom. "There is no such general knowledge," says the judge delivering the opinion, "as enables the court to say that the plaintiff did not use due care. On the contrary, it is well known that the highest speed of a horse railroad car is very moderate, and the driver easily controls it, and stops the car by means of his voice, his reins and his brake. In turning around an angle, from one street to another, passengers are not required to expect that he will drive at a rapid rate; but, on the contrary, might reasonably expect a careful driver to slacken his speed." In other words, the passengers had a right to govern their action by what they might reasonably expect would be that of the driver; and this presented a proper question to be submitted to the jury. See also Isbell and N. Y. and N. H. R. R. 29 Conn. 393. This question was very fully and carefully considered by the Supreme Court of Connecticut in Beers and Housatonic R. R. 19 Conn. 566, and a rule was laid down, which has since been followed in that state, and is very succinctly stated in Park & O'brien, 22 Conn. 347, as follows: "The question as to the existence of negligence, or a want of ordinary care, is one of a complex character. The inquiry not only as to its existence, but whether it contributed with negligence on the part of another to produce a particular effect, is much more complicated. As to both, they present, from their very nature, a question, not of law but of fact, depending on the peculiar circumstances of each case, which circumstances are only evidential of the principal fact—that of negligence or its effects—and are to be compared and weighed by the jury, the tribunal whose province it is to find facts, not by any artificial rules, but by the ordinary principles of reasoning; and such principal fact must be found by them, before the court can take cognizance of it, and pronounce upon its legal effect." It is a mistake, therefore, to say, as is sometimes said that when the facts are undisputed the question of negligence is necessarily one of law. This is generally true only of that class of cases where a party has failed in the performance of a clear legal duty. When the question arises upon a state of facts on which reasonable men may fairly arrive at different conclusions, the fact of negligence can not be determined until one or the other of those conclusions has been drawn by the jury. The inference to be drawn from the evidence must either be certain and incontrovertible, or they cannot be decided upon by the court. Negligence cannot be exclusively established by a state of facts upon which fair minded men may well differ. In Ireland and Oswego R. R. Co. 13 N. Y. 533, Judge Johnson, speaking upon this subject, says: "The fact of negligence is very seldom established, by such direct and positive evidence that it can be taken from the consideration of the jury and pronounced upon as matter of law. On the contrary, it is almost always to be deduced as an inference of fact, from several facts and circumstances disclosed by the testimony, after their connection and relation to the matter in issue have been traced, and their force and weight considered. In such cases the inference cannot be made without the intervention of a jury, although all the witnesses agree in their statements which is consistent throughout. Presumptions of fact, from their very nature, are not strictly objects of legal science, like presumptions of law. That the care exercised by the plaintiff at the time of the injury, and the negligence of the defendant, were both questions for the jury to determine, cannot admit of any doubt." See also Oldfield and N. Y. and Harlem R. R. 14 N. Y. 310; Ernst and Hudson River R. R 35 Id., 38, 40, 47. Applying the principle of these cases to the one now before the court, I think the refusal of the judge to give the instructions prayed for was correct, and that the charge as given was just towards the defendants. It certainly cannot be said that the plaintiff, on any view of the evidence, observed the highest degree of prudence in his conduct. He stepped upon a track on which he knew a train was approaching, without turning to see how near it was, and the injury has resulted in consequence. Thus stated the fact would appear to be gross negligence, if not utter recklessness. But there are other circumstances to be taken into the account before definite judgment can be pronounced upon the character of the act. The plaintiff heard the whistle half a mile off. He knew he had the time which would be required for the train to pass over that distance in which to cross over to the depot a distance of less than a hundred feet. He also knew that all trains coming on this track stopped at the depot, and, that they checked their speed and approached it slowly. He also had some reason to expect the ringing of the bell. But whether a bell was rung or not, it may well be claimed that he had abundant reason to believe there was ample time to cross the track, before the train, in the ordinary course, could possibly arrive, even though he walked along leisurely, as he must have done. He looked for the train, indeed, as he came out of his hotel, but he had less that the usual occasion for looking, when he knew about how far off the train was, and that, relying upon the ordinary mode of management, as he had a right to, he could not be in danger from it in passing over. And if we are to believe his evidence, he was entirely correct in his calculations, and it was only because the train came up at a speed twice as great as he had any right to anticipate, that he found himself in danger. He may claim, therefore, that he was not guilty of a want of ordinary care and prudence, because the ordinary condition of things, which was what he was to look for, would not have made his position dangerous. The plaintiff's case is, that the extraordinary and unprecedented speed of the train was what put him in peril; and, if the case, as made by him should stand unshaken by other evidence, there would be in this position so much of plausibility, that I do not see how a judge could set aside a verdict in accordance, as without evidence to support it. If this be so, neither could he take the case away from the jury by directing them to find a verdict for the defendants. The errors in the record, which have been pointed out, make it necessary to revise the judgment and order a new trial. The plaintiff in error will recover costs in this court, and the costs in the court below will abide the result.

Judgment accordingly.

☞ The Galveston *News* announces that the Texas Central Railroad will be completed to Dallas in about three months. A third rail is to be laid between Galveston and Austin, so that trains of both gauges can be run.

Huntingdon and Broad Top Mt. R. R.

The Huntingdon and Broad Top Mountain Railroad Company have just issued their annual report for 1871, from which we gather the following interesting facts: Receipts from all sources, principally from coal, merchandise, ore, and passengers, $301,322, being $127,733 in excess of expenses and an increase in net earnings over those of 1870 of $6,751, notwithstanding there was a strike among the coal mines in the heart of the season that lasted nearly sixty days. The expenses of 1871 were 57.60 per cent. of the gross receipts, which is a small fraction less than in 1870. All the items enumerated in the traffic of the Company show an increase, and in pig metal and other ores the tonnage is nearly double that of 1870. This is a gratifying fact as showing all the material on the line of the road necessary to the cheap manufacture of iron, and is a happy augury of the establishment there of forges and furnaces on which much reliance is placed for the resuscitation of the business of the Company's works, and the complete and early restoration of the Company's credit. The net balance of receipts over expenses on the year's business (after deducting drawbacks, taxes and office and incidental expenses) is $89,449, that sum being applicable to interest on the bonded debt, which amounts to $2,035,500. It is a matter of complaint in the report that the Pennsylvania Railroad Company does not furnish anything like an adequate supply of coal cars, and until it does, it says, "the business of all its coal tributaries will be repressed and limited to a small annual increase." The Huntingdon and Broad Top connects with the Pennsylvania at Huntingdon, and extends southward 45 miles to Mount Dallas, where it connects with the Bedford and Bridgeport road, now under lease, extending to the Maryland State line, 31 miles, and thence by the Cumberland and Pennsylvania Railroad from the State line to Cumberland, 7 miles—whole length of road from Huntingdon to Cumberland, 83 miles. At Bridgeport connection is also made with the Pittsburg and Connellsville Railroad, affording outlet to both Pittsburg and Baltimore, and opens a new route to coal from the Cumberland coal mines.

The Valley Route to the Pacific.

THE SNOW PROBLEM.

The four principal routes that have been surveyed to the Pacific have the following mean elevation above the sea level: 1. The extreme southern or Texas Pacific route, skirting the border of Mexico, has an average altitude of 2,300 feet. 2. The 35th parallel route, 3,600 feet. 3. The middle route, extending 1,771 miles, from Omaha to Sacramento, 5,000 feet. 4. The northern route, from Lake Superior and St. Paul to Puget Sound 1,900 feet.

The middle route (now occupied by the Union and Central Pacific Road) scales four principal summits, having the following elevations: 6,169 feet, 7,042 feet, 7,463 feet, and 8,235 feet. The Northern route has on its main line but two summits, the highest of which has an altitude not much exceeding 5,000 feet. Nine hundred continuous miles on the middle route have a greater average elevation than the highest summit on the northern, and 450 continuous miles on the former line are 1,000 feet above the highest point on the latter.

The remarkably low altitude of the northern line fully entitles it to the designation it has received of the Valley Route to the Pacific. From Lake Superior, for a distance of eight hundred miles, on this line, the country is a vast plain, partly timbered, but mainly prairie, gradually rising from one thousand one hundred feet elevation above the sea near Lake Superior to two thousand seven hundred feet near the Rocky Mountains. This plain has a varied surface, and in its depressions flow the navigable waters of the Mississippi, the Red, the Upper Missouri, and the Yellowstone, and their many tributaries.

Crossing at right angles the valleys of the Mississippi and the Red River of the North, the northern route traverses the rolling prairies of Dakota to the broad and fertile valleys of the Missouri and Yellowstone. The latter it follows nearly the entire length of Montana to the foot of the mountains. Ascending the eastern slope by an almost imperceptible grade, and surmounting the divide by a pass so remarkable that it almost constitutes a gateway through the mountains, the Northern line enters the valley of a branch of the Columbia, and follows that noble river to tide-water on the Pacific. The leading advantages resulting to the Northern Pacific Railroad from the low altitude of the valley route along which it is building are: 1. A mild climate and a sheltered position. 2. Exemption from deep and drifting snows, and, hence, with ordinary precautions, entire freedom from winter obstructions. 3. A productive and verdure-covered country flanking the road, resulting in rapid settlement, a large tributary population and a profitable local traffic. 4. An abundance of good water. 5. A saving of many millions in cost of construction, with a proportionate reduction of interest burden. 6. A succession of natural and easy grades, which will greatly reduce the cost of operating the road, and enable the same motive power to accomplish far greater results, both in speed and traffic, than are possible on an elevated or mountain route.

The experience of the past winter, the severest since our territories were settled, and not likely to be repeated for many years, has thoroughly justified the claim that the Northern Pacific Road, when completed, will not be at any time obstructed by snow. Authentic reports—official, unofficial and incidental, from surveyors, engineers, United States military and signal officers, and settlers, representing all important sections of the route—agree that during the past hard winter there has not been a time when, with the precautions usually taken on roads in northern states, northern Pacific trains could not have made regular trips.

Chief-Engineer Roberts, of the Northern Pacific Road, who has no superior in his profession in this country, and has carefully studied the western snow-problem during the past three years, in a recent report, based on a very full data, sums up his conclusions in this sentence:

"With ordinary means of protection at exposed points, the Northern Pacific Railroad, when completed by the Yellowstone route, can unquestionably be kept open for regular traffic its entire length across the continent, even during winters as severe as the present, should they occur."

He further says, alluding to a mass of testimony from Montana:

"These very favorable reports, during a winter of unprecedented severity, cover the most elevated and mountainous portion of our line, where obstructions from snow would occur if anywhere on the route; and, when it is remembered that the obstructions on the Union Pacific have been virtually confined to a section of 180 miles, every part of which is at least 1,000 feet higher than the highest summit on the Northern route, and most of which is 2,500 to 3,000 feet higher than the mountain section of equal length on the Northern Pacific line, it becomes perfectly safe to predict for the latter as complete exemption from winter blockade as is enjoyed by railroads in New York and New England.

Intelligent judges believe that the Union Pacific Company, taught by experience, will be able hereafter to prevent any serious blockade on their line. Whether this shall prove true or not, it can be considered settled that the Northern Pacific Road, following as it will the channel-way of the great rivers of the continent, traversing the mild-winter belt and running at an elevation 2,500 to 3,500 feet lower than its neighbor, will, from the day of its completion, furnish a reliable means of transit between the Atlantic and the Pacific. It is particularly and vastly important that this fact be known and emphasised now that we have among us an important embassy from Japan, whose report on the efficiency of our trans-continental throughfares will do much to hasten or retard the increase of our direct trade with the Orient.

The past year's business on the Union and Central line, with its promise of rapid increase, establishes beyond doubt the success of the first trans-continental road; but it renders equally certain the profitableness of the Northern Pacific, which has radical advantages, with an ample field and future of its own. The two lines are so far apart as not to interfere with each other. As is the case with the present Pacific Road, the bulk of the earnings of each will doubtless come from local traffic; while the Asiatic and through carrying trade of both will be increased to an enormous volume by their joint efforts to turn the current of the world's commerce across the American Continent, and by their joint demonstration that the trans-continental route is equal to all commercial needs.—*Independent.*

TALLOW LUBRICATOR.

MACHINERY OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.

The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.

The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.

The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS. N. H. CAMP.

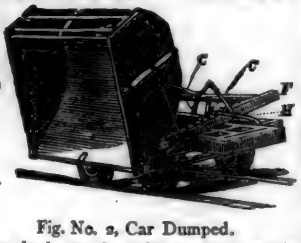

Fig. No. 1, Car Loaded & at Rest. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 181

New York Saturday, March 30, 1872.

York (Penn.) Car Works.

Messrs. Billmeyer & Small have just completed a contract with the Northern and Utah Railroad, running between Ogden city, Utah, and the Sulphur Springs, in Wyoming Territory. John Young, son of Brigham Young, of Mormon fame, is its president. The road is a narrow guage—three feet—and is but one of the many roads of like pattern now in contemplation, or in process of construction in the Southern and Western sections of our country. The cars for the Northern and Utah road are now being loaded at the above named gentlemen's works in York, to the West, via the Union Pacific Railroad. A lot of narrow gauge cars were shipped by the firm a few days since for Walla Walla, Washington Territory, a portion of which go by the way of the Union Pacific Railroad, and the balance by the ocean route around Cape Horn to their destination. Messrs. Billmeyer & Small are in the front rank of the narrow gauge movement, and are already reaping the reward which they so richly merit at the hands of all the friends of this new railroad idea.—*York Daily.*

☞ The Cameron (Pa.,) *Press* says that the rails are being furnished for Bennett's Branch Railroad. The track will be laid from the Driftwood terminus this Spring.

A Safe and Profitable INVESTMENT

BANKING HOUSE OF

JAY COOKE & CO.

The Treasury is now paying off the called 5-20s of 1862. Holders of these who desire to exchange them for a Bond of EQUAL SAFETY, and at the same time increase their annual income nearly ONE-THIRD, will do well to investigate the merits of the 7-30 GOLD BONDS OF THE NORTHERN PACIFIC RAILROAD.

These securities, the present price of which is Par and accrued interest in currency, are selling rapidly for cash and in exchange for 5-20s; and we commend them to investors as confidently as we have always commended the Bonds of the United States Government.

They are secured by a FIRST and ONLY mortgage upon 2,000 MILES OF RAILROAD, ITS EQUIPMENT AND EARNINGS, and, in ADDITION, as fast as the Road is built, upon 500 acres of land to every $1,000 Bond, or 28,000 acres to every mile of road.

The Bonds are thus a first-class Railroad Bond combined with a Real Estate Mortgage on land worth at least twice the amount of the Company's liabilities.

Northern Pacifics are issued in denominations from $100 to $10,000, Coupon and Registered, and their heavy sales in this country and Europe assure the rapid construction of the road.

The Bonds are FREE FROM U. S. TAX to the holder, have 30 years to run, principal and interest payable IN GOLD, at the Banking House of Jay Cooke & Co.

All marketable securities received in exchange, without expense to the investor, at their highest current value.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

The Erie Canal.—What Shall be Done With it?

This is a subject which does not attract any great degree of public interest, and yet may be reckoned as of the highest public importance. The maintenance, improvement and operation of the Erie Canal, and its lateral branches, have an important relation to the commerce of the United States, and influence the prices of staple products throughout the whole world.

One of the most erroneous ideas that can be entertained is, that the Erie Canal is an injurious rival to the great trunk railways. It is not more so than the great trucks are rivals to the Broadway stages. Cripple the Erie Canal and the Great West is crippled; and in the prosperity of the Great West the grand trunk railways find remunerative employment. The wealth which the Erie Canal carried to the West is returning not only to it, but to the railways which have been built parallel to it. When the Erie Canal ceases to maintain its pre-eminence as a means of water communication between the Great Lakes and the seaboard, the great trunk lines of railway may begin to fear a dangerous rivalry; not till then.

It becomes, then, a question of wide and varied interest how the Erie Canal may be increased in efficiency, and maintained and operated in a manner that will promote commerce, and meet in all respects the just expectations of the public. It is one of the misfortunes of our canal system, that from the very inception of these important works, they have been a foot ball for the leading political parties to play upon, and as a natural consequence they have suffered greatly. Their construction and enlargement have at one time ceased to be prosecuted, and at another time unnecessary work has been prosecuted with an extravagant outlay of money. And at length our canals, instead of being a source of revenue to the State, are in danger of becoming a burden upon the tax-payers. The rate of tolls has been greatly reduced within the last two years, and various circumstances have combined to prevent a corresponding increase of business. Consequently, the receipts from tolls last season were only $2,814,958, against $4,418,308 for the season of 1868, and the amount of taxation neces-

sary to meeting the deficiencies in the canal debt fund was increased last year to $3,880,035. No further exhibit is needed to demonstrate that the question of "What shall be done with our canals?" should at once be met with practical knowledge and a spirit of elevated regard for the public interest.

A proposition has been made in some quarters, that the canals be sold to private parties or corporations. This would free them in a measure from the embarrassing influences of party politics; but not entirely so, as the history of our great railways plainly indicate; and such a course would probably lead to the abandonment at no distant day, of some of the non-remunerative lateral canals; a proceeding that would excite much discontent in the districts affected.

There is another proposition, that the Erie Canal shall be further enlarged. This is wholly impracticable, so long as the present manner of construction shall be adhered to. With mere earthworks for its banks along the most of its course, water could not be procured to keep it in navigable order, if it were any larger than now. A body of water seventy feet wide at the top and seven feet deep, is capable of doing a vast amount of work, and we do not conceive that a further enlargement is necessary. But plans to promote its efficiency must be regarded as of the greatest present interest. Upon the dispositions made of these, depend the future usefulness of our canal systems. The partial or complete re-building of the Erie Canal in such a manner that its banks will hold water more effectively than now, and permit the passage of boats at a higher rate of speed, towed by steam tugs, seems to be the work now imperatively demanded, or at least most in favor. A commission appointed by the State authorities, to devise a method of introducing steam upon our State Canals, does not appear to have made much progress in the work assigned to it. Indeed, it is one of rare difficulty. The invention of steamboats whose wheels will not cause waves to wash the earth banks of the Canal; the re-building of the banks of material that will not be thus injured—or the introduction of barriers that will protect the present banks, seems to be the present necessity.

It is not improbable that the banks of the Canal as now constructed may be easily prepared to resist the petty waves raised by small steam tugs; and it is also not improbable that the danger of injury to them from that cause has been over estimated. When the Canal was but four feet deep and forty feet wide at the surface of the water, passenger packet boats passed its whole length in four days—towed by three horses at the rate of four miles an hour. Heavily laden boats now occupy twelve or fourteen days in passing from Buffalo to Troy, and nine or ten days in passing from Oswego to Troy. Is there not some mistake in the manner of constructing and loading these boats? would not the efficiency of the Canal be promoted if the boats were constructed with sharper bows, and not so heavily loaded but that they might be towed at a brisk walk if not at a slow trot? A boat towed three miles an hour would make the passage from Buffalo to Albany in five days, while a boat towed two and a half miles an hour—a speed which certainly ought to be attained—would occupy but six days in the passage. And surely a boat carrying six thousand bushels of wheat through in six days would make more money than a boat carrying seven thousand five hundred bushels and occupying twelve days in the passage.

We have not, however, any special plan to urge; but earnestly hope that something effective may be accomplished; repeating the invocation that our Canal system be considered the friend and adjunct, instead of the rival, of our railway system. The prosperity of the one depends to a large extent upon the prosperity of the other, and whatever tends to the development of our inland commerce, promotes the interest of both.

Who Made the first Anthracite Iron?

TRENTON, N. J., March 26th, 1872.

MR. EDITOR:—Some unknown person, (a friend, I suppose,) has sent me an article of about half a column in length, clipped from some newspaper; upon the margin of which I find written in pencil the question, "How about this?"

The article is headed as above, and begins thus—"For some time past there has been a discussion going on in regard to the credit of making the first anthracite iron in the United States. Mr. David Thomas, of the Thomas Iron Works, Mr. John Richards, deceased, once of the old Mauch Chunk furnace, and Mr. Lyman of Pottsville, each having their friends to advocate their separate claims to the honor."

Next follows a letter from Mr. David Thomas, relating his experience and knowledge of the matter in question, in the course of which he makes the following statement: "There was another [furnace] at Mauch Chunk, owned by three or four men—a Mr. Bauhm, a Mr. Gitto, and a Mr. Lathrop. (the latter, I think, still living at Trenton, N. J.) This furnace was chilled up in about one week after blowing in."

Mr. Thomas' memory must certainly have failed him, or else he was misinformed in regard to the Mauch Chunk Furnace, as will appear evident from the following extract from—

"Notes on the use of Anthracite in the Manufacture of Iron. With some remarks on its Evaporating power.

By Walter R. Johnson, A. M.,
Boston, 1841."

"The furnace at Mauch Chunk, which stands at the head of the preceding Table, is believed to have been the *first in this country*, at which any considerable success was attained in the smelting of iron with anthracite.* The iron produced was of various, but mostly inferior qualities, owing probably to a deficiency of blast. The blowing cylinders are of wood (single acting) and at the speed employed did not furnish over 700 cubic feet of air per minute.

Their apparatus for hot blast was at first defective, and was afterwards placed at the tunnel head, where it could not be so well regulated as if managed in separate ovens, with an independend fire. Hence even of the limited supply of air taken into the bellows, a considerable portion must have been lost by leakage, and by escapes at the open tuyeres there applied."

*Beaver Meadow, Pa.,
Nov. 9th, 1840.

SIR:—Agreeably to a request of Col. Henry High, of Reading, I send you the following hastily written statement of the experiments made by Baughman, Guiteau & Co., in the smelting of iron ore with anthracite coal as a fuel.

During the Fall and Winter of the year 1837, Messrs. Joseph Baughman, Julius Guiteau and Henry High, of Reading, made their first experiment in smelting iron ore with anthracite coal, in an old furnace at Mauch Chunk, temporarily fitted up for the purpose.

They used about 80 per cent of anthracite, and the result was such as to surprise those who witnessed it (for it was considered an impossibility even by iron masters); and to encourage the persons engaged in it to go on. In order, therefore, to test the matter more thoroughly, they built a furnace on a small scale near the Mauck Chunk Weigh Lock, which was completed during the month of July, 1838. *Dimensions:* Stack 21½ feet high, 22 feet square at base, Boshes 5½ feet across, Hearth 14 to 16 inches square, and 4 feet 9 inches from the dam stone to the back. The blowing apparatus consisted of two cylinders each 6 feet diameter; a receiver, same diameter and about 2½ feet deep; stroke eleven inches. Each piston making from 12 to 15 strokes per minute. An overshot water wheel, diameter 14 feet, length of buckets 3½ feet; number of buckets 36; revolutions per minute, from 12 to 15.

The blast was applied August 27th, and the furnace kept in blast until Sept. 10th, when they were obliged to stop in consequence of the apparatus for heating the blast proving to be too temporary. Several tons of iron were produced of Nos. 2 and 3 quality. I do not recollect the proportion of anthracite coal used. Temperature of the blast did not exceed 200° Fahrenheit.

A new and good apparatus for heating the blast was next procured, (it was at this time I became a partner in the firm of B., G. & Co.) consisting of 200 feet in length of cast iron pipes 1½ inches thick; it was placed in a brick chamber, at the tunnel head, and heated by a flame issuing thence. The blast was again applied about the last of November, 1838, and the furnace worked remarkably well for five weeks, exclusively with anthracite coal; we were obliged, however, for want of ore, to blow out on the 12th January, 1839. During this experiment, our doors were open to the public, and we were watched very closely both day and night, for men could hardly believe what they saw with their own eyes, so incredulous was the public in regard to the matter at that time: some iron masters expressed themselves astonished that a furnace could work whilst using *unburnt, unwashed, frozen* ore, such as was put into our furnace.

The amount of iron produced was about 1½ tons per day, when working best, of Nos. 1, 2 and 3 quality. The average temperature of the blast was 400° Fahrenheit.

The following season we enlarged the hearth to 19 by 21 inches, and 5 ft, 8 inches from the dam stone to the back of the hearth; and on July 26th the furnace was again put in blast and continued in blast until Nov. 2, 1839, a few days after the dissolution of our firm, when it was blown out in good order.

For about three months we used no other fuel than anthracite, and produced about 100 tons of

iron of good Nos. 1, 2 and 3 quality. When working best the furnace produced two tons a day.

Temperature of the blast was from 400 deg. to 600 deg. Fahrenheit. The following ores were used by us, viz: "Pipe ore," from Miller's mines, a few miles from Allentown; "brown hematite," commonly called "*top mine*," or surface ore; "rock ore" from Dickerson mine in New Jersey; and Williams township ore" in Northampton County. The last mentioned ore produced a very strong iron and most beautiful cinder.

The above experiments were prosecuted under the most discouraging circumstances, and if we gain anything by it, it can only be the credit of acting the part of pioneers in a praiseworthy undertaking.

Most respectfully, Sir,

Your obedient servant,

F. C. LOWTHORP.

Prof. Walter R. Johnson, Philadelphia."

Correct copy from the book:

JOHN WISE,
Librarian Franklin Institute,
Philadelphia, Pa.

As an evidence of the reliability of the work from which the above extracts were taken, I would remind your readers that its author, in 1844, published, by order of Congress, a "Report on the Different Varieties of Coal" in order to determine their evaporative powers.

Respectfully Yours,
F. C. LOWTHORP.

Pennsylvania Railroad.

We gave in our issue of March 2d, the Report of the President of the Pennsylvania Railroad Company. The following is the

GENERAL ACCOUNT.

To capital stock		$39,839,475 00
" in sinking fund		1,500,000 00

THOS. T. FIRTH, *Treasurer.*

PHILADELPHIA, *December* 31, 1871.

☞ W. W. Cryder has been elected a director of the Erie Railway vice F. N. Drake, resigned.

Petersburg Railroad.

The annual stockholders' meeting of the Petersburg Railroad was held at Petersburg, Va., on the 20th instant, Dr. Thomas Withers, acting a chairman. The directors' annual report, which was submitted, represents that the road and its property is in general excellent condition. A new bridge at Nottoway river is nearly complete, as is also that across the Roanoke at Welden, which will make the road independent in reaching that town. The business at Weldon and all other stations shows an increase. After reading the report, the salary of the president for the ensuing year was fixed at $4,000, and Mr. Reuben Ragland, the purchaser of the city's stock at the late sale, was elected to that position, and Messrs. T. T. Broocks, S. A. Plummer, J. C. Mabin and R. A. Young, directors. The president and directors were authorized by a two-thirds vote to issue $500,000 eight per cent. bonds, secured by second mortgage on the road and other company property, the proceeds to be used for the general purposes of the company and also for the construction of an extension of the road from Petersburg to City Point, near the junction of the Appomattox and James rivers.

Baltimore and Ohio Railroad Extension.

Articles of association of the Baltimore, Pittsburg and Chicago Railway Company, Ohio division, were filed with the Secretary of State at Columbus on the 13th inst. The termini are a point in the township of Poland, Mahoning county, on the boundary line between the States of Ohio and Pennsylvania, and a point either in the township of Hicksville or Milford, in the county of Defiance, on the boundary line between the States of Ohio and Indiana. The railroad will pass through the counties of Mahoning, Trumbull, Portage, Summit, Medina, Lorain, Huron, Seneca, Hancock, Wood, Henry and Defiance. The capital stock is $3,000,000. The corporators are William Keyser, Walter C. Quincy, George R. Dennis, John K. Cowen and John Gardiner.

☞ The Superintendent of the Erie Railway reports to the Directors that of the four hundred and ninety-five locomotives on the road four hundred and seventy-seven are available. Most of the freight and coal cars are in good condition. Thirty new passenger coaches and ten baggage cars are building. The shops, tools, &c., are in good condition. During the first five months of the fiscal year one thousand seven hundred tons per month of steel-top rails have been laid. Five hundred and fifty thousand cross-ties will be required for the track during the coming summer, a large proportion of which are on hand. The bridges are, with a few exceptions, in good condition and considered safe.

☞ At a special meeting of the stockholders of the Boston, Barre and Gardner Railroad, held at Worcester on the 20th inst., the act authorizing the extension of the road to Winchendon was accepted by a unanimous vote. The question of the choice of the most feasible route was referred to the board of directors with instructions to obtain definite information in regard to it, and also in relation to the procuring of means for the extension of the road and completion of the Worcester end, and to report to some future meeting of the stockholders.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of Pork Packing in the Western States, of which the following is a recapitulation:

	1870-1.	1871-2.
Ohio	764,119	900,484
Illinois	1,234,528	1,630,725
Indiana	425,454	566,134
Kentucky	288,970	342,562
Wisconsin	251,400	334,410
Tennessee	41,270	42,680
Iowa	183,014	288,580
Minnesota	14,000	21,000
Missouri	459,155	693,949
Kansas	30,641	43,034
Nebraska	2,700	4,890
	3,695,251	4,868,448
		3,595,251
Increase in number		1,173,197

Our reports of the average weight of hogs and the yield of lard have been fuller and more satisfactory than usual, which enables us to give the averages on these points as nearly accurate as may be desired. The lard refers but to leaf and trimming, as heretofore, but we have the head and gut so fully and distinctly reported that we can say that for this 9¾ lbs. per hog may be added in order to find out the full aggregate yield of the entire packing.

The general averages for all are: Hogs 227⅝ lbs. net per hog, and lard 29 2-7 lbs. leaf and trimming per hog. The general average weight of hogs, and the yield of leaf and trimming lard per hog compare with those of six previous seasons as follows:

	Hogs, lbs.	Lard, lbs.
1866	231 3-10	31 1-7
1867	232 1-7	29¾
1868	201	21¾
1869	206¾	24¼
1870	205¾	23⅞
1871	230 1-7	30 1-7
1872	227⅝	29 2-7

From the returns made to us of the yield of head and gut lard, we feel authorized as already stated, to place it at 9¾ lbs. per hog, so that by adding this to the yield of leaf and trimming as given, it would make the total yield of all kinds a fraction over 39 lbs. per hog. The total yield of net hogs, in pounds, this season, is 1,108,180,476, and of leaf and trimming lard 142,575,977 lbs. These figures, compared with the crop of last year, make the increase in the crop of pork a fraction over 30 4-9 per cent., and in lard 28 1-20 per cent. These aggregates compare with the two previous seasons as follows:

	Meat, lbs.	Leaf & trimmi. g lard, lbs.
1869-70	542,215,444	62,918,074
1870-1	846,464,962	110,862,655
1871-2	1,108,180,476	142,575,977

In order to find the aggregate production of all kinds of lard add 9¾ lbs. per hog to the result above given, for head and gut, this season, and 10 lbs. last season.

☞ The following gentlemen have been elected directors of the Selma, Marion and Memphis Railroad: For Alabama—A. G. Mabry, Robert Crawford, S. H. Foulkes. For Mississippi—S. M. Meek, R. A. Murdock, B. S. Crum. For Tennessee—Jacob Thompson, R. A. Pinson, H. S. Jones. For president—N. B. Forrest. For secretary and treasurer—H. R. Pugh. For chief engineer and superintendent—Peter Fresenius.

☞ The Green Bay *Advocate* says that the track laying is now progressing rapidly on the Sheboygan and Fond du Lac road, and the construction train is near Dartford. The last of this month, or the first week in April will see the road completed to Princeton.

Pittsburg, Ft. Wayne and Chicago Railway.

At the annual meeting of the stockholders of this company, held in Pittsburg on the 20th inst., the following gentlemen were elected directors to serve in the place of those whose term of office had expired by law, viz: George W. Cass, J. F. D. Lanier, S. J. Tilden and J. E. Thomson. The Annual Report of the President, which was read by the Secretary, is as follows:

To the Stockholders and Bondholders of the Pittsburg, Ft. Wayne and Chicago Railway Co:

In the discharge of their duty, your board of directors now make to you a brief statement of the road during the past year, and the condition of the property. There was nothing in railway management during the year to mark an era in railway history, and nothing specially marked in the management of your property or of the railways connected thereto.

At the date of the last report the Cleveland, Mt. Vernon and Delaware Railroad was in process of construction towards Columbus, the seat of government of the State of Ohio, but has not as yet been completed as was anticipated. It is now believed that during the current year it will be finished so as to make a more direct connection with the counties on the line of your road in the eastern part of the State than now exists, and thereby add to the value of your property.

The Grand Rapids and Indiana Road is steadily progressing towards completion, and is developing a large business to be distributed along the line of your road, both east and west from Fort Wayne.

During the year the Cincinnati, Richmond and Ft. Wayne Road from Richmond to Ft. Wayne, Indiana, ninety miles in length, has been completed, and with the Cincinnati, Hamilton and Dayton Road, forms a very direct route from Ft. Wayne to Cincinnati.

Within the next four months it is expected that the Peninsular Road of Michigan will be completed to Valparaiso upon your road, forty-four miles east of Chicago, and that an arrangement will be made by which the business of the Peninsular Road will be carried over your road between Valparaiso and Chicago.

The grading of the Plymouth, Kankakee and Pacific Railway, from Plymouth (eighty-four miles east of Chicago) to Bureau Junction, on the Rock Island Road, a length of one hundred and sixty-seven miles, will be completed in the next few months, and the completion of this road will make the shortest line from Pittsburg to the eastern terminus of the Union Pacific.

During the year no railroad has been built in the territory which contributes to the traffic of your road calculated to withdraw business from your line. The recital of the progress of construction of the different roads above, is given for the purpose of showing the gradual development of the country by new lines of communication, which cannot but add to the business of your road and to its value.

Your board takes pleasure in stating the management of the business and the preservation and improvement of the property by the lessee has been entirely satisfactory.

The roadway, track, bridges, rolling stock and buildings have been kept in good condition, excepting as to a few station houses mostly of the second and third class, which require rebuilding on an enlarged scale. The lessee reports having expended during the year 1871, for the betterment and equipment, under the term of the sixteenth article of the lease $606,841 02. The principal items are as follows:

For equipment	$406,700 95
Additional side track	18,487 48
Engine house and shop machinery	38,324 10
Stations and warehouses	18 502 04
Stone and iron bridges	40,704 53
Real estate, principally in Chicago	62,760 67

This account has not been audited by your board of directors, but it is not likely that the amount allowed will vary materially from the above. A form of special guaranteed stock, to be issued under the provisions of the sixteenth article of the lease, with a guarantee thereon by the lessee, to pay the dividends, has been agreed upon between the board of directors and the lessee, and will be found appended to this report.

One million four hundred thousand dollars of stock has been issued to the lessee, to reimburse them for actual cost of expenditures in the permanent improvement of the road, and the addition of your equipment, from July 1, 1869, to December 31, 1871, a period of two years and a half. This is equivalent to adding $46,666 of new capital per month.

The lessee reports the earnings and expenditures of the main line and branches for the year as follows:

EARNINGS.

P., Ft. W. & C. R. R	$8,393,973 86
New Castle branch	288,976 53
Lawrence branch	139,055 36
	$8,822,005 75

EXPENSES.

P., Ft. W. & C. R. R	$4,347,329 55
New Castle branch	101,873 55
Lawrence branch	61,896 58
	$4,511,099 68

The increase of the earnings for the main line was $611,870 78, equal to eight per cent. The increase of expenses was $119,264 57, being an increase of 2¾ per cent. The increase of gross receipts on the two branch lines for the year was $58,226 52, being an increase of fourteen per cent. The increase of expenses for the year has been $19,937 58, or thirteen per cent.

The result to the lessee exhibits a large profit after paying all the working expenses, taxes, new construction and equipment, and the sums required to be paid to the lessors.

Of the eighty-five suits pending at the date of the last annual report, but few have reached a final decision in the courts. About as many new ones have been commenced as have been decided, leaving us as to numbers about where we were twelve months ago. The most important case decided during the year in favor of the company, was the one commenced in Philadelphia to compel the company to allow the holders of the bridge bonds, issued by the O. and P. R. R. Co., in 1856, to convert their bonds into the stock of this company. Although the number of suits has not diminished, yet it is believed very substantial progress has been make towards settling these old claims against the company, and we hope your board, in their next annual report, will be able to make a much more satisfactory exhibit in this particular.

Respectfully submitted.

GEO. W. CASS, President.

Northern Central Railway.

We gave in our issue of March 2d the Report of the President of this company for the year ending December 31, 1871, showing the receipts from operations of the road to have been $4,266,898 85, the operating expenses $2,989,737 86, and the net revenue $1,277,160 99. From the treasurer's statements, which have since been received, we learn that the receipts and expenses were apportioned as follows:

RECEIPTS.

Main Line	$2,976,046 44
Shamokin Division	334,066 94
Elmira Division	541,297 63
Chemung Division	84,551 81
Canandaigua Division	330,936 03
Total earnings	$4,266,898 85
Capital Stock	601,700 00
Bonds issued	365,000 00
Total	$5,233,598 5

EXPENDITURES.

Main Line	$1,965,150 91
Shamokin Division	201,995 97
Elmira Division	481,608 48
Chemung Division	92 043 54
Canandaigua Division	248,938 96
Total operating expenses	$2,989,737 86
Interest, discount and gold premium	623,273 28
Dividends on capital stock	335,758 50
Taxes on capital stock, dividends and surplus	20,177 12
Rent of Shamokin Valley and Pottsville Railroad	103,843 63
Rent of Elmira & Williamsport R. R.	166,210 94
Rent of Elmira, Jefferson and Canandaigua Railroad	27,973 94
Sinking Funds	141,897 91
Construction	394,495 80
Real estate	9,601 35
Equipment	33,269 99
Floating debt decreased	287,358 53
Total	$5 233 598 85

From the Report of the Superintendent we learn that the company have 131 locomotives—80 on the Main Line, 41 on the Elmira and Canandaigua Division, and 10 on the Shamokin Division. The car equipment consists of: 64 first-class and 4 second-class passenger, 22 baggage, 16 express, 995 box, 544 gondola, 51 stock, 101 box and stock, 38 stone, 3,377 coal, 185 lime, 11 tool, and 60 freight cabooses. The mileage of locomotives was as follows:

	Main Line.	Shamokin Division.	E & C. Divisions.
Passenger	545,908	31,220	303,526
Ballast	45,067	.....	19,990
Freight	1,276,916	175,325	564,446
Total	1,867,891	206,545	887,962

—the total mileage being 2,962,398, against 2,541,535 in 1870, an increase of 420,863.

There were carried during the year 1,091,356 passengers an average distance of 25.2 miles, or 27,608,418 passengers carried one mile. The tonnage for the year aggregated 4,161,400 tons hauled an average distance of 42.10 miles, or 175,522,858 tons hauled one mile.

The tonnage on the Main Line and branches for the year compare with 1870 as follows:

	1870.	1871.
Main Line	1,736,447	1,964,013
Wrightsville branch	41,500	.....
Shamokin Division	573,860	750,445
Elmira Division	299,635	360,870
Chemung Division	261,776	311,127
Canandaigua Division	767,547	774,945
Total	3,680,765	4,161,400

—showing an increase in tonnage of 480,635 tons.

The financial condition of the company, December 31, 1871, was as follows:

ASSETS.

Railway and appurtenances		$10,362,933 48
Canton Extension		334,356 83
Real estate		787,454 94
Equipment		3,049,719 41
		$14,534,464 66
Cash	$297,962 07	
Passenger agents	2,923 98	
Freight agents	175,629 82	
Post Office Department	10,465 11	
Materials and supplies	301,143 67	
		788,124 15
		$15,322,588 81

LIABILITIES.

Capital stock—112,034 shares		$5,601,700 00
Third mortgage six per cent. coupon bonds of York and Cumberland R. R. Co. guaranteed by City of Baltimore, due January 1, 1877	$500,000	
Second mortgage six per cent. coupon bonds of Northern Central Railway Co., due July 1, 1885	2,500,000	
Third mortgage six per cent. coupon bonds of Northern Central Railway Co., due April 1, 1900	1,223,000	
	$4,223,000	
Deduct amount in sinking funds	863,227 91

Foreign roads—freight account	14,927 55	
Individuals and corporations	67,039 02	
		1,006,849 89
		$14,327.151 98
Profit and loss account		995,436 83
		$15,322,588 81

The officers of the company for 1872, are as follows:

President.—J. D. Cameron.

Vice President.—J. N. Dubarry.

Directors.—Wm. Colder, A. E. Kapp, George Small, Edward C. Biddle, John M. Kennedy, B. F. Newcomer, Henry Welsh, Thomas A. Scott, Jacob P. Jones, Wistar Morris, S. M. Shoemaker, Edmund Smith.

Secretary.—Robert S. Hollins.

Treasurer.—John S. Leib.

Auditor.—Stephen Little.

General Superintendent.—A. R. Fiske.

☞ From a careful calculation made by the Cumberland *News* of the tonnage upon the Chesapeake and Ohio canal, there are four hundred and thirty-five servicable boats upon that thorough fare employed in the coal-carrying trade, the average tonnage of which is 112 tons per boat—making a total tonnage of 48,720 tons. The average time for a "day and night boat" (and nearly all are such) to make a round trip to tide water and back, is nine days. The usual number of days the canal is open for navigation is about 244, but allowing 18 days for stoppage, from one cause or another, leaves 226 days of boating, or twenty-three trips for each boat, making a sum total of the coal-carrying capacity of all the boats on the canal of 1,120,480 tons for the season.

Commerce of New York.

The foreign imports at New York for the month of February, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$16,995,041	$21,083,566
Do. for warehousing	13 046 484	14 570,487
Free goods	2,951 198	2,424,389
Specie and bullion	2,498,601	177,701
Total entered at port	$35 491,324	$38 206,143
Withdrawn fr. wareh'use	9,685,252	11.734,891

The foreign imports at New York for the two months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$31,164,597	$38,974 078
Do: for warehousing	24,104 602	29,475,089
Free goods	6,806,900	5,158,449
Specie and bullion	2,707,287	283,023
Total entered at port	$64 283,386	$73,885,639
Withdrawn fr. wareh'se.	22,694,516	24,133,903

The foreign imports at New York for the eight months of the fiscal year, were:

	1871.	1878.
6 months ending Jan. 1.	$156 339,208	$183,028,276
January	28,792,062	35,679,496
February	35,491,324	38,206,143
Total	$220,622 594	$256,913,915

The duties received at New York for eight months ending with February, were:

	1871.	1872.
6 mos. ending Jan. 1.	$67,729,184 75	$74 078,181 75
In January	12,010,020 67	13,317 086 82
In February	12,258,147 69	14,710,928 08
Seven months	$91,997,353 11	$102,106,196 65

The exports from New York to foreign ports in the month of February, were:

	1871.	1872.
Domestic produce	$18,259,723	$16,746,878
Foreign free goods	29,805	272,341
Do. dutiable	450 214	895,950
Specie and bullion	4,022,066	972,657
Total exports	$22,761,808	$18,887,826
Do. exclusive of specie.	18,739,742	17,915,169

The exports from New York to foreign ports for two months from January 1, were:

	1871.	1872.
Domestic produce	$36,630,481	$34,926,866
Foreign free goods	73,217	358,983
Do. dutiable	873 920	1,580,824
Specie and bullion	6,171,277	2,513,019
Total exports	$43,748,895	$39,379,192
Do. exclusive of specie.	37,577,618	36,866,173

The exports (exclusive of specie) from New York to foreign ports for eight months ending with February, were:

	1871.	1872.
6 months ending Jan. 1.	$107 654,919	$119,604,290
January	18,837,876	18,951,904
February	18,739,742	17,915,169
Total produce	$145,232,537	$156,470,468
Add specie	47,522,152	24,823,943
Total exports	$192,754,689	$181,294,406

☞ Mr. Gitt, engineer, has completed the preliminary survey of a line from Waynesboro' for the proposed branch to connect with the Western Maryland. The line connects about three miles north of Smithburg, and is only six miles in length. The route will be easy of construction

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday March, 30, 1872.

Stock Exchange and Money Market.

The Money movement has been generally against the borrowing interests during the week, though occasional relaxations have been noted. The offerings, as a rule, have been quite reserved, the city banks not having been in a position that would justify them in extending their advances, while private lenders have been availing themselves of the pressure for aid—due in part to speculative manipulations of the market—to maintain extreme rates for accommodation, particularly to the Stock Exchange firms. Call loans have been quoted at from 7 per cent. currency to the large Government houses, to 7 per cent. gold, and in several instances, an additional commission to the Stock brokers. The later negotiations indicated less stringency, and much more favorable terms as to rates for borrowers, closing with the best class of call loans quoted at 6@7 per cent. currency. The offerings of mercantile paper were moderate for the season with choice to good grades of business paper rated at from 7@10 per cent. per annum, on a fair demand for selections of double, and single names. The Treasury Department has been disbursing both coin and currency, through the local office, quite freely, reducing its cash balances. The city banks reduced their loan and discount average nearly 2⅛ millions during the week while again moderately contracting their outstanding circulation. The U. S. Sub-Treasury reduced its currency balance slightly. It also made a reduction of 4¼ in its coin reserve. Its currency balance at the close of business on Tuesday was $6,356,473 and its coin reserve, $67,998,116.

The city banks, in their latest return, show a reduction of $569,500 of legal tender notes, $167,800 of specie, $2,332.900 of deposits; also a decrease of $2,107,400 in their loan and discount averages, and of $80,200 in their item of circulation. The city bank exchanges, last week, averaged $118 794,557 and thus far, this week, about 116¼ millions daily. The banks now hold $4,125,025 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,436,600, against $19,617,007 same time last year. The city bank deposits are now $203,717,000, against $225,774,302 week ending March 25, 1871. The legal tender reserve amounts to $42 618,300, against $55,193,408 same time last year. The circulation now stands at $28,018,800 against $31,683,398 same time last year. The loans are now $277,761,500 against $291,114,320 at this date last year.

The coin reserve of the city banks is now about 19½ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 45⅝ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $128,312, and its coin reserve $4.241,673 as the result of the week's business. The receipts of the office were $3,592,342 in coin, and $2,011,059 in currency; payments, $7,834,015 in coin, and $2,139,372 in currency. The office received $2,339,000 in coin or its equivalent from customs; and disbursed $250,356 of coin interest.

The cash balance at the Treasury Department at the opening of business on Tuesday were: Coin, $119,500,000; currency, $10,000 000. Coin certificates were outstanding for $30,000,000.

Government revenues have been yielding moderately, during the week. The excises yielded about two millions, and thus far since July 1, 1871, $94,288 517. The customs at the port of New York, last week were $2,292,657; at the outports, equal to about $750,000 more, all in coin, or coin certificates.

Gold has shown a very moderate degree of animation in the speculative dealings of the week, with but slight fluctuation in the price from day to day. The export movement has been limited. The customs call has been less urgent. At the close, the speculative inquiry was somewhat brisker, and quotation were a trifle stronger. The range of the price during the week has been from 109⅝ @110¼ and the closing quotation on Wednesday was 110¼@110¼ against 109¾@109⅞ the preceding Wednesday. The specie outflow, last week, was $675,626. The Gold Exchange Bank clearances have averages about 32⅜ millions per day during the week.

The customs demand for Gold last week, aver-

aged $389 833 a day; thus far, this week, it has averaged $656,745 a day, or equal to a weekly aggregate of $3,940,470. The arrivals o specie from Europe, Havana and other foreign ports last week were $243,235, and since Jan. 1, 1872, $585,210 against $2,748,378 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $116,024,794 against $108,434,875 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to March 23, 1872, $62,109,020, against $66,262,358 same time in 1870-'71.

The export drain of specie was $675,626 last week, against $1,531,579, same week preceding year. The shipments since July 1, 1871, have been $26,969,780 against $55,007,281 same time in 1870-'71.

Foreign Exchange has been quoted steadier as to price, toward the close, on rather lighter offerings of prime bills, and a fair inquiry. Bankers' sixty day bills on London closed on Wednesday at 109¼@109½; sight bills on London, 110⅛@110¼.

The produce exports from this port, week ending with March, 26th were to the currency value of $4,078,234.

Government securities have been moderately dealt in, chiefly by investment purchasers, at generally firm prices, closing with an upward tendency.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115½@115¾; U. S. Five-Twenties of 1862, (other than the bonds called in) 112@112⅛; U. S. Five-Twenties of 1864 at 112⅛@112¼; U. S. Five-Twenties of 1865, 112⅝@112¾; U. S. Five-Twenties of 1865 consolidated, 111⅛@111¼; U. S. Five-Twenties of 1867, 112⅛@112¾; U. S. Five-Twenties of 1868, 112⅝@112¾; U. S. Ten-forties at (ex March coupon) 108⅓@108¼; U. S. Fives of 1881 (Funding Loan) 109⅜@109¾. Six per cent. currency bonds, 115¼@115½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 13.	Mar. 20.	Mar. 27.
Consols.	92⅝@92¾	92⅞	93 1/16
U. S. 5-20's of 1862..	92⅛	92⅜	92⅝
U. S. 5-20s, 1865....	93¼	93½	93¾
" 1867	92⅝	93½	93¾
" 10-40s	89	89½	89½
Erie	....	44⅛	54⅛

State bonds have been in fair demand, but variable in price.

There has been a good average investment business noted in the better class of Railway bonds at generally firm prices. Central Pacific Sixes have been in fair demand at 101¾@102. Chesapeake and Ohio Sixes have been in request at 94 per cent. and accrued interest.

Railway and miscellaneous share property has been decidedly brisk and buoyant in price, with the extraordinarily spirited Erie share speculation as the main feature of the week, dealings, which on Tuesday carried the price of these shares up to 68, on a remarkably excited market. The fluctuations in the speculative favorite were frequent and violent. The extremes on this stock on Wednesday were 66 and 60.

At the auction sale of Scranton Coal on Wednesday, 125,000 tons were sold at in most instances a trifle better prices, ranging from 3.55@4.17½, as against 3.50@4.25 in February.

On Wednesday, 11,000@12,000 bales of Cotton were reported sold for export to Liverpool, with freight and charter engagements for the same port of 15,000@16,000 bales, an extraordinarily extensive business.

General business has shown less activity in the dealings in Breadstuffs, Provisions, Wool, Tobacco, Seeds, and Petroleum, with considerable irregularity in values. Cotton closed with decidedly more animation. Middling upland cotton closed on Wednesday at 22⅞@23cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,396,055 bales, against 3,267,713 bales same time in the preceding year; exports 1,494,586 bales against 2,155,289 bales in the previous year; stock at the ports at latest dates, 439,697 bales against 658,328 bales same date 1871.

In the metal trade, the chief features were the unusually extensive transaction in Ingot Copper, mostly for forward delivery, at advanced rates; the buoyancy in Iron and Tin, which were offered with reserve; and the free business in Hardware at advanced rates. The week's sales of Ingot Copper reached about 10 million pounds, for prompt and forward delivery, closing at 33¼@33½ cash, and 28½@29½ for June to August delivery. Iron has been quoted firmer, on a reduced stock and fairly active call, with sales reported of 450 tons Glengarnock Pig, seller March and April, on private terms, closing on the spot at $51@$52; 100 tons Eglinton Pig on private terms, closing at $50; 4,000 tons English Rails, 4,000 tons American do., 600 tons old Rails, 450 tons old Doubled-headed do., and 800 tons Wrought Scrap, on private terms.

At the Live Stock Markets, Beeves have been in good demand at 10@14 cts.; Veals in moderate request at 5@10¼cts.; Sheep wanted at 8@10¾ cts. Swine, dull at 5@5¼ cts. per lb., all live weight. The week's receipt were 7,671 Beeves, 28,078 Veal Calves, 14,818 Sheep and Lambs; and 28,078 Swine.

Foreign goods have been in fair request at generally firm prices. The week's imports of foreign goods reached the amount of $8,213,542 including $4,238,558 of dry goods.

Ocean freights have been rather more active, and rates generally well supported.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Wilkesbarre (Pa.,) *Times* says that engineers have been busy running out the proposed railroad from the coal fields down the east side of the Susquehanna to Catawissa and Williamsport. Work has been done at several points below Nanticoke to make the line sure.

BANKING-HOUSE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, March 25, 1872.

WE ARE SELLING THE **CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS**—a safe security for investments—at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100, registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin. Descriptive pamphlets, with full information, furnished on application.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS at their current prices.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

Monongahela Bridge.

The Pittsburg *Chronicle* says it has been determined not to build a new iron bridge over the Monongahela river, but to replace the present suspension bridge with a substantial wooden truss bridge, at a cost of about $360,000. The stockholders have decided on a Howe or Burr truss bridge of the following dimensions; Cartways, twenty-two feet wide and twenty-two feet high: side walks, eight feet wide in the clear. The cartways will be one foot wider than the present ones, and the sidewalks three feet wider. The channel span will be one hundred feet wider than at present, and the floor of the bridge will be elevated fifteen feet above the present level, giving ample headway for steamboats. The bridge, of course, will be covered—the intention being to use tin for the roof. The plans are now being prepared.

☞ The earnings of the Cincinnati, Sandusky and Cleveland Railroad for six months ending December 31, 1871, were $459,400 74, and the expenses $245,591 07, leaving net earnings $213,809 67. In the corresponding period of the previous year the earnings were $450,731 96, the expenses $273,143 82, and the net earnings $177,588 14—showing an increase in earnings of $8,668 78, with a decrease in expenses of $27,552 75, making the increase in net earnings $36,221 53.

☞ The price of the First Mortgage 7 per cent. gold bonds of the Wallkill Valley Railway Company has been advanced to 92½ and accrued interest in currency.

☞ At a meeting of the directors of the Buffalo and Jamestown Railroad at Buffalo on the 21st inst., the following officers were elected for the ensuing year: President, M. Richmond; Vice President, James Adams; Treasurer, Abraham Altman. This is the New York Branch of the direct road to Titusville. The building of the through road to the oil regions is placed beyond a doubt.

☞ The Newport and Cincinnati Railroad bridge, 3,800 feet long, and 103 feet above the water, built under the direction of its chief engineer, Mr. J. H. Linville, was tested on Tuesday the 19th inst, with five heavy engines and tenders coupled together. The channel span, 420 feet long, the longest railroad span on this continent, deflected only 1 1-6 inches. The bridge was formally opened on the following Wednesday.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,
BANKERS,
NO. 11 WALL STREET.

☞ We learn that a large portion of the capital stock of the Bound Brook and Easton Railroad Company has been taken by persons who are largely interested in railroad enterprises and coal mining. This road, with the Perth Amboy and Bound Brook Railroad, will form the shortest and most direct line of communication between tide water and the coal and other mineral fields of Pennsylvania.

☞ The directors of the Maine Central Railroad Company, under the authority given by the Legislature at its late session, have voted to issue nine million dollars' worth of bonds running for forty years and paying nine per cent. annual interest. The object of this issue is to retire the bonded indebtedness of the company, and to furnish ample means for placing the road in the very best of condition.

☞ A bill to incorporate the Absecom Village and Somers' Point Railroad Company has passed the New Jersey Legislature. This is another branch of some seven miles, connecting with the Camden and Atlantic road.

☞ Information has been received that the Swiss engineers, Naaf, Riggenbach and Zschokke, are about to construct a railway to the summit of Mount Vesuvius, similar to that of Mount Washington.

Pork and Beef Packing in Chicago.

The following table exhibits the number of hogs packed in Chicago during the four seasons in which the greatest number of hogs were reported, the aggregate weight and yield of yard in pounds:

	Hogs, No.	Aggregate w't lbs.	Lard, lbs.
1862-3	970,264	214,428,344	36,147,509
1863-4	904,659	173,794,528	30,758,406
1870-71	918,087	207,258 138	34,832,210
1871-2	1,225,236	284,922,495	53,629,440

The following table exhibits the number of hogs packed in Chicago for the past 21 years:

1851 2	22.036	1862-3	970 264
1852-3	44,156	1863-4	904,659
1853-4	52,849	1864-5	760 514
1854 5	73.694	1865-6	507,355
1855-6	80,380	1866-7	639,332
1856 7	74,000	1867 8	796.226
1857 8	99,262	1868 9	597 954
1858-9	179,684	1869 70	688.140
1859-60	151.339	1870 1	948,087
1860-1	271,805	1871-2	1,225,236
1861-2	505,691		

The quantities of the articles below specified produced for three seasons compare thus:

	1871-2.	1870-1.	1869-70.
Mess pork, brls.	126,059	98,731	88.894

Journal of Railroad Law.

RAILROAD COMPANIES—ASSAULT AND BATTERY—STATUTE OF LIMITATIONS—TRESPASS.

The facts in the late case of Priest *vs.* The Hudson River Railroad Company (10 Abb. Pr. N. S. 60) are fully and clearly stated in the following opinion by

MONELL, J.—It was conceded on the argument, that if this was an action for an assault and battery, it was barred by the statute. Section 93 of the code requires that actions for "libel, slander, assault and battery, or false imprisonment," shall be commenced within two years. But it is claimed that the case of the plaintiff falls within the fifth sub-division of section 91 of "any other injury to the person or rights of another not arising on contract, and not hereinafter enumerated."

The allegations in the complaint are those of an assault and battery, committed upon the person of the plaintiff by the defendant's brakeman. Had the action been against the brakeman, it would have been for an assault and battery.

Has it become a different action by being against the employer or principal, under whose authority or direction the injury was done?

Since the abolition of "forms" of actions, which includes the denominations of actions, and reducing all to one form under the denomination of a "civil action," (code § 69,) it has not been easy to interpret such parts of the code as, very singularly, still preserve to some extent the denomination of actions. Assault and battery, libel, and slander, are in the main but injuries to the person. Yet we find both in apparently inconsistent attitudes, as we do in the two sections already referred to.

To prevent the statute from attaching, it would be necessary to determine that the action is for an injury to the person other than an assault and battery, and that can be done only by making a distinction between an action against the master and an action against the servant.

The old action of trespass was of three kinds: 1st. Trespass for injury to the person, accompanied by force (*vi et armis*), such as assault, battery, or false imprisonment; 2d. Trespass for injuries to the personal property; 3d. Trespass for injuries to real property.

Trespass on the case commonly called "case," lay for injury to the person or the personal rights or property, not accompanied by force or not immediately injurious.

Under the old form of actions, I cannot doubt this would have been trespass, assault and battery, and not trespass on the case.

The liability of the defendants, proceeds upon the principle of agency. Their employee, in performing his assigned duties, committed the assault, and even if it was wilful, and accompanied by more than necessary force, it was done in the course of his employment as the servant of the defendants. (Meyer *vs.* Second Ave. R.R. Co., 8 Bosw., 305). The distinction between trespass and case, though finely drawn was strictly preserved until the adoption of our new code of practice; and it was not unusual to nonsuit a plaintiff who had mistaken his "form" of remedy.

Trespass was the oldest form of action.

Trespass on the case was given later, and in England first by the statute of 13 Edw. I., and was more comprehensive than trespass.

The strictness with which these forms of action were separated in England may be illustrated by the case of Savignac *vs.* Roome (6 Term. R. 125), where the action was "case" against the master for wilful injury by the servant. The court arrested the judgment on the ground that the action ought to have been "trespass." Afterwards the plaintiff brought trespass, alleging negligence as the cause of the injury (See 2 Black., 442), and was non-suited, on the ground that the action ought to have been "case." And the decisions are reconcilable. Under the old forms, for a wilful act, trespass lay; for a negligent act, case was remedy. In this country, however, and particularly in our State, this rigid strictness was greatly relaxed before the code, and trespass and case were mostly concurrent remedies.

Assuming, then, as the plaintiff must assume, that the liability of the defendants arises from the act having been done by their servant in the course of his employment, and not negligently or unskillfully (for if it was willfully done outside of his employment, the master would not be liable, see Wright *vs.* Wilcox, 19 Wend. 343), then follows that it was a joint trespass for which a joint action, or several actions against either, could be sustained.

But the action would be for the same cause, for what a master does by his servant he does by himself.

I am of opinion, therefore, that the action in this case was for assault and battery, and for such cause was maintainable against the defendants, all being principals in the trespass.

There may be some difficulty in reconciling the difference in the limitation of actions for personal injuries other than assault, &c., but the legislature could never have intended to include in actions for personal injuries all the actions enumerated in section 93. But they did intend, I think, to continue, in effect, the distinction which arises from the well understood meaning of words, and hence to confine the action within the two years' limitation, whenever it can be seen, from the statement of the cause of action, that it is for an assault and battery, &c.

I am of opinion, therefore, that the defense ought to have prevailed.

The judgment and order should be reversed, and judgment absolute granted to the defendants' with costs.

Judgment accordingly.

Atlantic, Mississippi and Ohio Railroad.

This road, stretching from Norfolk, Va., on the Atlantic ocean, entirely across Virginia to Cumberland Gap, on its extreme southwestern border—the point of junction with Tennessee and Kentucky—was organized November 12, 1870, under an act of June 17, 1870, by the consolidation of the Norfolk and Petersburg, South Side, Virginia and Tennessee, and Virginia and Kentucky Railways. The total length when completed will be 580 miles. There has been in operation 457 miles since 1858, when the seaboard link was opened, Norfolk to Petersburg, 81 miles; Petersburg to Lynchburg (including branch to City Point, 10 miles) 133 miles; Lynchburg to Bristol (including branch from Glade Spring to Saltville, 10 miles,) 214 miles; in all (including 29 miles side tracks) 457 miles. The addition of 100 miles from Bristol to Cumberland Gap will complete the road.

At Norfolk connection is made with regular steam lines for Baltimore, Philadelphia, New York, Boston and Liverpool—the latter recently established: at Petersburg with branch to City Point, on James river, where tobacco is chiefly loaded; add with all rail route through North and South Carolina to the cotton and rice regions, and with routes *via* Richmond to Northern and Eastern cities: at Burkeville with the Richmond and Danville Railroad for Richmond, on the north, and south, *via* Danville, with interior route through the Carolinas to the Gulf; at Lynchburg with the Orange and Alexandria to Washington, forming a part of the great Southern mail route, with the Lynchburg and Danville on the south, now under construction, opening communication with the best tobacco fields of Virginia and on the northwest with the James River and Kanawha Canal, whose extension to the Ohio is proposed under the name of the Chesapeake and Ohio Canal; at Glade Spring with branch to the celebrated salt mines and plaster banks of Southwestern Virginia: at Bristol, its present completed western terminus, with the East Tennessee, Virginia and Georgia Railroad, a prolongation of this line, to Chattanooga and Dalton, where five lines, of common gauge, diverge and establish direct communication with Tennessee, Georgia, Alabama, Mississippi, Louisiana, Texas and Arkansas, and by their connections with the entire Southern, Southwestern and Northwestern States. Cars loaded at Norfolk may thus be carried to New Orleans, Memphis, Louisville, St. Louis or Omaha, without break of bulk; while the route is acommanding part of the line—*via* Memphis—connecting with the Southern Pacific Railroad.

Equally promising are the local resources of the route. On either side lie valuable and fertile lands, producing cotton, corn, wheat, tobacco and lumber. Between Lynchburg and Bristol it traverses the heart of the rich valley of Southwestern Virginia, celebrated for its cereals, grasses, and stock; for minerals, inexhaustible in quantity, adjacent to the line, embracing copper, lead, zinc, iron, barytes, manganese, coal, salt and plaster, already a heavy item in the tonnage of the line, although their development can scarcely be said to have begun, and noted for its medicinal springs. By the extension to Cumberland Gap a rich section heretofore without an outlet will be opened. The extension forms a new line, short, quick and cheap, with easy grades, light curves, never closed by snow, and capable of easy transportation.

The survey of the extension from Bristol to Cumberland Gap, one hundred miles, is completed, and the contract was to be let and work begun April 1, 1872, to be completed on or before January 1, 1874.

The aggregate stock of the four companies consolidated is $6,921,900, all of which is subscribed except about $350,000. The company have authority to issue first mortgage for $15,000,000 to retire existing indebtedness of the several companies, say $6,000,000, and build extension to Cumberland Gap and enlarge equipment. The company owns by purchase from State three-fifths of its own stock, say $4,000,000, being the amount formerly subscribed by the State to build the various roads, and forming part of paid up capital. The business of the road is increasing, the revenue having increased fifty per cent. in four years.

"The South Improvement" Monopoly.

We have heretofore given the main features of the great Oil Movement Combination by which the oil-producing and oil-refining business was sought to be controled in a single interest, but as a meeting is soon to be held in this city to consider what steps are necessary to thwart the designs of the organization, we briefly reproduce what are believed to be the origin, object and aim of this incorporation. It is a great railroad monopoly, formed to control the carrying trade of the petroleum oil business. The company was chartered by the Pennsylvania Legislature in 1870, with a nominal capital of $10,000,000. During 1871 the co-operation of the four great trunk lines—the Pennsylvania, the Erie, the New York Central and the Baltimore and Ohio Companies—was secured by an agreement on the following basis:

The Erie and New York Central Railways to be accorded each twenty-seven and a half per cent., and the Pennsylvania Central, including the Baltimore and Ohio interest, forty-five per cent of the addition to the freight tariff over the old rates, which exaction was to be rendered possible by the consolidation.

The first advance in freights was made two months ago, and on the first of February another advance was announced. Thus far no decided opposition was made; but when on Monday, the 10th inst., a still further advance was made, the opposition began to be earnest.

The following table shows the present situation:

	Oil in barrels.		Oil in bulk.	
	Old t'ff.	New t'ff.	Old t'ff,	New t'ff.
To New York...	$1 65	$2 84	$1 31	$2 45
To Boston.....	$1 89	$2 99	$1 45	$2 63

The Cleveland and Pittsburgh refiners, who are connected with the monopoly, receive a drawback of $1 per barrel, while refined oil from Titusville must now pay a freight charge of more than two and a half cents a gallon, or $1 16 to $1 18 per barrel more than before. The railroad companies get a remunerative profit on the oil sent eastward from the refineries of the "Company," while the extra tariff is literally extorted from the refineries of the Titusville region. The South Improvement Company having obtained absolute control of the entire oil producing district, can buy oil on its own account; and by creating a scarcity of the product in the Eastern markets, so enhance the price as to secure an enormous profit in addition to the overcharge for freight.

The oil producers of the oil region are directly interested in defeating the oppressions and extortions of this gigantic monopoly, by building this railroad to Buffalo, which shall be by its charter incapable of charging high rates of freight on their product. Then the canal during the navigation season will carry it east at very low rates to a market, and in the winter it can be refined and sent from Buffalo, through Canada, on the Grand Trunk railroad to the seaboard. The refiners of oildom are interested in building the railroad to Buffalo from Titusville, as these refiners can thereby get coal to use there, and can send their refined oil the same routes to the Eastern markets; and if they do join the city of Buffalo in building the road, the great South Improvement monopoly is overthrown, and the abnormal condition of things at Cleveland and Pittsburg abolished, and Buffalo set on a footing equal to any point for refining oil in addition to its increased business by way of transhipment.—*Buffalo Express, March* 20.

Atlantic and Great Western Railroad.

The main line is 387.32 miles long—49.14 miles in New York, 92.16 in Pennsylvania, and 246.02 in Ohio. The total length owned by the company is increased to 425.50 miles, by the Meadville and Oil City 33.20 miles, and the Wadsworth and Silver Creek 4.98 miles. The company operate, under lease, the Cincinnati, Hamilton and Dayton 66.13, and the Cleveland and Mahoning 80.18. The total operated (including sidings, 141.45 miles) amounts to 707.26 miles. The rolling stock includes 166 engines, and 81 passenger, 35 baggage, &c., and 8,480 freight cars. The management since its organization have provided for additions of 40 locomotives, 30 passenger coaches, and freight cars as follows: iron tank, 200; coal, 1,000; box, 1,000, and stock, 600, at a cost of $2,720,000. The permanent road will be improved at the cost of $2,835,000, amounting to a substantial reconstruction of the road. The earnings for 1870-71 amounted to $4,213,936; the transportation expenses to $3,465,038; and the net earnings over operating to $703,075. The expenses amounted to $694,780 in excess of earnings. The capital amounts to $77,500,603—including $11,040,006 first mortgage 7 per cent. bonds; $5,000,000 7 per cent. reorganization stock: $8,445,590 second general mortgage 7 per cent. bonds; $28,215,101 third general mortgage 7 per cent. bonds; $9 875,906 preferred 5 per cent. stock, and $19,950,000 common stock. The new bonds are dated January 1, 1872. The first coupon on the First Mortgage Bonds will be due July 1, 1872; on the Second Mortgage Bonds (from March 1), Sept. 1, 1872; on the Third Mortgage Bonds (from May 1), Nov. 1, 1872. The total amount required for interest will be $5,332,524, as follows:—Payment absolute $1,916,172—$770,981 on first mortgage; $280,000 on reorganization stock; $591,191 on second mortgage, and $274,000 on Cleveland and Mahoning, rental; payment contingent on earnings $3,466,352—$1,975,057 on third mort.; $493,795 on preferred stock, and $997,500 on common (5 per cent.) stock. Resumption of payment is to begin 1st March, April, July, September, and November.—*London Railway Times.*

☞ The Pennsylvania Railroad Company has taken possession of its new office in Philadelphia. It is located on Fourth Street, below Walnut. All the following named companies will find office accommodation in it namely: The Pennsylvania Railroad, the New Jersey leased roads, the Harrisburg and Lancaster Railroad and Agency of the Northern Central Railway, the Philadelphia and Erie Railway, the Pennsylvania Canal, and Delaware and Raritan Canal, and the American Steamship Company. All business connected with these companies will henceforth be transacted at the new building.

Union (Baltimore) Railroad.

The work of constructing the Union Railroad, extending from Charles street to tidewater at Canton, is steadily progressing, the contractors having every available man at work, both inside and outside the tunnel, with little or no interruption during the winter. The tunnel is five eighths of a mile in length, extending from Greenmount Avenue, under the bed of Hoffman street, to Belair avenue, crossing the latter avenue on an iron bridge eighteen feet above the level of the street. The road, after leaving Belair avenue, takes a southeasterly direction to Eager street, and thence through the centre of that street to the city limits; thence to connect with the Philadelphia, Wilmington and Baltimore railroad near the Bayview Asylum, and on the Orange farm, and thence in an almost direct line southerly to Canton, on tidewater. It is confidently expected that the road will be fully completed and in running order before the close of the present year.

New Jersey Southern Railroad.

We learn that the negotiations for the reorganization of the New Jersey Southern Railroad Company have been completed and that the new board of directors consists of George M. Bartholomew of Hartford; George P. Upton, Charles W. Huntington, and Thomas H. Perkins of Boston; George L. Dunlap of Chicago; A. W. Greenleaf, Stephen V. White, George W. Bentley of New York; Ashbel Green, Benjamin Williamson, Courtlandt Parker, John P. Stockton, Benson Van Vliet of New Jersey. Mr. Bartholomew was elected president. He is known as one of the ablest railroad men in New England. Mr. Geo. W. Bentley, the General Manager, has had a large experience in the management of railroads. The floating debt of the company has been funded, and the earnings of the road are largely in excess of the estimates and sufficient to insure the prompt payment of the interest on its funded debt, leaving a handsome surplus.

☞ At a meeting of the directors of the Erie Railway Company on the 26th inst., General Dix presiding, Edward H. Green was elected to fill the vacancy in the board occasioned by the resignation of Jay Gould. There was a small attendance, and no other business of importance was transacted.

☞ The Central Railroad Company of New Jersey has declared the usual quarterly dividend of 2½ per cent. on the full stock, and interest to the 31st instant on the new scrip at the rate of 7 per cent. per annum, both payable April 20, at the office of the company. No. 119 Liberty st.

☞ The financial agents of the Union Pacific Railroad furnish the following report of the business of January, 1872: Gross earnings $273,936 08; and expenses $379,741 71—making a net loss of $105,805 63.

☞ A bonus of $51,000 has been granted by the townships of Kinloss, Kincardine and Huron in aid of the Southern extension of the Wellington, Grey and Bruce Railway.

☞ The Hartford and New Haven Railroad Company has declared a quarterly dividend of $3 per share on each full share of stock, and $1 50 on each scrip share, payable April 1.

The Southern Maryland Railroad from Washington to Point Look Out.

It will be remembered that this Company was incorporated by the General Assembly of Maryland in 1868. No progress has hitherto been made to press the construction of the work, chiefly because the time had not arrived when this important link in the direct line to the great Cumberland coal mines could be made available for the transportation of coal to the most convenient point on tide water.

The near completion of the Metropolitan Road has attracted the attention of capitalists to the advantages presented by the Southern Maryland, Railroad, and we understand that a number of gentlemen of large means have recently purchased the stock of the company, and will without delay take measures to commence the work and press it to a speedy completion.

A meeting of the stockholders was held on Monday, at which 980 shares of stock were represented, being $980,000, and the following gentlemen were unanimously elected Directors for the ensuing twelve months; Col. S. S. Smoot, Hon. John Van Riswick, of Washington city; George S. Scott, R. J. Capron, Willis Gaylord, of New York; Alexandria Hay, of Pennsylvania; Arthur M. Eastman, of New Hampshire; Hon. B. G. Harris, Dr. John M. Broom and I. Mudd, of Maryland. William S. Huntington, Esq., of the First National Bank, was elected Treasurer. The Board of Directors will meet on the 29th instant to elect a President.

An act was passed by the General Assembly of Maryland on 30th of March, 1868, appropriating $173,000 to St. Mary's county to aid in the construction of a railroad to Point Lookout, and under this act Commissioners were appointed by Governor Swann to make a survey and estimate for its construction. Ten thousand dollars of this appropriation and one thousand dollars from the city of Washington were used to defray the expense of a preliminary survey. An able engineer, Mr. Benjamin Tippett, performed this service, and reported that the cost of the work would be about $15,000 per mile.

The Commissioners made a very able report to the Legislature of Maryland demonstrating the importance of the work to Washington city, not only because it will open to the markets of Washington a large exrent of country (no less than three counties, which have hitherto been almost inaccessible), but it will form an important link in the line of travel and transportation, by which passengers and freight to and from Washington and Norfolk can be carried in eight hours.

But its great importance is in connection with the coal trade from the Cumberland mines. In a very few years that trade has risen from less than 50,000 tons annually to about 7,000,000. The great channel for this coal is by the Baltimore and Ohio Railroad to Baltimore, thence by the Chesapeake and Delaware Canal to Philadelphia and New York. It is the greatest steam generator known, and is universally used by ocean and inland steamers when they can get it. A road has been completed, or nearly so, from the mines to New York, a distance of over 400 miles, while the distance from the mines to the southern terminus of the Southern Maryland Railroad is but some 180 miles, and as a point of distribution is so convenient and central that it must necessarily be the great depot of the United States for that trade. It will also undoubtedly become the great naval coal depot from which naval stations, North and South, and the Atlantic squadrons on their cruising ground can be readily, cheaply and promptly supplied.—*Washington Patriot.*

☞ The directors of the Buffalo and Jamestown Railroad Company, the New York branch of the direct road to Titusville, have elected the following officers for the ensuing year: President, M. Richmond; Vice-President, James Adams; Treasurer, Abraham Altman. It is stated that the project of a through road from Buffalo to the oil regions is now placed beyond a doubt.

A Canal in Texas.

The Houston (Texas) *Telegraph* says that a canal, modelled after the canals of Pennsylvania and other places, is to be constructed from Houston northwestwardly to Trinity, a distance of some seventy-five miles, crossing Hunting and Grice's bayous, and both forks of the San Jacinto river, striking the Trinity at or near a place called Smithfield. The average depth of the canal in the prairies is to be five feet with an additional two feet above the surface. All the streams crossed, including the San Jacinto forks, are to be dammed at the point of crossing, throwing a sufficiency of their waters into the canal, besides affording water power for immense sawmills to be built at the dams; the intention of these mills being to convert into lumber for Houston and West Texas the pines to be floated down the San Jacinto and Trinity from the immense pine forests in their vicinity.

The London Underground Railway.

A statement has been published showing the number of passengers conveyed and gross receipts in each year since the opening of the London Metropolitan (underground) railway. The first year, 1863, the number of passengers was 9,455,175; receipts, $508,535. In 1867 these figures had risen to—passengers, 23,405,202; receipts, $1,165,590. In 1872 the number of passengers was 42,765,427; amount of receipts, $1,980,390. For several years past the dividends paid on this line have varied from five to seven per cent.; but the past year, owing to extension of track, reduction of fare, and possibly extravagance in management, the dividend was only three and one-half per cent.

☞ The Pennsylvania Railroad Company has leased the Danville, Hazleton and Wilkesbarre Railroad, extending from Sunbury to Hazleton, 47 miles, for the term of thirty-three years, paying the interest of the company's bonds and what ever the road may net on the stock, in which the Pennsylvania Company is largely interested.

☞ The Titusville *Herald* says that orders have been issued for the construction of a double track on the entire line of the Philadelphia and Erie railroad, from Sunbury to Erie. The work is to commence in the spring, as soon as the ground is fit to work.

☞ At a meeting of the directors of the Worcester (Md.) railroad on the 18th inst., arrangements were made for raising the money necessary to complete the road at once. Operations will be immediately resumed. Only half a mile remains to be constructed.

☞ The imports at the port of Portland, Me., for 1871 were $18,766,100; exports, $19,655,426; total, $38,421,526. In 1870, the imports were $16,502,327; exports, $15,898,913; total, $32,401,240; increase over 1870, $6,020,286.

☞ Wm. R. Brown has been elected President, and H. C. Harris Secretary and Treasurer of the Atlantic, Fort Valley and Memphis Railroad company.

☞ The lease of the Ashtabula, Youngstown and Pittsburg Railroad to the Pennsylvania Railroad Company, has been ratified by the stockholders of the former nearly unanimously.

☞ In the case of Crane v. the Union Pacific Railroad Company, pending in the United States District Court for Iowa, on a motion to set aside the condemnation of lands for the use of said railroad, Judge Lane has rendered a decision holding that the eastern terminus of said road, as fixed under the existing laws, is not in Iowa, but in Nebraska; that it has no corporate power to build a road in Iowa, and cannot therefore condemn lands for a right of way or for the use of its road.

☞ The preliminary survey for a railroad from Oxford, Chester county, to Peach Bottom, on the Susquehanna, a few miles below Columbia, is being made. From the liberal manner in which subscriptions are being made along the line of the proposed route, it is thought that work will be commenced by the first of June.

☞ The Berks County (Pa.) Railroad Company have completed the location of the new route from Slatington by way of Germansville and Pleasant Corner, and have made a junction with the route previously located at New Tripoli This is an extension of the Wilmington and Reading railroad to the Lehigh coal region.

TALLOW LUBRICATOR.

MACHINERY OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.

The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.

The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.

The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

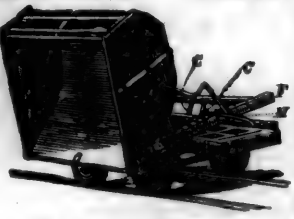

Fig. No. 1, Car Loaded & at Rest. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131

The New Line From New York to Chicago.

The projected railroad enterprise, by which facilities for transportation are to be increased, together with the probability of lower freight tariffs between the West and the Atlantic seaboard has assumed form and shape. The line in question is the Canada Southern Railway, which, commencing at Buffalo, or rather at the international bridge, runs thence west to St. Thomas, on the St. Clair river, a distance of 184 miles. The main road then continues Southwest from St. Thomas to Amherstburg on the Detroit river, making the total distance from Buffalo 229 miles. Its eastern connections will be by the New York Central, Erie, and Buffalo and Washington, the latter road forming connections with the Pennsylvania Railroad, thus opening a new line to Philadelphia, Baltimore and Washington. The western connections to Chicago will be over the Chicago and Canada Southern from opposite Amherstburg, and also by the Peninsula and Midland and Michigan Air Line Railroads from opposite St. Clair. The distance by this road between Buffalo and Chicago is said to be thirty-three miles less than by the Loop Line of the Great Western and Michigan Central; 45 miles less than by the Lake Shore Air Line, and 55 miles less than by the old line of the Michigan Southern.

TO INVESTORS.

A Standard Security

WE OFFER AT PAR AND INTEREST IN CURRENCY THE

7.30 BONDS

OF THE

NORTHERN PACIFIC RAILROAD,

principal and interest payable in gold, and holders exempt from United States tax.

They are issued in the following denominations: Coupons of $100, $500 and $1,000, Registered $100, $500, $1,000, $5,000 and $10,000.

The redemption of 5-20s by the Treasury indicates low rates of interest to the public creditors hereafter, and many holders are exchanging them for the 7-30 GOLD BONDS OF THE NORTHERN PACIFIC RAILROAD.

All marketable securities received in exchange.

Full particulars furnished by

JAY COOKE & CO.,

New York, Philadelphia & Washington.

FOR SALE BY BANKS AND BANKERS THROUGHOUT THE UNITED STATES AND CANADA.

Middleburgh and Schoharie Railroad.

At the annual election for Directors of the Middleburgh and Schoharie Railroad Company held in the village of Middleburgh, on the 25th ult., the following persons were unanimously elected Directors for the ensuing year: Daniel D. Dodge, Peter S. Danforth, Wm. H. Engle, Lyman Sanford, John A. Goewey, Jacob Neville, David Becker, John M. Scribner, Abram J. Freemyer, Grandisin N. Frisbie. Duryea Beekman, Erastus Cook, Abram Haines. Nathaniel Manning, Wm. B. Borst and Harrison A. Vroman were elected Inspectors of Election.

At a subsequent meeting of the Directors, the following persons were elected officers of the company for the ensuing year: President, Daniel D. Dodge; Vice President, Lyman Sanford; Treasurer, Peter S. Danforth; Secretary, Jacob Neville.

Prospects of the Foreign and Domestic Carrying Trade.

A number of circumstances have united, in the past two years, to give an extraordinary impetus to the carrying trade of the United States, both foreign and domestic. The commerce of the country, inland as well as by sea, has reached proportions of unequalled magnificence. For the last calendar year, the exports from the United States amounted to the enormous aggregate value of 538 million dollars in gold, of which 511 million dollars were made up of the products of the country. The imports for the same period aggregated 590 million dollars, leaving an apparent balance against us of 52 million dollars, which, no doubt, was made good with our evidences of indebtedness, Government and railway bonds, railway shares, and kindred securities. That no actual balance remains against us, is shown by the fact, that the export of gold during Jan. and Feb. was only $2,513,019—whereas in the corresponding period of 1870 the export of gold amounted to $6,171,277. For the fiscal year ending June 30, 1860, (the last year before the war) the imports into the United States were valued at 362 million dollars; over which those of the last calendar year show an increase of 228 million dollars, or nearly 63 per cent. The exports for the fiscal year ending June 30, 1860, were 400 million dollars, of which 378 million dollars were in products of the country. Over the total exports of the fiscal year ending June 30, 1860, those of the calendar year 1871 showed an increase of 138 million dollars, or 34½ per cent. Of course, the greater portion of this increase has taken place in the last five years. The imports of merchandize in 1871 were valued at more than 111 million dollars greater than those of 1870, and in the same period the value of the exports of the products of

the country showed an increase of 57 million dollars.

The rapidity of this increase in our foreign commerce, with which our inland trade has evidently kept pace, suggests the query, In all prudence, can it be maintained? It is, as we have stated, the result of many causes. The Franco-German war caused a pressing demand upon us for food at high prices, to which we were fortunately able to respond. The partial failure of the crops in the West of Europe has caused the demand for food to be maintained. We sold immense quantities of munitions of war to the belligerents. The crop of cotton for the season of 1869–'70 exceeded all estimates, and was taken by Europe at high prices. So much for our increased exports. The increase in our imports was largely of goods prepared for the continental markets, but shipped to us when those were closed against them. Again, the high rate of wages with us, and the general prosperity of the country, checked the home production of goods and at the same time caused a better demand for them. Besides, there has been a special demand for such costly foreign goods as pig and railway iron, tin plates, sugar, rice, wool, and some other articles. Hence, it is no difficult matter to account for our increased imports.

But circumstances which are now discovered in a review of the state of trade, admonish us that, during the early future, at least, there must be a pause to this growth, for these reasons: Wages have advanced in Europe and declined in the United States, so that they approximate more nearly on each side of the Atlantic. This tends to diminish the cost of domestic, and increase the cost of foreign manufactures, and of course to limit the importation of the latter. Great Britain, from which the bulk of our imports come, is now, and probably will be for some time, actively employed in supplying deficiencies and meeting a new demand growing out of the late war between France and Germany, which may so effect her supplies and prices as to greatly limit her shipments to us. General trade and mechanical employments are less prosperous than they have been; consequently we cannot absorb as many goods as we have done. The prospects for our exports are not more favorable than for our imports. It is already remarked on 'Change that we shall have very little flour and wheat to send abroad during the remainder of the crop year, while the prospects of the crops in the West of Europe are so good that probably not much will will be taken from us, except at very low prices. The agricultural development of the country has not kept pace with the growth of its towns and cities, and the natural tendency of this fact is to reduce our ability to export, and limit our necessity for imports.

In the meantime the rapid increase in our commerce has caused vast additions to be made to the means of transportation, developing in some cases an active competition for business. The prospects of the future are of the highest moment to these. We are no croakers. The development of the resources of the country, by means of railways, must go on, and our internal and foreign carrying trade must continue to be very great, but do not the facts which we have named suggest prudence? Do they not call for a husbanding of surplus means, and economy of management, in order that such a falling off in business as may reasonably be expected may yet leave a satisfactory amount of net earnings.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$1,292,184 93	$1,273,793 44
" freight	3,312,067 73	3,740,203 07
" express	92 827 18	84,949 42
" U. S. mail	55,529 63	74,050 54
" miscellaneous	96,795 42	105,913 76
	$4,849,404 89	$5,278,910 23
Expenses viz:		
Conducting transp.	$630,977 08	$722,652 30
Motive power	763,156 04	829 898 56
Maintenance of way	862,589 70	976,819 18
" cars	258,808 89	300,163 02
Taxes	161,697 46	117,767 97
General expenses	108,926 68	133,533 74
	$2,786,105 85	$3,080,824 77
Net earnings	$2,063,299 04	$2,198,085 46
Add balance to credit of income account, December 31, 1870		285,238 48
Total to be accounted for		$2,483,328 94
Disbursed as follows:		
Payments to first mortgage sinking fund		$52,000 00
Dividend March, 1871, 5 per cent,		567,475 00
Dividend September, 1871, 5 per ct.		567 530 00
Interest on income bonds		76,090 00
Interest on sinking fund bonds		20,650 00
Interest on 1st mortgage bonds		166,810 00
U. S. tax on dividends		21,092 88
Rent paid Joliet & Chicago R. R. Co		159,489 32
Rent paid St. Louis, Jacksonville & Chicago R. R. Co		240,000 00
Improvements in 1871, paid from earnings		121,525 93
Rental paid L. and M. R. R. Co.		11,645 00
Interest on St. Louis, Jacksonville and Chicago guaranteed bonds		32,060 00
Surplus, December 31, 1871		446,955 81
Total, as above		$2,483,328 94

The gross receipts from traffic exceed those of the preceding year $429,505 34, or about nine per cent. The net receipts show an increase of $134,786 42, or six and a half per cent. The operating expenses, (exclusive of taxes), amount to 56.13 per cent. of gross receipts; including taxes 58.86 per cent. During 1870 the operating expenses were 54.11 and 57.40 per cent., respectively. The President in his report says:

The increased ratio of operating expenses in 1871 is due, largely, to exceptional causes. In March the depot buildings and engine house at East St. Louis were destroyed, and considerable damage was done to other property of the Company, by a Tornado. In October Chicago was visited by a terrible conflagration, from which your Company suffered a loss in buildings and property destroyed, not covered by insurance, of about one hundred thousand dollars. The cost of repairs and replacements rendered necessary in each case is charged in the account of Operating Expense.

The receipts from Passenger Traffic are $18,391 49, less than in 1870. The number of passengers transported during the year was 715,662, a decrease of 16,869, or 2.3 per cent., compared with the preceding year. Of the whole, 94.6 per cent. traveled between local stations, and 5.4 per cent. were through passengers.

The average sum paid by each passenger, including through and local, was one dollar and seventy-eight cents.

The number of pieces of baggage entrusted to the agents of the Company by passengers, during the year, was 168,856 or about 450 per day. The amount of claims for lost, stolen and damaged baggage, during the year, was only $178 40.

We are happy to be able to add, that in no case during the year did any injury occur to a passenger upon your trains.

So many new lines of railway have been built during the last three years, intersecting and crossing your lines, that we now have competition at all important stations, but such is the character and basis of your traffic, that it is gratifying to be able to report an increased tonnage of freight transported in 1871, over 1870, of 19 per cent. The aggregate being 2 522,064,279 lbs. in 1870, and 3,002,991,752 lbs. in 1871.

The proportion between through and local freights being 10.46 per cent. of the former to 89.54 per cent of the latter.

The aggregate receipts from Freight Traffic show an increase of $428,135 34 or about 13 per cent.

The Coal Traffic upon your lines continues to increase. It commenced in 1865 with only 6,000 tons. It has increased to 338,324 tons in 1870, and 381,986 tons in 1871, or nearly 13 per cent. during 1871.

Your property has been, in all departments, fully maintained in first-class condition. Two thousand two hundred tons of steel rails, five thousand three hundred tons of new and re rolled iron rails, eighteen hundred tons of repaired rails, and one hundred and ninety-nine thousand two hundred and sixty-eight new cross-ties have been used in repairs and replacements of materials in the tracks.

Five and one-quarter miles of new side tracks, and nine miles of double-track, have been added during the year.

Experience proves that it is good policy to substitute steel rails, in the place of iron rails, where a heavy traffic occurs, and about twenty five miles of steel rails will be laid during the present year.

The whole number of Miles Run by Locomotives during the year was 3,359,997, or at the rate of 28,000 miles per annum for each engine.

The cost of motive power per mile run, compared with 1870, is as follows:

1870.		1871.	
Repairs	6.76 cents.	Repairs	6.45 cents.
Wages	6.61 cents.	Wages	6.54 "
Fuel	8.85 cents.	Fuel	8.00 "
Oil and waste	0.96 cents.	Oil & waste	0.85 "
Cleaning etc.	1.25 cents.	Cleaning etc.	1.26 "
	24.43 cents.		23 10 cents.

Showing a reduction of 1.33 cents per mile.

The number of miles run to a cord of wood, was 41 in 1870, and 45 in 1871. The amount of coal consumed per mile run was the same in each year, being 40 miles run for each ton.

The traffic of the present year will require an additional number of engines and cars. Twenty engines have been ordered for delivery during April, May and June.

Four first-class Passenger Coaches, ninety-four House cars, one hundred and five Combination Freight, and seven Drovers' Cars, have been added by construction at the shops of the Company, during the year. The number and description of cars upon your lines, at its close, may be stated as follows:

Pullman Palace Sleeping Cars	12
Pullman Dining Cars	5
Passenger Cars	51
Baggage and Mail Cars	14
Express Cars	8
Combination Freight Cars	105
House Freight Cars	1,414
Stock Freight Cars	297
Drovers' Cars	7
Platform Cars	639
Tool and Wrecking Cars	5
Paymaster's Cars	1
Total	2,658

The number of Locomotives owned by your Company at the close of the year, is One hundred and Twenty-five. Fifteen were purchased at the Schenectady Locomotive Works, and two built at the shops of the Company, during the year. One hundred and eleven are "coal burners," and fourteen "wood burners."

The condition of both Engines and Cars has been fully maintained, with the exception of 113 Cars burned at Chicago during the great fire of October 9th. Other cars are in process of construction to replace those destroyed.

The following summary, taken from the accounts relating to the Mileage of Cars, &c., will be found of interest:

Aggregate number of miles run by Chicago and Alton Cars, exclusive of Construction Trains	27,586,527
Average of each Car	11,740
Miles run by Loaded Cars on Chicago and Alton R. R.	19,470,695
Miles run by Empty Cars on Chicago and Alton R. R.	6,601,370
Total miles run	26,470,695
Ratio of Loaded to Empty Cars, about	3 to 1.
Miles runs by Chicago and Alton Cars on other roads	4,418,277
Received for use of Chicago and Alton Cars on other roads	$66,221 92
Miles run by "foreign" Cars on Chicago and Alton R. R.	3,302,445
Paid for use of "foreign" Cars on Chicago and Alton R. R.	$45,401 39
Difference in "foreign" Mileage in favor of Chicago and Alton R. R.	1,115,832
Difference in Mileage Account with other lines in favor of Chicago and Alton R. R.	$20,820,53
Average Earnings for Mileage of each C. & A. "Blue Line" Car	364 53

At the commencement of the year this Company was operating 511 miles of Railway, as follows:

	Miles.
Chicago to Joliet, (under perpetual lease)	38
Joliet to East St. Louis, (owned by your Company)	242
Dwight to Washington, with Branch to Lacon, (owned by your Company)	80
Bloomington to Godfrey—St. Louis, Jacksonville and Chicago R. R., (under perpetual lease)	151
Total	511

During the year it has constructed, and now owns, a line from Roodhouse, a point on the St. Louis, Jacksonville and Chicago Road, to a point on the east bank of the Mississippi River opposite Louisiana, in Missouri, a distance of 37.6 miles.

This line has been constructed in a very substantial manner, including an Iron Bridge, 1,209 feet in length (with a draw for the passage of boats), at the Illinois River.

It has been constructed upon the financial basis set forth in our last Annual Report, at a cost of $1,217,097. The franchise was obtained through the St. Louis, Jacksonville and Chicago R. R. Co., without cost to your Company, and under the terms of the contract that Company has issued its First Mortgage Bonds at the rate of $15,000 per mile, and its Second Mortgage Bonds at the rate of $5,000 per mile, to aid in providing a construction fund. The payment of the principal and interest of these Bonds is assumed by your Company.

Under the terms of the contract and lease agreed upon and executed by your Company and the Louisiana and Missouri River R. R. Company, as set forth in our last Report, 51 miles of the lines of that Company have been completed, from Louisiana to Mexico. Your Company has also purchased a Steam Ferryboat, with capacity for transferring an entire passenger train, or twelve freight cars, across the Mississippi River at one time.

These lines (from Roodhouse to Mexico) were opened for through traffic on the 30th day of October, last, making an aggregate of 599.6 miles operated by our Company during the last two months of the year.

The work of preparing the road bed for the iron on the lines of the Louisiana and Missouri River R. R. Co., from Mexico, West, and from Mexico, South west, to Jefferson City, has not been prosecuted as rapidly by that Company, as its contract requires. Track laying is now in progress on the latter line, and will be completed to Jefferson City early in the spring. It is due to the officers of that Company to state that the delay on their part has been occasioned by unexpected financial difficulties which, it is hoped, they will soon be able to surmount.

The line from Roodhouse to Mexico forms a connection between the lines heretofore controled by your Company and the St. Louis, Kansas City and Northern Railway (formerly North Missouri,) and the co-operation of that Company with yours enables us to form a through line between Chicago and Kansas City shorter than any other in operation.

Our experience during the few weeks that the through line has been in operation, has not been sufficient to form a very reliable basis for estimating future traffic, as the Mississippi River from Cairo, Northward, has been for a considerable part of the time obstructed by ice, so as to render the transfer of cars impracticable by ferry. We are, however, confident in the belief that the traffic of the "Louisiana Through Line" will be fully equal to our previous anticipations.

The operation of the several lines purchased and those leased, continues to show, in each case, by direct returns from traffic, and in many other ways, the importance of your control over them.

GENERAL BALANCES, DECEMBER 30th, 1871.

Due for supplies purchased in December		63,216 79
Due sundry persons and companies		16,529 13
Income account—balance December 30, 1871		446,955 81
		$18,998,048 53

President.—T. B. BLACKSTONE.

Directors.—Wm. F. Weld, John A. Stewart, Peyton R. Chandler,—Term of service expires first Monday in April, 1872. John Crerar, Lorenzo Blackstone, John J. Mitchell—Term of service expires first Monday in April, 1873. T. B. Blackstone, John B. Drake, D. Willis James—Term of service expires first Monday in April, 1874.

Secretary and Treasurer.—W. M. LARRABEE.

General Superintendent.—J. C. MCMULLIN.

Northern Pacific Railroad.

(From the *Money Market Review*, London.)

"In whatever way the Northern Pacific Railroad is regarded, whether as to executive management, route, resources, or business, it is a great enterprise of universal interest. The northern portion of the American Continent is rapidly becoming the bond of union between the trade of Asia and of Europe. Its railways, and especially the Northern Pacific Railway, will naturally command a great through traffic; and the local business will increase year by year with the development of the country. The line passes through one of the best wheat-growing regions in the world, and through districts teeming with many kinds of mineral wealth. These are the elements that attract population, and population implies industry, by which wealth is accumulated and distributed."

☞ The Montreal and Plattsburg Railroad will pay its first quarterly dividend of $1 50 per share, in cash, at the office of the Rutland Railroad Company.

Statistics of Commerce and Navigation.

The following is an abstract of the Report of the Bureau of Statistics, (now in press) showing the Foreign Trade of the United States for the the calendar year ending December 31, 1871, compared with the corresponding period of 1870:

	1870.	1871.
Imports	$486,821,818	$589,909,719
Domestic exports,(specie values)	453,875,722	511,186,000
Foreign exports	30,660,116	26,797,957

The value of foreign commodities remaining in warehouse December 31, 1871, was $68,941,253, as compared with $55,616,781, December 31, 1870.

The respective amounts of the imports and exports for the twelve months ending December 31, 1870 and 1871, which consisted of merchandise and of specie and bullion, were as follows:

1871.	Imports.	Domestic exports.	Foreign exports.
Mdze.	$572,510,304	$445,553,658	$14,788,829
Specie and bullion..	17,399,415	65,632,342	12,009,128

1870.	Imports.	Domestic exports.	Foreign exports.
Mdze.	$461,151,151	$387,779,405	$15,805,708
Specie and bullion..	25,670,667	66,096,317	14,854,408

Of the total imports and exports, the comparative values carried in American and foreign vessels, and in cars and other land vehicles, respectively, during the twelve months ending December 31, 1870 and 1871, were as follows:

1871.	Imports.	Domestic exports.	Foreign exports.
American..	$172,017,799	$172,044,460	$8,509,033
Foreign ...	401,892,186	383,040,525	15,849,295
Land vehicles	15,999,734	6,723,396	2,439,628

1870.	Imports.	Domestic exports.	Foreign exports.
American	$155,935,174	$183,001,794	$13,128,057
Foreign ..	323,503,702	321,006 706	16 200,033
Land vehicles	7,382,942	2,943,575	1,331,926

From the two preceding tables it appears that of the total amount of our foreign commerce carried by water, over sixty-nine per cent. was in foreign vessels during the calendar year 1871, as compared with sixty-five per cent. in 1870.

Vessels engaged in the foreign trade entered into and cleared from the United States during the twelve months ending December 31, 1870 and 1871:

	Entered.		Cleared.	
1871.	No.	Tons.	No.	Tons.
American..	11,058	3,798,861	10,864	3,768,978
Foreign ...	19,551	6,929,377	19,433	6,783,289
Total....	30,609	10,727,738	30,297	10,552,267

	Entered.		Cleared.	
1870.	No.	Tons.	No.	Tons.
American..	10,506	3,578,125	10,335	3,617,872
Foreign ...	18,701	5,621,865	18,646	5,557,517
Total....	29,207	9,199,990	28,981	9,175,389

The report contains several statements exhibiting the statistics of immigration into the United States during the quarter ending December 31, 1871, from which it appears that the total number arrived was 95,138, of whom 16,485 were passengers not immigrants, leaving the actual immigrants at 78,653, of whom 44,361 were males, and 34,292 females.

The total number of immigrants arrived during the twelve months ending December 31, 1871, was 346,938 of whom 204,728 were males, and 142,210 females.

☞ Hon. J. Porter, of Strong, Me., has been elected President, and P. H. Stubbs Clerk of the Sandy River Railroad Company.

Copper and Iron Business of Lake Superior.

The *Mining Gazette*, published at Houghton, Michigan, gives the following statement of the Lake Superior Copper Ore Product from 1845 to 1872:

	Tons.
1845 to 1854	7,642
1854 to 1858	11,312
1858	3,500
1859	4,200
1860	6,000
1861	7,400
1862	9,962
1863	8,548
1864	8,472
1865	10,791
1866	10,306
1867	11,785
1868	13,049
1869	15,288
1870	16,183
1871	16,071
Total	160,529

	Tons.	Lbs.
Houghton county	12,791	1,595
Ontonagon county	938	1,407
Keweenaw county	2,340	1,391
Total in 1871	16,071	393
Total in 1870	16,183	39
Decrease in 1871	111	1,646

Approximate statement of Ingot Copper produced and its value:

	Tons.	Value.
1845 to 1858	13,955	$9,000,500
1858	4,100	1,886,000
1859	4,200	1,890,000
1860	6,000	2,610,000
1861	7,500	3,337,500
1862	6,300	3,402,000
1863	6,500	4,420,000
1864	6,500	6,110,000
1865	7,000	5,145,000
1866	7,000	4,760,000
1867	8,200	4,140,000
1868	9,985	4 592,000
1869	12,200	5,368,000
1870	12,946	5,696,240
1871	12,857	6,171,360
Total	124,243	$68,528,600

Total amount of Ore and Pig Iron produced:

	Tons. Iron Ore.	Tons. Pig Iron.	Value.
1856	7,003	.....	$28,000
1857	21,000	.....	60,000
1858	31,035	1,629	249 202
1859	65 679	7,258	575,529
1860	116,998	5,660	736,496
1861	45,430	7,970	419,401
1862	115,721	8,890	984,977
1863	185,259	9,813	1,416,935
1864	235,123	13,832	1,867,215
1865	195,256	12,283	1,590,430
1866	296,872	18,487	2,405,960
1867	460,320	30,911	3,475,720
1868	493,290	36,425	3,676,760
1869	648,283	38,504	4,973,435
1870	856,471	47,848	5,839,804
1871	813,379	51,225	6,013,445
Total	4,582,074	290,885	$33,813,249

☞ A railroad is projected from Montpelier to Barre, Vt. The Vermont Central management have proposed to the Barre people that if they will give $50,000, and raise $50,000 more on a guarantee of 7 per cent. per annum, the road shall be built at once. The proposition has been accepted, and the money nearly all raised. The contract is to be closed this week.

The Goat Island Terminus Scheme.

The following article from the Sacramento *Daily Record* gives the railroad view of this question:

The San Francisco opponents to the Goat Island terminus scheme have, in their anxiety to make some capital, placed themselves in a position very hard to defend. At the outset of the controversy they relied chiefly upon the assertion that the building of a solid bridge from Oakland to Goat Island would injure the bar at the mouth of the harbor by obstructing the flow of the tides. When they were reminded that the bill before Congress called for an open and not a solid bridge, they sought to maintain that even piling would injure the bay. This was too feeble an argument to hold good for any length of time, and now they boldly throw themselves back on the assertion that the terminus ought not to be at Goat Island, because it will take money out of the pockets of the wharfingers and middlemen! This is, in effect, the latest argument of the organ of the warehousemen, the *Alta*, and it is of a piece with the short sighted policy which the business men of San Francisco have made themselves notorious by.

San Francisco is so situated geographically that it is very difficult to approach her by railroad from any part of the State. Her position is, in fact, almost as disadvantageous as that of a commercial city could well be. Under the circumstances, common sense should have demonstrated the necessity of removing every removable hindrance to commerce and navigation. When the Spartan soldier complained that his sword was too short he was told to "add a step to it." That is the principle that should have actuated the people of the metropolis. Their sword was too short, but they could have made it serviceable by adding industry and extra enterprise to it. Instead of this, however, they cast about to increase the difficulties which nature had enveloped them with. As it was, no railroad could approach them closely; but they said, we will make our wharves a rich source of revenue. We will stand at the Golden Gate as the robber barons of the middle ages stood in their castles and towns, and will exact heavy toll from all the merchandise that passes. This has been nearly all the policy that San Francisco has ever had, and on the strength it she assumes a right to dictate to the State, and even to the nation, as to the terminus of the Pacific railroad. Just as long as the farmer who grew the grain in the interior, and the shipper who transported it abroad, were compelled by the lack of other accommodation to pay toll at the San Francisco wharves, just so long were those exorbitant tolls maintained, in defiance of reason, justice, and commercial policy. The people there believed they had a monopoly, and that the business must come to them under any circumstances. So they poohpoohed all remonstrance, continued to charge tremendous rates, scarcely took the trouble to keep their wharves in decent repair, and brought themselves into discredit at home and abroad.

For many years they had things all their own way. There was none to molest or make them afraid. The ships had to come them; the grain had to come to them. They grew rich, and became still haughtier and less reasonable. Of course the managers of the Pacific Railroad desired to make the terminus of the great transcontinental line in the chief city of the coast, and naturally it was supposed that San Francisco's own interests would induce her to facilitate this enterprise. But San Francisco was not to be taken by storm in that way. She had grown up in the belief that she was born with a golden spoon in her mouth, and that her future was secured beyond any possible rule. So her Chamber of Commerce and other soap-peddling incapables gathered together and resolved that, as the railroad was bound to come into the city eventually, whether the company wanted to or not, it was not advisable to give them any special facilities, but rather it might be policy to snub and put them

off. In accordance with these suggestions the city put off the matter as long as it could, and at last, very ungraciously and with much grumbling, appropriated to the use of the company a tract of sixty acres, which was in the first place completely cut off from the water front, and was secondly so mangled by streets and alleys as to be virtually worthless for depot purposes. The company put up with the slight as well as it could, and proceeded with its business. In the course of time it became evident that large depot accommodations must be had somewhere, and a considerable parcel of land was obtained in Oakland. As, however, the freight continued to pass through the hands of the San Francisco wharfingers, they made no objection to what was going on, nor did they take alarm until it began to appear that the result of their greed and shortsightedness would eventually be to drive not only the railroad, but the railroad business away from their hands. Then commenced the howl of alarm which has been echoed through the columns of the *Alta*, and which has finally found expresson in a bitter complaint of the injustice of a scheme which proposes to stop the extortionate charges of these commercial harpies. It is impossible to feel any sympathy for such men. They have not yet sense enough to see that commerce will never consent to be bound in their selfish shackles, but that the shipping must and will go where the charges are lightest and the facilities greatest. It matters nothing to the State that a few hundred men who have gained a living as agents, by taking tolls from the farmer and the shipper, should lose their occupation. But it matters everything that the producer and the consumer should be afforded the most perfect facilities for commercial transactions, and that is what is aimed at in the Goat Island grant. The grant is in the interest of the State and nation, as against a small clique of middlemen in San Francisco.

Iron in the United States.

Mr. Henry McAllister, Jr., Secretary of the American Iron and Steel Association, having their office in Philadelphia, has completed his report for the last year. It contains a review of the history of the iron manufacture in the United States, and discusses the tariff question. It also contains numerous statistical tables, showing the production of the various kinds of iron. From these tables, it appears that the production of anthracite pig iron, in 1871, in the Lehigh region, was 372,000 tons, the product of 43 furnaces, many of which were out of blast during a considerable part of the year. The production of the furnances in the Schuykill region, during the same time, was 157,305 tons. The furnaces from Harrisburg down along the Susequehanna made, in 1871, 143,777 tons, and above Harrisburg, 90,600 tons The whole production of anthracite pig iron in the United States, in 1871, was 957,608, of which Pennsylvania made 714,700 tons. The production of raw bituminous coal and coke pig iron was 570,000 tons, and of charcoal 385,000 tons, making the total production of pig iron in the United States 1,912,608 tons. The utmost present annual capacity of the blast furnaces of the United States is estimated at about 2,500,000 tons.

The total production of rail in the country in 1871 amounted to 775,733. Of this amount, 715,691 tons were iron and 60,042 tons steel and steel headed. The following statement shows the localities in which these rails were manufactured:

State.	Tons.	State.	Tons.
Pennsylvania	335,604	Maine	13,383
Illinois	91,178	Indiana	12,778
New York	87,022	Tennessee	9,667
Ohio	75,782	Missouri	8,200
Maryland	44,941	New Jersey	6,700
Wisconsin	28,774	Georgia	7,840
Massachusetts	28,864	West Virginia	5,000
Michigan	14,000	Kentucky	6,000

The reports received from the rail mills indicate that a large number were in operation during a part of last year only. There are forty-eight rail mills in the country, and their utmost capacity is placed at about 1,000,000 tons.

During 1871 the rails imported amounted to 572,386 tons, making the total consumption in the United States 1,348,119 tons. The product of the forges and bloomeries of the country amounted to 63,000 tons in 1871—about 10,000 tons below the average of the last ten years.

The following table exhibits the amount of pig iron produced in the United States in tons of 2000 pounds during the past eighteen years:

Year.	Anthracite.	Charcoal.	Raw Bitum. Coal & Coke.	Total.
1854	339,435	342 298	54,485	736.218
1855	381,866	339,922	62.390	784.178
1856	443 113	370,470	69,554	883,137
1857	390,385	330,321	77,451	798,157
1858	361.430	285,313	58.351	705 094
1859	471,745	284.041	84 841	840,627
1860	519,211	278.331	122 228	919.770
1861	409,229	195 278	127,037	731.544
1862	470,315	186,660	130,687	787,662
1863	577,638	212,005	157,961	947,604
1864	684,018	241,853	210,125	1,135,996
1865	479,558	262,342	189,682	931,582
1866	749.367	332,580	268,396	1,350,343
1867	798.638	344,341	318,647	1 461,626
1868	893,000	370,000	340,000	1,603.000
1869	971,150	392,150	553.341	1 916,641
1870	930,000	365,000	570,000	1 865 000
1871	957.608	385,000	570,000	1,912,608

The production of rolled and hammered iron other than rails in 1871, is estimated as follows: Merchant bar and rod, 330,000 tons; sheet and plate, 118,000 tons; hoop, 22,000 tons; nails and spikes, 155,000 tons; axles and others, 80,000—making a total of 700 000 tons. The product of steel is estimated at 82,000 tons, of which 45,000 tons were made by the Bessemer process.

Whitehall and Plattsburg Railroad.

The friends of this enterprise have been both patient and persevering. Men of less pluck would long since have given up in despair. But, believing in the necessity and practicability of the work, they have continued to hope, until now there is every probability that their efforts are to be speedily crowned with success.

We noticed a few days since the selection of a Board of Directors to prosecute this work, who have the energy and means to accomplish whatever they undertake. And on Wednesday last the Assembly complied with the request of Mr. Tobey and his associates from the counties directly interested, and passed the bill re-appropriating an unexpended balance of $70,000 to aid in the construction of the road. The unanimity with which this bill was passed indicates the interest felt in the work by the representatives from other sections who have been more fortunate than the counties through which this road is to run, in securing favors from the State. It was a right thing courteously done. This appropriation is a dividend on the hundreds of thousands of dollars which Washington, Essex, Clinton and Franklin counties have paid to enrich other sections of the State.

As a further guarantee of the early consummation of this long deferred enterprise, its completion is necessary to secure the northern outlet desired by the Delaware and Hudson Canal Company. That company has possession of the Albany and Susquehanna and the Rensselaer and Saratoga roads. When Whitehall and Plattsburg are united by railroad, not only will the iron mines of our northern counties be tapped, but this enterprising company will have a through connection, at all seasons, with the neighboring Province.

As we understand it, this "new departure" of the through road will not necessarily interfere with the present cut-off to Rutland. That outlet—which became a necessity to the people benefitted by it because of the delay in pushing forward the more desirable through line—will remain intact; but this greater enterprise will become the chief avenue of trade and travel between the St. Lawrence and the Atlantic border.

We congratulate our northern friends upon "the good time coming" to them. They have rapidly advanced in material prosperity in spite of their isolation. When this road shall be completed, it will give a new impetus to their industry by ensuring free access to their inexhaustible mineral wealth at all seasons.—*Albany Journal, March* 30.

Interest on the Virginia Debt.

General Asa Rogers, second auditor of Virginia, has issued a circular containing the following explanations of the acts passed at the late session of the General Assembly, in relation to the payment of interest on the public debt:

It will be seen, therefore, that upon the bonds issued under the funding act of March 30, 1871, two per cent. interest on the six per cent. stock, and one and two-thirds per cent. on the five per cent. stock will be paid for January 1 and July 1, 1872, and upon the principal of the registered and coupon stock, not funded, under the provisions of the funding act, the same rate or proportion will be paid upon two-thirds of such stock.

The amount paid on coupons and registered stock not funded, will be stamped on the coupons and certificates, and they will be returned to the owners. Hence the certificates referred to must be presented here.

The interest will be paid upon the new registered bonds to the party in person, or to his order, without presentation of stock here. No interest will be paid on fractional certificates. No certificates for balance of interest unpaid on registered stock will be issued, but it will stand credited on register.

No interest can be paid upon arrears of interest due, until parties fund it under the act of March 30, 1871.

The funding of stock under said act will continue, with the omission of the words "receivable at and after maturity, for all taxes, debts and demands due the State," on the coupons.

Parties may fund into registered stock at once, but coupons bonds will not be prepared for issue till about the 25th of April.

The payment of interest at this office will commence on the 1st of April.

Finances of Pittsburg.

The gross receipts during the year ending January 31, 1872, (including the balance in the Treasury January 31, 1871, and receipts from the sale of Water bonds.) were $1,278 534 20; and the disbursements for the same period, including water extension, were $1,190,151 14—leaving a balance in the Treasury, February 1, 1872, of $88,351 14. The following is a summary of the liabilities of the city:

Old municipal bonds	$184 800 00
Lawrenceville bonds	31,652 86
Fifth Avenue market property bonds	65,000 00
Fifth Avenue market bonds	25,000 00
Pittsburg, Farmers' and Mechanics' Turnpike bonds	40,000 00
Old Railroad bonds, uncompromised	68,000 00
Water extension bonds	954,900 00
Funded debt bonds	500 000 00
Compomise railroad bonds and scrip	2,157,456 21
Floating	10 316 50
	$4,042,126 57

☞ The Albany (Ga.) *News* says that the business of the Brunswick and Albany Railroad is rapidly increasing, and strong hopes of its early completion are entertained by the friends of the enterprise. Daily trains are now run between Brunswick and Albany, a distance of 172 miles, and although the amount of travel is limited the transportation of lumber is enormous.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday April, 6, 1872.

Stock Exchange and Money Market.

A brisk speculative inquiry, has been noted for Money since our last, particularly through the later days of the week under review. The offerings from all sources have been on a restricted scale, influenced, in part, by manipulations of the supply, in the interest of operators for a lower range of values at the Stock Exchange, where the dealings have been very extensive, well distributed, and indicative of decided buoyancy on the general list, notwithstanding the Money pressure, which the remarkable activity in stocks contributed to augment. Call loans have been quoted all the way from 7 per cent. currency to the more prominent Government houses, to 7 per cent. gold, and additional commissions of $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{8}$, $\frac{1}{4}$, and even as high as $\frac{3}{8}$ths of one per cent. per day, to borrowers on Railway and Miscellaneous share property. In the way of discounts, there has been a slow movement with choice to good business paper rated at from 8@12 per cent. per annum. The city bank statement for the past week showed a conservative movement, in the averages. The U. S. Sub-Treasury office reduced both its coin and currency reserves. The city banks reduced their loan and discount average nearly a million during the week, while slightly augmenting their outstanding circulation. The U. S. Sub-Treasury reduced its currency balance nearly 1⅜ millions. It also made a slight reduction in its coin reserve. Its currency balance at the close of business on Tuesday was $4,280,446, and its coin reserve, $68,956,424.

The city banks, in their latest return, show a reduction of $968,600 of legal tender notes, with an increase of $1,948,100 of specie, and a loss of $658,200 of deposits; also a decrease of $994,100 in their loan and discount averages, and an increase of $1,100 in their item of circulation. The city bank exchanges, last week, averaged $109,973,376 and thus far, this week, about 132 millions daily. The banks now hold $5,464,850 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $21,384,700, against $17,975,692 same time last year. The city bank deposits are now $203,058,800, against $222,138,026 week ending April 1, 1871. The legal tender reserve amounts to $41,649,700, against $53,270,543 same time last year. The circulation now stands at $28,019,400 against $31,575,789 same time last year. The loans are now $276,767,400 against $291,082,927 at this date last year.

The coin reserve of the city banks is now about 21⅜ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 41⅝ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $1,600,936, and its coin reserve $93,772 as the result of the week's business. The receipts of the office were $5,334,012 in coin, and $2,848,226 in currency; payments, $5,427,794 in coin, and $4,449,162 in currency. The office received $4,358,000 in coin or its equivalent, from customs; and disbursed $8,134 of coin interest. The receipts of the office from all sources in March were $59,026,588, including $14,388,874 from customs; payments, $65,648,058, including $3,912,579 of coin interest.

The outstanding circulation of the U. S. Treasury is $400,729,678.

The Secretary of the Treasury has called in $1,750,000 of the three per cent. temporary loan certificates of the date of August 1, 1868. The following are the denominations: $5,000, Nos. 3,520 to 3,615; $10,000, Nos. 3,496 to 3,780. Interest will cease on the above certificates May 31, 1872.

Government revenues have made a fair yield since our last. The excises yielded about 2⅛ millions, and thus far since July 1, 1871, $96,364,665. The customs at the port of New York, last week were $4,286,940; at the outports, equal to about $1,400,000 more, all in coin, or coin certificates.

Speculation in Gold has shown more animation with a wider range of the price, though the later dealings indicated a less confident temper on the part of operators. The very heavy purchases of Stock for European account has been sensibly affecting the price of Gold and rates of Exchange,

The customs demand for coin has been fairly active. The export movement has been moderate,

The range of the price during the week has been from 109⅞@110¼ and the closing quotation on Wednesday was 110 against 110¼ the preceding Wednesday. The specie outflow, last week, was $609,196. The Gold Exchange Bank clearances have averages about 35 millions per day during the week.

The customs demand for Gold last week, averaged $726,334 a day; thus far, this week, it has averaged $676,000 a day, or equal to a weekly aggregate of $4,056,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $25,595, and since Jan. 1, 1872, $560,805 against $2,777,007 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $120,385,925 against $112,053,979 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to March 30, 1872, $62,117,154, against $66,600,604 same time in 1870-'71.

The export drain of specie was $609,196 last week, against $742,831, same week preceding year. The shipments since July 1, 1871, have been $27,914,906 against $55,523,683 same time in 1870-'71.

Under the Treasury programme for April, Government propose to sell four million of Gold as follows: Thursday, April 4—One Million; Thursday, April 11—One Million; Thursday, April 18—One Million; Thursday, April 25—One Million. And to buy in Four Millions of U. S. bonds as follows: Wednesday, April 3—One Million; Wednesday, April 10—One Million; Wednesday, April 17—One Million; Wednesday April 24—One Million.

Foreign Exchange closed firmly on a better supply and moderate call. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, 110@110⅛.

The produce exports from this port, week ending with April 2, were to the currency value of $3,595,198.

Government securities have been in good investment demand and firmer as to price, influenced, in part, by the last public debt exhibit, which indicated a further liquidation of $15,481,969 in May.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅝@115⅞; U. S. Five-Twenties of 1862, (other than the bonds called in) 112½@112¾; U. S. Five-Twenties of 1864 at 112½@112¾; U. S. Five-Twenties of 1865, 113⅛@113⅜; U. S. Five-Twenties of 1865 consolidated, 111½@111⅝; U. S. Five-Twenties of 1867, 112⅞@113; U. S. Five-Twenties of 1868, 113 113¼; U. S. Ten-forties at (ex March coupon) 108¼@108½; U. S. Fives of 1881 (Funding Loan) 110@120⅛. Six per cent. currency bonds, 115¼@115½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 20.	Mar. 27.	April 3.
Consols.....	92⅞	93⅛	93⅛
U.S. 5-20's of 1862..	92⅜	92⅜	92¼
U. S. 5-20s, 1865....	93½	93¾	94
" 1867	93½	93¾	93⅝
" 10-40s	89½	89½	89¼
Erie	44⅛	54½	54

State bonds have been in more demand, at however, irregular prices.

A good demand prevails for the better class of Railway Mortgage bonds, with prices quoted for the favorites of the older issues, which are offered with reserve. Central Pacific Sixes have been readily taken, for investment, at 101⅝@101¾. Chesapeake and Ohio Sixes have been in good request at 94 per cent. and accrued interest.

There has been a remarkably spirited and buoyant movement in Railway and Miscellaneous share property, since our last, despite the stringency in the Money line. The investment purchase of stocks on home and foreign account have been unusually large. The later dealings showed an irregular and less confident temper in the general market.

Business in domestic produce has been moderately active, and with Breadstuffs, Provisions, Naval Stores, and Petroleum, quoted variable in price. Middling upland cotton closed on Wednesday at 23⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,431,862 bales, against 3,338,812 bales same time in the preceding year; exports 1,546,561 bales against 2,260,503 bales in the previous year; stock at the ports at latest dates, 422,490 bales against 614,695 bales same date 1871.

In the Metal trade, the advantage as to price has been decidedly in favor of sellers, on an unusually urgent inquiry, for the leading articles. Ingot Copper has been in brisk request, mostly for forward delivery at buoyant prices; sales have been reported of 5,000,000 lbs., chiefly for Summer delivery, within the range of 32c.@34c., with prompt deliveries quoted at 40c. asked. Iron has been in good demand at advancing rates; sales 800 tons Glengarnock Pig, part at $52 on the spot, and part to arrive on private terms; 120 tons Eglinton Pig at $52, now held as high as $55; 350 tons No 2 American, and 800 tons Gray Forge on private terms; 250 tons Wrought Scrap from yard to a dealer, at $60. Lead and Spelter quiet, but firm. Pig Tin has been actively sought after, and 3,000 slabs Straits have been placed, on private terms, closing with 40c., gold, as the current quotation, and 39½c.@40c., gold, for English. Tin plates have been in lively demand at rising price; sales, 10,000 boxes at $13@$13 50 for I. C. Charcoal; $10 75@$11 for Charcoal Terne, and $11@$11 25 for Coke Terne, all gold rates. There has been inquiry for Sheet Zinc, of which 350 casks were sold, deliverable through the season, on private terms.

At the Live Stock Markets, Beeves have been in fair demand at 10@13½ cts.; Veals at 5@10 cts.; Sheep at 7½@10½ cts. Swine, dull at 4¾@5 cts. per lb., all live weight. The week's receipts were 8,205 Beeves, 1,627 Veal Calves, 15,627 Sheep and Lambs; and 27,154 Swine.

Foreign goods have been more sought after at fairly supported prices. The week's imports of foreign goods reached the amount of $9,641,944 including $2,207,507 of dry goods.

Ocean freights have been less active and rates have been quoted unsettled and lower, particularly by Steam to British ports.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

BANKING-HOUSE OF
FISK & HATCH,
No. 5 Nassau-st., New York.

We are selling the CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS—a first-class investment security—at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100, registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin.

Descriptive pamphlets, with full information, furnished on application.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS at their current prices.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

THE
St. Joseph & Denver City
RAILROAD COMPANY'S
First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,
BANKERS,
NO. 11 WALL STREET.

THE
CANADA SOUTHERN
RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund
30 Years
7 PER CT. GOLD BONDS
AT
90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

Journal of Railroad Law.

RAILROAD COMPANIES—RULE OF DAMAGES—EFFECT OF WRITTEN CONTRACTS—RULE OF EVIDENCE AS TO EXPERTS—MARKET PRICE OF GOODS DAMAGED AND NEWSPAPER QUOTATIONS.

The facts of the late case of The Cleveland and Toledo Railroad Company *vs.* Perkins, (17 Mich. 296,) are as follows:

The defendant in error sued the railroad company to recover damages caused by an alleged unreasonable delay on the transportation of cattle, received by them at Toledo, to be transferred to Cleveland, and destined to New York.

The jury rendered a verdict for plaintiff for $555.

The cattle were received on the 12th of February. On the 14th of February following, duplicate contracts were executed for their transportation, and one was delivered to Perkins; each party signing his own contract, but the cattle were not forwarded until the 16th of February.

The following is the able opinion of the court delivered by

Cooley, Ch. J.—Of the exceptions appearing in the record, we shall notice those only which are relied upon in the brief for the plaintiffs in error.

First: That the Circuit Judge erred in allowing the contract held by Perkins to be read in evidence, before the duplicate, in the hands of the railroad company, had been produced, or its absence accounted for. This we think not well taken. The contract signed by the company was delivered to Perkins as the evidence of their undertaking and liability; and there is no occasion for him, when he is seeking to enforce their obligation, to call for the production of the corresponding evidence which he has put into their hands to be used, when needful, against him. If proof of the duplicate could have been important to the defendants, they were at liberty to make use of it, and, as the action was based on the contract, it is to be presumed their evidence of it was present at the trial; but its production was no necessary part of the plaintiff's case.

Second: That proof of delay on the part of the railroad company, before the signing of the written contract, was inadmissible. This objection is on the theory that the written contract merges all prior negotiations, as well as the implied contract which the law would raise from the reception of the cattle for transportation.

Undoubtedly the writing is to be the measure of the company's liability from the time it was given; but there is nothing in its terms which purports to waive any claim to damages which might have occurred in favor of Perkins previously. When the company received the cattle for transportation, they impliedly undertook to transport them safely, and without unreasonable and unnecessary delay; and this implied contract remained in force until the parties substituted a written one, and it must measure the rights of the parties up to that time. To hold that, because the company were in the practice of carrying only under written contracts, they might delay indefinitely, without liability, after the receipt of the cattle, until they saw fit to give a written contract, would be to advance a doctrine without basis in reason or justice. The custom does not preclude implied or oral contracts, for the parties may vary from it in any case; nor does it make the written contract, when given, relate back to the reception of the cattle; its effect is only to govern the obligation of the parties from the time of its execution. We are referred to the case of M. S. and N. I. R. R. Co. *vs.* Shurtz, 7 Mich. 515, as authority that, up to the execution of the writing, the cattle were simply in the hands of the company, awaiting shipment. But the two cases differ entirely in their material facts. In Shurtz's case the property was stored with the company, awaiting the orders of the owner for transportation; but in the case at bar, the property was delivered to the company for immediate transportation; and whatever delay occurred, whether reasonable or unreasonable, was against his will.

Third: That the court erred in allowing the witnesses to testify to a knowledge of the New York market derived from the newspapers. This objection is met by the decision of this court in Sisson *vs.* Cleveland and Toledo R. R. Co., 14 Mich. 497. That case does not require that the newspapers themselves should be put in evidence, but it recognizes them as a proper source of information to which persons interested in the markets may resort; and there is no reason why they should not testify the result of their examinations, as they might the result of inquiries in the market places. These remarks appear to cover the ground taken in the brief of the plaintiff in error. Something is said about one car load of cattle transferred to Perkins by another person after they had been received at Toledo; and in regard to which, the judge was asked to charge the jury that the company was not liable for any delay until the transfer was actually made on their books. This he declined, but did charge them that the company was not liable until actual notice was received of the transfer. The brief assumes that notice of the transfer was not given to the company until the written contract was entered into, but the record shows that the written transfer was made on the company's books the day before. The liability of the company, however, could not depend on the plaintiff's ownership appearing by their books; if they had notice of it, that would be sufficient. We discover no error in the record, and the judgment must be affirmed.

Judgment affirmed.

Metropolitan Branch Railroad.

This work is being pushed forward to completion as rapidly as circumstances will permit. From the best information we can get we see no reason to doubt that the road will be in running order some time during the coming summer. It is difficult to estimate the local advantages the completion of this road will afford. There is a very large quantity of waste land in our county, farmers not being able to cultivate the large farms which they own, owing to the disorganized and demoralized state of labor. The completion of this road will open up the country and allow land owners to dispose of their surplus acres to great advantage, thereby increasing the population and wealth of the country, as well as adding to the value of the land they may still retain. They can also have the advantage of the Baltimore market, while they are now almost exclusively confined to the markets of Washington and Georgetown. The facilities of getting fertlizers will be greatly increased, and especially as far as lime is concerned. It is conceded by all that lime is the one thing needful for the lands of this county, but it is impossible to get it now, the cost being too great, but when it can be brought by railroad within a convenient distance great quantities will be used, and the most beneficial results may be expected.—*Rockville Sentinel.*

Panama Railroad.

At the annual meeting of the stockholders of this company on the 1st inst., the following gentlemen were elected directors for the ensuing year: Henry Clews, Alex. Masterton, Fred. Billings, F. W. G. Bellows, A. B. Stockwell, L. A. Stockwell, W. H. Aspinwall, David Hoadley, F. Skiddy, D. D. Smith, J. Parmely, G. L. Kingsland, H. H. Baxter.

The following report, announcing a dividend of five per cent., was read:

To the Stockholders of the Panama Railroad Company:—

The directors take pleasure in reporting that the net earnings of the road since the last dividend was declared (January 1, 1871.) have been as follows:—

For the year ending January 1, 1872..	$245,661 65
For the quarter ending April 1, 1872.	175,561 74
	$421,223 39

Out of these earnings a dividend of five per cent. has been declared, payable April 8th.

The cash assets of the Co. amount to..		$850,023 00
From which deduct—		
Dividend, payable April 8th..	$350,000	
Interest, due April 10th.....	100,000	
Due government of Colombia for subsidies....	105,000	
		555,000 00
		$295,023 00
In addition the company owns five steamers in the Central American trade, with steam tugs, launch, &c., in Panama, worth, at a moderate valuation....		$900,000 00
Real estate in the city of Panama, and one-half of islands in the bay of Panama, cost		78,000 00
Vacant lands on the Isthmus, about 300,000 acres, of uncertain value.		

The road is in good order and fully equipped. The directors congratulate the stockholders on the improvements in the business and prospects of the company. From the opening of the overland railroad our receipts declined rapidly, until the latter part of 1870 and commencement of 1871, when they were barely sufficient to cover the working expenses, subsidy and interest. The loss was almost entirely on the California branch of our business. There was a moderate loss caused by the opening of the Magellan line, which was about balanced by a gain in the Central American trade.

To meet the loss on California business referred to, special efforts were made to divert shipments from sailing vessels, especially from England and the Continent, going around Cape Horn, reduced tariff's of through rates were adopted and new agents appointed. As a result our receipts have gradually increased, so that the first three months of 1872 amount in gross to $427,286, against $271,000 for the corresponding months of 1871, and this without any great help from the diversion of California goods to the Isthmus caused by the "snow blockade" on the Union Pacific road. This result would have been still more favorable had not the China trade, which was becoming important, been cut off in the fall of 1870, by the arrangement of the Pacific Mail Steamship Company, under which all these shipments were turned to the overland road. In the matter of diverting goods from sailing vessels by the Horn route there is still a wide field for effort. There are at the present time a larger number of connecting lines running to the Isthmus ports than ever before. They comprise the following:—

AT ASPINWALL.

North German Lloyd, from Bremen, one steamer each month.

Hamburg-American Company, from Hamburg, one steamer each month.

Compagnie Generale Transatlantique, from St. Nazaire, two steamers each month.

Royal Mail Company, from Southampton, two steamers each month.

West Indies and Pacific Company, from Liverpool, two steamers each month.

Pacific Mail Steamship Company, from New York, two steamers each month.

AT PANAMA.

Pacific Steam Navigation Company, from Valparaiso and intermediate ports, four steamers each month.

Compagnie Generale Transatlantique, from Valparaiso and intermediate ports, one steamer each month.

Central American ports, three steamers each month; parts of the year, four.

Pacific Mail Steamship Company, from San Francisco, two steamers each month.

Some of the lines propose adding to their service during the coming year.

To encourage emigration to California and other ports on the Pacific low rates of fare for steerage passengers have been adopted, in connection with the various steamer lines.

Arrangements have recently been made to extend the Central American line (which is owned by the company) to five ports in Mexican States north of Guatemala, the Mexican government having granted the company a favorable contract, with subsidy of $30,000 per annum.

During the past winter the trustees of the sinking fund have paid out of their fund, sterling bonds to the amount of $958,875. The amount of bonds now outstanding is £578,150, or $2,890,750, none maturing earlier than 1897, excepting the small amount of £19,350, which falls due in 1875. The trustees of the sinking fund still hold securities to the value of $325,000, which, with accumulations and moderate annual appropriations, will retire all the bonds at maturity.

Although, from causes beyond their control, the stock of the company has, within the past three years, undergone a severe and painful revulsion, yet the directors—some of whom were connected with the inception of the enterprise—cannot but look back with pride and pleasure to the fact that since the organization of the company, in 1849, $20,000,000 have been returned in dividends to the stockholders. While no such exceptionaly profitable results can now be looked forward to, yet the directors cannot but hope that there is still a future of fair remuneration to those interested.

JOSEPH F. JOY, *President.*

NEW YORK, *April* 1, 1872.

Pork Packing in Milwaukee.

The following is a statement of the business done in Milwaukee for the season of 1871-'72, in comparison with the eight preceding seasons:

	No. of Hogs.	Average weight per Hog.	Average Lard per Hog.	Lard, lbs.
1871-'72	313,118	222 86-100	39 1-8	12,252,244
1870-'71	240,344	226 1 8	33 1-4	7,992,602
1869-'70	172,626	199 1-5	26 3-8	4,554,902
1868-'69	129,094	211	30 4-5	3,971,516

1864-'65	107,229	196 7-8	23 5-8	2 514,812
1863-'64	141,091	202	17 1-8	3,791,185

☞ A despatch from Rondout says: "The first crossing over the Rosendale Railroad bridge (150 feet high) will take place on Saturday, when two large passenger trains will cross at once. Excursion trains will be run on the Wallkill Valley Railroad, and the event will be celebrated in grand style at Rosendale."

Cincinnati and Terre Haute Railway.

Work on the Cincinnati and Terre Haute Railroad is progressing with satisfactory rapidity to all who are friends of Terre Haute Railroad enterprises, through, of course, not of those who have pet schemes of their own to further which overbalance their home public spirit. Enough rails are now received to lay the entire twenty-five miles necessary to receive the stock subscribed to the capital stock of the company. This much will be constructed by the specified time. The division alluded to is from the St. Louis and Vandalia road down First street to Eel river. The council, on Wednesday, March 20th, voted, with one exception, to the granting of the right of way along that thoroughfare as reported by the special committee, consisting of the Mayor, City Engineer and Chief Engineer of the railroad company. This, certainly, will be a great improvement to the street.—*Terre Haute Gazette.*

Interest paid by United States, $14,631,870 15; interest repaid by transportation of mails, &c., $3,521,087 97; balance of interest paid by United States, $11,110,782 21.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, March 30, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Pacific Railroad of Missouri.

At the annual meeting of the stockholders of this company, held in St. Louis on the 25th ult., the following gentlemen were elected directors.

Joseph Seligman, New York, vice E. O. Stanard.

Francis B. Hays, Boston, vice R. J. Lackland.

Charles J. Morrill, Boston, vice Oliver A. Hart.

T. B. Edgar, St. Louis, re-elected.

John J. Taussig, St. Louis, vice Benjamin Stickney.

The present Board stands as follows:

Hudson E. Bridge, B. W. Chambers, N. C. Chapman, W. H. Coffin, T. B. Edgar, F. B. Hays, George E. Leighton, Charles J. Morrill, Andrew Pierce, Jr., C. Ranken, Jr., Joseph Seligmen, and J. J. Taussig.

Of the new Directors, Messrs. Seligman, Hays and Morrill are also Directors in the Atlantic and Pacific railroad. It is understood to be the Board's intention to go on and complete the Carondelet branch immediately.

At a meeting of the new board of directors held subsequently, Hon. Joseph Brown was unanimously re-elected President, John C. Porter, Secretary and Treasurer, A. A. Talmage, Superintendent; C. L. White, Auditor; W. P. Lewis, General Freight Agent; E. A. Ford, General Passenger Agent; W. H. Patriarch, General Supply Agent; and E. B. Gibbs, Master Mechanic.

St. Louis, Salem and Little Rock Railroad.

This company was organized to build a railroad from Cuba, Crawford county, to Salem, Dent county, distance forty and a half miles. Capital stock, $500,000, has all been subscribed, the line permanently located, and they expect to complete it this year. The gauge is to be the same as the Atlantic and Pacific road, with which it forms a junction at Cuba; to be built in the most substantial manner, with steel rails. The corporators own the Simmons iron mountain, near Salem (the present objective point), which will be developed by this road, and by the erection of furnaces and iron works. The directors are A. L. Crawford, New Castle, Penn., president; Wm. Brewster, Erie, Penn., secretary; Wm. L. Scott, Erie, A. J. Crawford, Terre Haute, and C. C. Simmons, St. Louis. The well-known financial ability and business character of the parties named is a sufficient guaranty that the road will built, especially as they have made large investments dependent upon this road for development. —*Little Rock Gazette.*

☞ The Boston *Advertiser* says that the Air Line Railroad will undoubtedly be ready for business within four months. About fifteen miles of it will be ready for the rails within three weeks, when the work of laying them will commence. The citizens of Colchester will build a branch road to connect with the Air Line three miles long. When ready for ties and rails it will be presented to the Air Line, which will finish, stock and run it. The grading will cost the town of Colchester about thirty thousand dollars.

☞ The Missouri, Kansas and Texas Railroad is completed 38 miles south of the Arkansas river —nearly to the north fork of the Canadian. The company are building a branch to Fort Smith, and making preparations for the speedy construction of an independent line to St. Louis. The Holden branch is in progress, to be completed within a year from this date. The Missouri river, where the company propose to bridge it, at Jefferson City, is 3641 feet wide.

☞ The Venango *Citizen* says: It is almost a certainty that a railroad will be constructed down the west side of the Allegheny river from that city to Parker, and possibly to Pittsburg, passing through the immense coal fields of Butler county. A corps of engineers are now engaged in locating the route, and work will be commenced as soon as possible. It is probable that the road will be extended to connect with the Titusville and Buffalo road.

☞ The Randolph (Texas) *Courier* of recent date, says: "A friend of ours who recently traveled over the completed portion of the Cairo and Fulton railroad, between Little Rock and Little Red river, pronounces it the best new road, in every particular, that he ever traveled over, and that in fact it excels in smoothness and comfort many old roads."

☞ At a meeting of the Board of Directors of the Panama Railroad Company, held on the 2d inst., Mr. Alden B. Stockwell was unanimously elected President, and Mr. Francis W. G. Bellows, Vice-President. Subsequently the Board appointed Mr. Henry Smith, Treasurer, and Mr. John Keeler, Secretary.

☞ John J. Patterson has been elected President, and F. S. Jacobs Secretary and Treasurer of the Spartenburg and Union Railroad.

Kansas Pacific Railroad.

The Kansas Pacific Railroad Company has purchased $3,000,000 of the stock—three-fourths of the whole—of the Denver Pacific Railroad, which will give it a connection with the Union Pacific Railroad, entirely under its control. An English company, known as the North and South Railroad Company, will shortly commence to build a line from Kit Carson, Col., to Fort Lyon, Col., a distance of fifty-five miles, and this will be held by the Kansas Pacific, under a long lease. It will be built during the Summer, and will be important in regard to the new Mexican trade. This new road will afterwards extend towards Sante Fe and Albuquerque, and connect with the Southern Pacific Railroad on the 32d parallel.—*St. Louis Republican.*

☞ The financial condition of the Cary Improvement Company is represented as being most satisfactory. The balance on hand at the commencement of the year was $9,142 35; receipts from all sources, $255,089 72; expenditures, $262,022 28; leaving a balance on hand of $2,209 84. The directors for the ensuing year, recently elected, are: S. Willard, John Low, R. A. Richards, Julius Hallgarte, John C. Jones, W. Pratt, T. Hope; Secretary, W. Pratt.

☞ A decree has been entered by Judge Barnard in the foreclosure of the mortgage of property owned by the Boston, Hartford and Erie Ferry Extension and Railway Company, ordering the sale of the property of the company amounting to about $1,000,000. The property comprises the Newburg and Fishkill ferry and large tracts of land and trestle work at Dunning's Point, and the dock and storehouse property at Newburg. The sale is announced for the third of May next.

☞ The track of the Northern and Southern Divisions of the New-Jersey Midland Railroad was connected on the 28th ult., making a continuous line from New-Durham, three miles above the Erie Tunnel, to the State line, connecting the New Jersey Midland with the Unionville Railroad at Unionville, and with the New York and Oswego Midland Railroad at Middletown.

☞ The Oxford (Pa.) *Press* says that there has been considerable talk in that town, recently of the construction of a narrow gauge railroad from the coal regions above Reading, to Middletown, on the Delaware railroad, and thence to the Delaware bay, via Lancaster, Quarryville, Oxford, Louisville and Elkton. The *Press* claims that the project is not altogether speculative.

☞ The interest of the state of Tennessee in the Knoxville and Charleston and Rogersville and Jefferson railroads, has been sold—the former to Messrs. Steers & Patterson for $105,000, and the latter to Capt. Jaques, of the East Tennessee, Virginia and Georgia Railroad, for $28,000.

☞ The survey of the route of the Memphis and Kansas City Railroad through Arkansas has been completed. The State line was reached in township 11, range 8 west, sixty-three miles from Batesville. The elevation above that place is about 700 feet.

☞ Grading on the Northern Pacific railroad is completed from the east to seventy miles west of the Minnesota line; rails and equipment for the road to Missouri river are purchased, and also for two hundred miles on the Pacific end.

☞ Proposals will be received until the 8th inst., by J. M. Byers, chief engineer, for the graduation, masonry, bridge superstructure and ballasting of the Pittsburg, Virginia and Charleston Railway, extending from Dravosburg to Monongahela City, sixteen miles. Profile and specfications can be seen and all information obtained at the company's office, 64 Fourth Avenue, Pittsburg, Pa.

☞ The Pewabic Mining Company will pay a dividend of $1 per share April 5.

TALLOW LUBRICATOR.

MACHINERY OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.

The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.

The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.

The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

Grand Trunk Railway of Canada.

During the year 1871, there was an increase in the gross receipts of the Grand Trunk Railway of $1,043,273, the whole amount being $8,313,014, and expenses about $6,400,000. The managers are confident that the receipts of 1872 will largely exceed those of 1871, as the two past months show an increase of $150,000. Within a month or two the balance of the Grand Trunk equipment bonds, amounting to one and a quarter millions of dollars, have been disposed of at par. The work of improving the line is steadily going on. One hundred and ten miles of steel rails were laid up to January, 1872, and it is estimated that in four years the whole line will be relaid with steel, as iron has been found unsatisfactory on account of the rigor of the seasons, and the immense amount of freight transported. In the improvement of the rolling stock, twenty-two first-class passenger cars, twenty Pullman cars, twenty engines and a very large number of second-class passenger and freight cars have been added the past year, and more have been ordered for future use. During the past three years, one-thousand changeable gauge cars, for through traffic in freight, have been added, and fifteen hundred ordinary box and platform cars, making a total addition to the carrying capacity of the road of twenty-five hundred cars. The company have also ordered a new and commodious iron ferry-boat for use at Sarnia, large enough to transport a full passenger train,

APRIL INVESTMENTS.

To those who have funds to invest, and to those who wish to increase their income from funds already invested in other securities, we recommend Northern Pacific Seven-thirties. Bearing Seven and Three-tenths (7 3-10) gold interest, and secured by a First Mortgage on both the Road and Land Grant of great extent and value, they combine unusual Profitableness with unquestionable Security.

The proceeds of all sales of Land are required to be devoted by the Trustees of the Bondholders as a Sinking Fund to the purchase and cancellation of the First Mortgage Bonds, or temporarily to the payment of interest thereon, if necessary. This provision will make the Railroad Company itself a large purchaser of its own securities in the open market after the Road is completed, and until the Bonds mature or are all brought in.

The Northern Pacific Railroad Company will, during the present month of April, offer for sale and settlement about Two Million Acres of its Lands in Minnesota, and many thousand acres are already taken and applied for. Thus the immense landed estate of the Company begins at once to be available.

All marketable stocks and bonds will be received (by express or otherwise) at current prices in exchange for Northern Pacific Seven-Thirties without expense to the investor.

Pamphlets and full information will be furnished on application.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY.

Early Railways and Direct Lines.

It has been one of the difficulties attending the prosecution of the early railways in any part of the country, that they have been located not with reference to the shortest line between two important points in the commerce of any state or section, but to suit the needs or aspirations of small towns lying between. Subscriptions to the stock were needed, and these could only be secured by such variations from the proper route as must have disgusted the locating engineer. Mr. A. was rich; he lived in the town of B.; if the railway could run through the town of B., Mr. A. would subscribe for so much stock; if not, not; and therefore the road was located to suit the ulterior purposes of its stockholders, and not with the view of securing its economical working or the greatest amount of business. We have abundant examples of this. When the various railways which now constitute the New York Central Railway, were built, the policy which we have described was very influential in locating parts thereof—that part of the road between Syracuse and Rochester, instead of being built on the line of the Erie canal, which furnished easy grades and a right of way at low cost, was diverted so as to pass through Auburn, Geneva and Canandaigua—towns which contained wealthy capitalists and influential politicians, whose wishes could not be ignored—thus adding about thirty miles to the proper length of the road, and increasing the cost of operating it, which results from very heavy grades, and a bridge nearly a mile in length across the foot of Cayuga Lake. Then, again, between Rochester and Buffalo, the proper route was *via* the Niagara Falls, as affording better grades, and securing the pleasure travel to that resort; but Batavia and Attica had "influence" to which the interests of the road were sacrificed. The result was that it has been necessary to build a railway on the direct and natural route between Syracuse and Rochester, and from Rochester along the celebrated "ridge road" to Niagara Falls. The secondary structures have become the trunk lines, and the primary roads are now quite lateral in their character. The Erie railway did not escape similar difficulties. Its western terminus was fixed at Dunkirk, to satisfy a senti-

ment, and the consequence was that branches, extending to more suitable points on either hand, soon became necessary. Other instances might be cited to demonstrate that, between leading and distant points, the public imperatively demand that railways shall be built and operated over the most direct and expeditious routes.

We find on consulting railway maps, that in locating and building many western railways, the same difficulties have been encountered, with precisely the same results as in this State. Some of the older roads—(and a road West of the Mississippi that is five years old, is an "old" road)—are as crooked as ram's horns, and seem to have been located with reference to the needs of ambitious towns—"great" only in the dreams of their projectors, furnishing little local business, and not in position to command the traffic of a trunk line. —We see the natural result, high rates and increase of time. The straightening process, inevitable from the start, has begun; and they, if not already so, are threatened with soon being left in a subordinate and lateral position. An important work in this "straightening out" process, is the St. Joseph and Denver City Railroad, which will connect, by a route nearly straight, the important geographical positions of St. Joseph in Missouri, and Kearney City in Nebraska. It needs but a cursory examination to enable any intelligent person to discover that this road, when built, will become, naturally and inevitably, from its position, a part of the great trunk line connecting the Atlantic and Pacific Oceans, commanding a large proportion of the freight and passenger business of the Union and Pacific Railways. It will not be more practicable to ignore the advantages of a direct route and easy grades in this case, than in others which we have cited. The business so secured and assured, together with the revenue to be derived from the sale of fertile lands granted by Congress in aid of its construction, cause the bonds issued by this company to take rank among the most desirable now offered upon the market. Paying interest at the rate of eight per cent. per annum, selling at 2½ per cent. discount from par, and free from taxation of every character, they provide a security for the investment of idle capital, in which nothing is to be desired; intrinsic value and a high rate of interest seldom combined are there. The whole country is interested in the progress made in the construction of this road—a ship canal around Niagara Falls would not be more important, and its completion will work great benefits to all having relations of any kind with the Pacific Coast and the Far West.

Improved Dumping Cart.

We herewith present to the consideration of our readers a simple yet important improvement in dumping carts, which will, we think, commend itself to all extensively using such carts on rail way works or canals, in brickyards, excavating for building, mines, coal yards, etc.

The object of the device is to so facilitate the dumping of such carts that even boys may perform the driving and dumping, and do the latter almost instantly.

The tail-board, instead of being slid in between cleats fastened to the side of the cart body, or hinged to the same, is fixed to two supporting arms, extending backward from the shafts, to which latter the arms are attached at a point a little in front of the axletree, which causes the tail-board to move backwards, when it lifts, so that there is no strain upon it whatever.

The shafts, instead of being attached directly to the axle-tree, are pivoted strongly to the side of the body, and a little in front of the axle-tree, and the cart body is fastened firmly to the axle-tree, so that the latter forms the pivot upon which the body turns in dumping.

A lever and catch is attached to the front of the body, so that when, after dumping, the latter assumes the position shown at the left of the engraving, it is firmly held in position until the catch is unlocked by the hand lever projecting sidewise from the front of the body, and convenient to the hand of the driver, whether standing on the ground or upon a foot board fastened to the under side of the shafts, just in front of the body of the cart. It is impossible for the body to play from side to side (as is the case with other carts) on account of the shafts being attached to the outside of the body, near to the wheels, which gives the horse great control over the cart.

The cart is shown dumped at the right of the engraving. It will be seen that starting up the horse will at once bring the body into the position shown at the left of the figure, and lock it there.

This arrangement obviates all the difficulty of removing or raising the tail-board when the cart is loaded, caused by pressure of the contents. A very slight exertion releases the catch in front of the cart, which instantly dumps, and the moment the horse is started, again closes.

For further particulars address William and Henry Hand, Plainfield, N. J.

The Winter of 1871-2 in the Northwest.

The following table gives the average temperature during the past winter (1871-2), at the points named. Except in two instances, the figures are furnished by the United States Signal Office at Washington, and represent three daily quotations of the thermometer at each place—morning, noon and evening:

	Dec. 1871.	Jan. 1872.	Feb. 1872.	Mar. 1872.	Mean.
Louisville, Ky	35°	33°	33°	35°	34
St. Louis, Mo.	31	28	32	36	31¾
Chicago	23	27	26	29	26
Baltimore	30	35	36	33	33½
Philadelphia	30	29	32	32	30
Washington	33	33	34	33	33
New York	30	30	30	29	29¾
Helena, Montana	18	26	36	42	30
Kalama, W. T.	31	32	44		36

The temperature at Helena, Montana, may properly be taken as a fair average for the territory, and hence for the mountain section of the Northern Pacific Railroad, where climatic difficulties should be encountered if anywhere. Helena is on the general route of the road, directly in the mountains, and but a few hundred feet below the highest point on the line. Notwithstanding the past winter has been the coldest ever known in Montana, and a surprise to the people, it will be observed:

1. That the average temperature at Helena (latitude 46½°) for the four months was the same as that of Philadelphia, although the latter city is 4200 feet lower and 450 miles further south.

2. It was four degrees warmer at Helena than at Chicago, and only three degrees colder than at Washington.

3. During February and March it was much warmer at Helena than at Philadelphia, Louisville, St. Louis or Washington. During March it was 9 degrees warmer at Helena than at Washington and Baltimore.

4. The average winter temperature at Kalama, Washington territory, on the finished portion of the Northern Pacific road, (in latitude 46°), was several degrees warmer than at Louisville, Washington or Baltimore, in latitude 39°. The greatest cold of the past winter at Kalama was 14° above zero.

Letters from members of the Montana territorial government, dated March 6ht, state that for three weeks previous to that time (beginning about the middle of February) the weather had been so mild that all signs of winter had disappeared; farmers had put in nearly all their spring grain crops, and new grass was three inches high in the valleys. The significance of this can be appreciated when it is remembered that in the Atlantic States, as late as March 6th, intensely cold weather and heavy snows prevailed; trains were blockaded on many eastern roads, and up to the 2d of April frost had not left the ground in Pennsylvania, and the grass had not shown the slighest tinge of green.

These simple facts, mainly derived from official sources and easily verified, are the strongest possible corroboration of the statements hitherto made by the promoters of the Northern Pacific Railroad as to the climatic advantages of the valley route across the continent.—*Philadelphia Inquirer, April 6.*

Camden and Atlantic Railroad.

The receipts of this road for the years ending December 31, 1870 and 1871, were as follows, viz:

	1870.	1871.
From passengers	$222,069 04	$246,870 80
" freight	92,094 33	95,675 71
" express	15,750 90	17,423 96
" U. S. Mail	3,000 00	3,000 00
" miscellaneous	1,529 96	1,629 96
	$334,444 23	$364,500 43
Expenses viz:		
Running account	$51,258 36	$54,676 57
Workshop account	27,796 22	33,058 21
Superintendence	29,146 55	31,099 29
Station	13 238 66	13,474 67
Construction	3,608 68	4,648 41
Repairs to real estate	252 34	98 35
Repairs and renewals to roadway	46,610 69	96,624 63
Station repairs	2,012 26	3,513 69
Telegraph	1 054 45	939 35
	$175 078 21	$238,133 17
Balance	$159,366 02	$126,867 26

The president in his report says that the earnings for the year ending December 31, 1871, were $364,500 43; and the expenses of operating the road for the same period, $184,120 82—leaving the sum of $180,379 61 over the current expenses, and which has been appropriated, as follows:

Interest on bonded debt	$78,797 56
Insurance, taxes, legal expenses, premium on gold	11,677 74
Renewals for May's Landing Road	49,265 59
Increase to rolling stock	28,393 69
Construction	4,648 41

Two items in the foregoing statement require notice, namely, that for renewals, and that for increase to rolling stock. In regard to the latter, it was found necessary to purchase a new engine for the Summer's business, which cost $11,250 00

Ten second-hand passenger cars were also purchased for the same purpose for 8,400 00

These for a moderate outlay, were put in good condition, and will now, in all probability, last from five to eight years.

Two eight-wheel box and thirteen eight-wheel flat freight cars, and one wreck car, were built in the company's shops, at a cost of 8,743 69

Total $28,893 69

In the year 1862, it was proposed to build under the provisions of your charter, a branch road of about seven miles in length, from Egg Harbor City to May's Landing, the head of navigation on the Great Egg Harbor River. The route was located, and from five to six miles graded, when the enterprise had to be abandoned, owing to the financial difficulties under which the company was at that time laboring. A separate charter

was obtained early in 1871, and an agreement entered into with the new company, to lease their road when finished for a period of 999 years, at an annual rent of $2,675 for the first five years, and of $5,000 per annum for the residue of the term. The road was not to cost over $70,000, and to be paid for by the issue of $37,500 of bonds, and of $32,500 of stock. The road to be laid with a forty-pound rail, and constructed in a manner satisfactory to your president.

It was after consideration thought that a forty-pound rail would prove too light in case it should be found expedient to work the branch with the engines used on the main line, and that the iron from the main track, though deteriorated by a use of nineteen years, would answer a better purpose. An additional clause was therefore added to the agreement, wherein it was stipulated that the May's Landing Railroad Company should pay this company the price of a forty-pound rail, with fastenings, viz., $34,825 10, and that this company should supply such iron as they saw fit.

In order that an adequate number of good rails might be obtained for this purpose, iron sufficient to lay ten miles of main track, was purchase for.... .... $87,059 37
Additional cost for spikes, handling and transportation 4,303 99

Making a total of.... .... $91,363 36
Deducting from this amount the sum paid by the May's Landing Road.... .... $34,825 10
And that received from sales of old iron.... .... 7,272 67
42,097 77

There remains a balance of.... .... $49,265 59

to be charged to the renewal of roadway, consequent on the above named contract.

This iron has all been received, a portion of it laid, and a corresponding amount of old iron delivered to the May's Landing Road, which road is now completed to the extent of the grading and bridging, and will be opened for traffic during latter spring or early summer months.

On the ninth of August the Vineland Railroad, crossing your road at Winslow, and connecting with the New Jersey Southern at Atsion, was opened to freight and passengers. The business derived from this road has not thus far met our expectations, but it is increasing and will, doubtless, continue to do so until it becomes a source of considerable revenue.

A road from Atco to Williamstown, and thence to Glassboro, on the West Jersey Railroad, is now in the course of construction, and it is expected to be completed during the present year. As this road will pass through a rich and thickly populated district, and as there is an important glass factory at Williamstown, we may anticipate an accession of both passengers and freight from this connection.

There is also in contemplation a road from Blackwoodtown to White Horse, a distance of about four miles. This road your board has offered to lease at a rental of seven per cent. on its cost, not to exceed $15 000 per mile, and to guarantee bonds to an amount equal to one-half the cost. The benefit expected to be derived from this acquisition is an increase in the Marl business. Blackwoodtown being underlaid by a thick stratum of marl, said to be excelled in quality by none in New Jersey.

During the present month, and therefore not falling strictly within the province of this report, a purchase has been made of the Cooper's Point and Philadelphia Ferry Company, its franchises, stock, boats, and property of every description, for the sum of $82 800, to be paid for in the preferred stock of the railroad company, at par.

This purchase had become necessary to enable the company to carry on its business in a satisfactory manner.

An inspection of the "Comparative Statement of the working of the road for 1870 and 1871," in the report of the superintendent, will show a considerable increase in the ratio of the expenses to the earnings of the year 1871, over that of 1870, namely, from 51.14 to 64.03. This increase is almost wholly due to the heavy roadway renewal consequent on the contract with the May's Landing Road. Without such explanation the statement would lead to the belief that the road had not been so economically worked as in previous years. To place this subject in its proper light, the following table, including all repairs, but excluding roadway renewals, is submitted:

	1870.	1871.
Miles run by engines..	163,636	198 433
Total receipts	$334,444 23	$364,500 43
Working expenses.... ..	$166,613 99	$184,120 82
Receipts per mile run...	$2 04	$1 88
Expenses per mile run..	$1 01	$0 95
Ratio of expenses to receipts....	49.81	50.51

From the foregoing table it will be seen that there have been 29,797 more miles run, and $30,056 20, more income received in 1871 than during the previous year. That the receipts per mile run were sixteen cents less, and that there has been a reduction in the working expenses of six cents per mile.

The average number of miles run to a ton of coal, and to a quart of oil, is as follows:

Miles run to one ton of coal.... .... 74.30
" " " quart of oil.... .... 32.75

In consequence of the large sum expended on the track, it is confidently believed that for three or four years to come it will require nothing beyond the ordinary renewals not exceeding in any one year that of 1870; namely, $4,640. Nor is it supposed there will be any necessity for procuring additional engines or cars during the present year.

It is proposed to run the ferry, not under its old charter, but under the charter of the railroad company—a supplement to which permits this to be done.

The receipts for the year, after deducting the running expenses, interest, insurance, taxes, &c., were still sufficient to have paid a dividend of about nine per cent. on the entire stock. This balance, however, as has been seen, was appropriated to renewals, construction and additions to the rolling stock,—expenditures not likely to be required during the present year. And as there appears no reason to suppose the business will diminish, but, on the contrary, as the prospect is that it will increase, the stockholders have grounds for a reasonable expectation of receiving a dividend out of the year's operation.

The company have 9 locomotives, 19 first and 24 second class passenger, 4 baggage, 2 mail, 1 smoking and 97 freight cars. Miles run by locomotives with passenger trains, 142,801; with freight trains, 40,113; with gravel, wood, construction and switching trains, 10,519—total miles run, 193,433. Number of through passengers carried, 66,018½ do. way do., 249,349½; excurtionists, 51,450—total, 366,818. Number of passengers carried one mile, 14,568,875. Tons of freight carried, 66,443½.

Secretary and Treasurer.—D. M. Zimmerman.

Superintendent.—E. Collins.

Camp's Improved Dumping Cars.

We extract the following paragraphs from the Philadelphia correspondence of the *N. Y. Herald*:

"I have been much interested in the operations of the American Dredging Company, who have the contract for dredging the marsh land that has been selected as the most available site for the wharves of the American Steamship Company.

"The facility and regularity of their operations, the economical and rapid working of Camp's Dump Cars, which have been chosen by the company for their special merits in doing this kind of work, and the aggregate amount of work accomplished daily, * * * is another evidence that the Pennsylvania Railroad and the American Steamship Company mean business."

We refer those interested to Mr. Camp's advertisement—in another column. Now that the frost is out of the ground, and the season for railroad work has opened, we would recommend the attention of railroad men and car builders to this valuable improvement. Three or four of our first class companies, East and West, will probably soon have them at work.

Steel-Headed Rails.

The Chief Engineer of the Philadelphia and Reading Railroad condemns the use of the so called steel-headed rail, on the ground that the steel head is found to separate from the body—a difficulty not yet overcome by a peculiar arrangement of the pile in rolling, which had been intended to obviate it. Of all this class of rails laid on the main track of this railroad since March, 1869, over 25 per cent. have been removed. The solid steel rails, on the contrary, have uniformly proved satisfactory, showing but little wear, after a service of about four and a half years.

☞ By the report of the Maine Central Railroad Company, just issued, it is shown that the Knox and Lincoln Railroad, a fifty-mile link of the great shore line, delivered to and received from the Maine Central in 1871, for Boston, 4944 passengers, and for Portland, 2999. The European and North American Railroad delivered and received during the same year, for Boston, 4289, and for Portland, 2582. These roads were opened to business November 1. When completed to Bangor the Knox and Lincoln Railroad must

inevitably be one of the first passenger roads in New England. A large pleasure travel for Mount Desert and Penobscot Bay will undoubtedly set in with the hot season.

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1871, were as follows:

From freight		$4,737,974 64
" passengers		1,440 856 79
" sleeping cars		29,889 00
" extra baggage		2,475 00
" mails		76,500 00
" express		145,886 47
" rent of property		170,958 93
" rent of cars and engines		21,261 69
" dockage		4,606 34
		$6,630,803 87
Net earnings over Chicago, Burlington and Quincy Railroad		317,866 34
Net earnings over Peoria & Oquawka Railroad		104,770 25
Total earnings in Illinois		$7,052,440 46
Earnings over leased lines in Iowa—		
Dubuque and Sioux City		945,277 37
Iowa Falls and Sioux City		282.277 90
Cedar Falls and Minnesota		121,146 08
Total		$8,401,141 81
Less operation expenses, viz:		
Salaries	$161,770 49	
General expenses	251,704 51	
Legal expenses	26,706 66	
Claims and damages	58,810 59	
Station expenses	688,775 52	
Freight train expenses	705,973 70	
Passenger "	276,238 79	
Repairs of engines	431,366 20	
" cars	425,277 75	
" tools, &c.	39,220 80	
Cleaning engines	49 858 57

" bridges	132,424 67	
" fencing	49,455 65	
Operating St. Charles Air Line	4,279 95	
Insurance	33,894 81	
Repairs of Lake Shore protection	16,937 00	
Cairo and Columbus Transit Steamer expenses	18,586 76	
Dunleith Elevator expenses	1,118 40	
Loss and damage of freight by fire (not insured)	32,370 20	
		4,641,919 62
Leaving net earnings		$3,759,222 19
Deduct—		
Charter tax paid State of Illinois	$463,512 91	
Charter tax paid State of Iowa	19 532 91	
Rent of leased lines	543,328 93	
		1,026,374 75
		$2,732,317 41
Add—		
Amount applicable to Interest Fund, as per Land Office Report	$168,978 36	
Amount applicable to Free Land Fund, as pr Land Office Report	154,406 87	
		323,385 28
Net amount, as shown in General Balance sheet		$3,056,232 67

It will be seen that the gross earnings of the whole line were $8,401,141 81; operation expenses, $4,641,919 62; State taxes, $483,045 82; and rent of leased lines in Iowa, $543,328 93—leaving net earnings, $2,732,847 44, against $2,857,321 80, in 1870; a decrease of $124,474 36. The percentage of expenses to earnings, including State taxes, was 61 per cent., against 60.5 per cent. in 1870.

The gross earnings in Illinois were $7,052,440 46, and the net, $2,771,918 21—a decrease, compared with last year, of $18,187 01; and of leased lines the gross earnings were $1,348,701 35; working expenses $824,910 28; State taxes, $19,532 91; and rent $543,328 93—showing a deficit of $39,070 77. The president in his report says:

Illinois produced in 1870 and 1871 large harvests of corn, and fair crops of other cereals, which afforded a large freight traffic in Illinois the past year, and covered the decrease in earnings from business of the Iowa leased lines, caused by the partial failure of the crops in that State in 1870-71, up to the date of the Chicago fire, in October last.

The loss of traffic consequent upon the destruction of the business portion of the city by fire, has been large. Opportunely a demand from the Gulf States for the products of the Northwest, made a heavy freight traffic south, over the road in November and December.

The Earnings of the line in Illinois were		$7,052,440 46
The working expenses	$3,817,009 34	
And the State tax	463,512 91	
		4,280,522 25
Leaving net Earnings		$2,771,918 21
The Earnings of the leased lines in Iowa were		$1,348,701 35
Which, deducting the working expenses	$824,910 28	
ent	543,328 93	
And taxes	19,532 91	
		1,387,772 12
Shows a deficit of		$39,070 77
In working the Iowa lines, and reduces the net Earnings of all the lines operated by the Company to		$2,732,847 44
Against net Earnings in 1870		2,857,321 80
A falling off in 1871, of		$124,474 36

Making the proportion of expenses and taxes to gross earnings 61 per cent.

The total receipts from freight transportation in Illinois, show a gain of $128,084 20 over those of 1870.

The net earnings over the Chicago, Burlington and Quincy Railway, under the contract of 1867, show a falling off as compared with 1870, of $103,728 87, which is chiefly due to the lighter traffic from the Iowa lines. The Toledo, Peoria and Warsaw contract yields a gain of $36,951 57 over the earnings of 1870.

19,372,210 bushels of grain were forwarded from stations in Illinois, and 4,684,590 bushels from stations in Iowa upon our lines.

Of this quantity, 18,796,100 bushels were received at Chicago, and 2,362,140 bushels at Cairo; 89,386,000 feet of lumber were forwarded from Chicago, a falling off of 32,934,000 feet as compared with the shipments of 1870.

The total quantity of freight transported in 1871, was 1,831,944 tons, equal to 262,150,386 tons hauled one mile, which yielded an average revenue of 2.32 cents per mile. In 1870, 265,409,371 tons were hauled one mile at the rate of 2.31 cents per ton; in 1869 the receipts were 2.48 cents per ton per mile.

The Passenger service in Illinois shows a loss of $282,929 69 from 1870, a part of which is attributable to a reduction made in the tariff in August last.

The loss of records prevents the usual full reports of the Freight and Passenger departments.

The reports of the General Superintendent and Chief Engineer, to which you are respectfully referred, show in detail the working of the line.

The profits of this railway depend largely upon cheap transportation to the seaboard. At the present moment this is controlled by three Trunk lines of railway, which by means of their extensions, by leases, and traffic arrangements with new railways, cover the larger portion of Illinois, Iowa and Missouri. During the winter months they are overburdened with traffic, obliging the local western lines to await their convenience in taking freight. These railways have been extended during the past five years with unparalleled rapidity, without a corresponding increase of the capacity of the Trunk lines. At this season they give direct rail transportation from Central Illinois to the Atlantic States, at the same cost as obtains from Chicago.

The interest of the Trunk lines is adverse to legislation by the General Government or by the State of New York, tending to an improvement of the canal system. Scarcely any reduction in time, or cost of transportation by the New York canals has been effected, while on other canals the adoption of steam power for towage has proved eminently successful.

The interests of this railway are closely identified with those of the City of Chicago, its terminus, on Lake Michigan, in securing a return to the water route of the products of this State, in transit to eastern markets. Until a more liberal policy is obtained with reference to the canal improvements, we must sensibly feel the loss of the control of the local traffic in Illinois, and be obliged, as we have been since 1866, to increase our tonnage and mileage of trains, without a corresponding gain in net earnings.

The Company lost in the October fire its Passenger Depot, Freight Depot, the Land Office, several small buildings, and 26 freight cars. The loss on all the buildings, except the Land Office, was covered by insurance. Elevator A, on our station grounds, owned by private parties, was also destroyed; seriously crippling the grain receipts. The Freight Depot has been rebuilt. The building of a Passenger Depot is delayed, pending the determination of questions touching the title to lands conveyed by the Legislature of Illinois, in 1869, to this Company, the Michigan Central, and Chicago, Burlington and Quincy Railway Companies, for a joint passenger station.

A contract has been entered into with the Gilman, Clinton and Springfield Railway, by which all its Chicago and New England traffic is to pass over this road, and fifteen per cent. of our gross earnings therefrom is annually, for a term of thirty years, to be set apart to be invested in its first Mortgage Bonds.

We have substituted for the Chicago, Burlington and Quincy traffic agreement of 1867, one with that, the Chicago and Iowa, and the Chicago, Dubuque and Minnesota Railway Companies, under which we secure the eastern traffic of the latter line between Dunleith and Forreston, and a lower rate of toll between the main line and Chicago via Mendota and Forreston on all our northwestern traffic.

Negotiations pending at the date of the last annual report, for the extension to Cairo of the Southern railway system, have progressed so far that we anticipate being able to submit to the shareholders at the May meeting, a plan whereby this desired connection will be secured at an early day.

It seemed desirable in June last, to establish a fixed rental upon the Dubuque and Sioux City line, in lieu of the percentage paid under the present lease for twenty years; and it was agreed to submit this proposal to our shareholders at a special meeting in November. Circumstances prevented the proposed lease being submitted. The light crop in Iowa of the past two seasons, and the opening of competing railways, have resulted in a smaller traffic than was anticipated.

The gradual settlement of the country on the Sioux City extension, will yield a large increase of the traffic of this line.

The Land Department sold in 1871, 48,927.31 acres of the lands donated to aid the construction of the railway for $459,404 26, making the aggregate sales to the close of 1871, 2,215,789.77 acres for $23,349,721 24, and leaving unsold at that date 379,210.23 acres. $1,633,153 53 was collected, of which $1,000,000 has been added to the Construction Bond Fund.

The loss by fire of the Trustees' records, and of a part of the bonds delivered, prevent their further literal compliance with the terms of the Construction Mortgage. To protect the purchasers of lands, it has been deemed advisable to place at the control of the Trustees a sufficient fund to pay all the bonds. They had received, as shown by their statement of December 31, 1871, $13,605,500 of bonds which have been canceled, or destroyed by fire. The Construction Bond Fund amounting to $2,630,000, now at their disposal, with $300,000 to be added this year, will, with interest accruing to the fund pay the balance of the $17,000,000 Construction Bonds.

General Balance Sheet.

Capital stock has been increased $270 by the conversion of canceled bond scrip.

The working stock of supplies consists of wood, coal, etc., on Chicago, Northern and Iowa Divisions, $59,723 12; materials and tools in road department, $371,838 10; materials at shops, $396,848 91; stationery, $2,925 78—total, at debit in General Balance Sheet, $831,335 91.

The lands remaining unsold are located as follows: on Main Line—south of Ohio and Mississippi Railroad 248,196.34 acres; between Scandoval and Decatur, 58,137.01 acres; between Decatur and Dixon, 4,353.88 acres; between Dixon and Dunleith, 12,568.33 acres. On the Chicago Branch—between Odin and Tolono, 37,636.01 acres; and between Tolono and Chicago, 18,018.66 acres—total, 379,210.23 acres.

The length of road is as follows: Main Line, Cairo to Dunleith, single track, 455.72 miles; Main Line Junction to Calumet, single track, 235.23 miles; Calumet to Chicago, double track, 14.55 miles; total in Illinois, 705.50 miles. Dubuque and Sioux City Railroad, 142.89 miles; Iowa Falls and Sioux City Railroad, 183.69 miles; Cedar Falls and Minnesota Railroad, 75.58 miles; total in Iowa, 402.16 miles. Track of Dunleith and Dubuque Bridge Company, 1.31 miles—total, 1,108.97 miles. Sidings between Cairo and Dunleith, 61.82 miles; between Main Line Junction and Chicago, 48.02 miles; on Dubuque and Sioux City Railroad, 12.75 miles; on Iowa Falls and Sioux City Railroad, 8.04 miles; on Cedar Falls and Minnesota Railroad, 3.06 miles—total, 133.69 miles. Total, main track and sidings, 1,242.66 miles.

During the year 6 first class engines were built at the company's works, making the number owned by them at the close of the year, 193; of these 34 were employed on passenger trains, 112 on freight trains, 26 switching, etc., and 21 undergoing repairs.

The number of miles run by engines with passenger trains, was 1,469,684; with freight trains, 3,453,554; with construction trains, 123,726; switching, 663 890—total, 5,710,854—an increase, compared with the previous year, of 323,248. Cost of repairs $468,958 71. Cost of repairs per mile run, 8.21 cents against 10.45 cents in 1870, 11.27 in 1869, and 12.72 in 1868. The total cost per mile, including wages, fuel, oil, waste, tallow and cleaning, has been 21.50 cents, against 25.15 cents in 1870, 25.49 cents in 1869, and 27.57 cents in 1868—the total cost being $1,228,038 89, against $1,355,465 95 in 1870, 1,381,349 88 in 1869, and $1,266,531 96 in 1868. The cost of oil, waste and tallow per mile run, has been 0.63 cents; of fuel, 6.01 cents. Av. miles run to a pint of oil, 14.29; to a ton of coal, 35.83.

The company have 79 passenger, 6 smokers, 1 officers', 1 pay, 45 baggage, mail and express, 17 sleeping, 2,512 grain, 50 Blue Line, 320 stock, 271 flat, 15 fruit, 10 Continental Line, 1,137 coal, 4 powder, 4 derrick, 3 tool and 2 tank cars, and 6 large and 10 small snow plows. During the year there have been built at the shops of the company and charged to construction account, 2 first class sleeping cars, 1 baggage car, 15 fruit cars, 10 house cars to be run in the Continental Line, and 67 coal cars. There were also built and charged to repairs, 26 cars to replace those burned in Chicago October 9th, and 14 house, 2 stock, 8 coal, and 2 flat cars to take the place of cars that have been missing since 1869. The cost of repairing passenger cars has been 2.12 cents, and of freight cars 0.58 cents per mile run.

The total number of passengers carried was 1,286,584—a decrease of 90,001. Number carried one mile, 60,590,862—a decrease of 3,714,356. Av. number of miles traveled by each passenger, 89.32. Av. fare of each passenger, $1 47.62. Revenue per mile of road, $1,714 64.

Tons of freight transported 1,831,944—an increase of 208,000. Tons carried one mile, 262,150,386—a decrease of 3,258,985. Tons carried one mile north, 144,755,699; do. south, 117,394,687. Tons of local freight carried one mile, 222,268,446; do., through do., 39,881,940. Av. distance each ton was carried 143.09 miles. Av. revenue per ton per mile, 2.32 cents. Revenue per mile of road, $5,494 91.14.

The amount of expenditures in road department, has been: for operation, $1,495,961 19; and for construction $249,322 75. There were used in repairs of road, 308,219 cross ties, and 11,108.19 tons rails, of which 214.15 tons were steel. 22 891 rails were repaired.

President.—John Newell.

Directors.—His Excellency, John M. Palmer, Governor of Illinois, ex Officio. Abram S. Hewitt, William Tracy, W. H. Osborn, until May, 1872; Lucien Tilton, George Bliss, John M. Douglas, until May, 1873; W. H. Gebhard, Wilson G. Hunt, Jonathan Sturges, until May, 1874; J. Pierpont Morgan, Louis A. Von Hoffmann, John Newell, until May, 1875.

General Superintendent.—A. Mitchell.

Treasurer.—W. K. Ackerman.

Land Commissioners.—Peter Daggy.

Chief Engineer.—L. H. Clarke.

☞ The directors of the Maine Central Railroad have decided to build an iron truss bridge across the Androscoggin, in place of the one recently burned.

American Railroad Journal.

Saturday April, 13, 1872.

Stock Exchange and Money Market.

There has been extraordinary activity in the line of call loans to the Stock brokers, at rates varying widely, the extreme range having been from the legal rate, in a very few instances, to the same rate per annum and additional commission of ¼@⅜, and even in some negotiations, as much as ½ of one per cent. per day. The course of the market throughout has been more or less severely against the borrowing interests, due, in a considerable measure, according to current street reports, to speculative manipulations of the supply of money, which led to the withdrawal from free circulation of large amounts of funds, with a view to the aggravation of the Money pinch, and to the depression of share values, in the interest of the more daring operators for a break in prices. The alleged interference with the available supply of Money led to much angry discussion in financial circles, but without any substantial gain to the market, or advantage for parties needing help. Most private lenders made full and unreserved use of the pressure, for their individual benefit, with little, if any regard, for the position of borrowers. The city banks were not able to afford much aid, in view of their own reduced resources, but they generally endeavored to accommodate their customers, and meet their necessities as far as practicable. There was a very slow movement in the discount line, with rates on choice to very good business paper ranging nominally from 8@12@15 per cent. per annum. The closing quotations for call loans on Wednesday were $\frac{1}{16}$@⅛ of one per cent. per day, added to the legal rate. The U. S. Sub-Treasury office increased its coin and reduced its currency reserves slightly. The city banks enlarged their loan and discount average nearly 1¾ millions during the week, while slightly reducing their outstanding circulation. The U. S. Sub-Treasury held currency balance at the close of business on Tuesday of $4,026,802, and a coin reserve, of $69,070,242.

The city banks, in their latest return, show a reduction of $2,954,500 of legal tender notes, $1,620,600 of specie, and $1,993,300 of deposits; an increase of $1,716,000 in their loan and discount averages, and a decrease of $4,700 in their item of circulation. The city bank exchanges, last week, averaged $156,387,000 and thus far, this week, about 135 millions daily. The banks now hold only $1,189,250 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,764,100, against $15,512,186 same time last year. The city bank deposits are now $201,065,500, against $215,793,673 week ending April 8, 1871. The legal tender reserve amounts to $38,695,200, against $50,945,997 same time last year. The circulation now stands at $28,014,700 against $31,568,901 same time last year. The loans are now $278,483 400 against $290,107,870 at this date last year.

The coin reserve of the city banks is now about 19¾ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 38⅝ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $81,103, and enlarged its coin reserve $317,304 as the result of the week's business. The receipts of the office were $3,839,843 in coin, and $4,712,868 in currency; payments, $3,522,539 in coin, and $4,798,972 in currency. The office received $3,388,000 in coin or its equivalent, from customs; and disbursed $157,788, of coin interest.

Government revenues yielded fairly, through the week. The excises yielded within the week about 3¼ millions, and thus far since July 1, 1871, $99,562,237. The customs at the port of New York, last week were $3,279,327; at the outports, equal to about $1,100,000 more, all in coin, or coin certificates.

Gold has been quoted somewhat stronger, in view of the heavy importations of foreign goods, and the comparatively moderate exports of domestic produce. The speculative demand has shown rather more spirit, though kept in check by the severe stringency in Money. The customs call has been up to a fair average, and the outward movement has been on an enlarged scale.

The range of the price during the week has been from 109⅞@110½ and the closing quotation on Wednesday was 110⅜ against 110 the pre-

ceding Wednesday. The specie outflow, last week, was $916,474. The Gold Exchange Bank clearances have averages about 2⅝ millions per day during the week.

The customs demand for Gold last week, averaged $564,667 a day; thus far, this week, it has averaged $580,000 a day, or equal to a weekly aggregate of $3,480,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $14,411, and since Jan. 1, 1872, $575,216 against $2,787,040 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $123,776,090 against $114,773,792 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to April 6, 1872, $62,274,942, against $66,901,670 same time in 1870-'71.

The export drain of specie was $916,474 last week, against $846,617, same week preceding year. The shipments since July 1, 1871, have been $28,831,380 against $56,370,300 same time in 1870-'71.

Under the Treasury programme for April, Government propose to sell Gold as follows: Thursday, April 18—One Million; Thursday, April 25—One Million. And to buy in U. S. bonds as follows: Wednesday, April 17—One Million; Wednesday, April 24—One Million.

Foreign Exchange has been very quiet, with rates quoted about the same. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109¼; sight bills on London, 110.

The produce exports from this port, week ending with April 9, were to the currency value of $4,369,131.

Government securities have been generally strong in price, despite the money pressure, and the demand has been fair, mainly for investment purposes.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115¾@115⅞; U. S. Five-Twenties of 1862, (other than the bonds called in) 112⅝@112⅞; U. S. Five-Twenties of 1864 at 112⅝@112⅞; U. S. Five-Twenties of 1865, 113¼@113½; U. S. Five-Twenties of 1865 consolidated, 111⅞@112; U. S. Five-Twenties of 1867, 112¾@113; U. S. Five-Twenties of 1868, 113⅛ 113⅜; U. S. Ten-forties at 108⅜@108⅝; U. S. Fives of 1881 (Funding Loan) 110@110¼. Six per cent. currency bonds, 115¼@115½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Mar. 27.	April 3.	April 10.
Consols.....	93 1/16	93⅛	92⅝

" 1867	93¾	93⅝	93⅛
" 10-40s	89½	89¼	89¼
Erie	54½	54	54½@55

State bonds have been in moderate demand, at variable prices.

A fair demand prevailed for Railway Bonds, chiefly from investment purchasers, at firm prices, despite the unusual activity in the Money line. Central Pacific Sixes have been in demand on home and foreign account, and strong in price, closing at 101¾@102. Chesapeake and Ohio have been selling to fair extent at 94 per cent. and accrued interest.

Railway and Miscellaneous share property, has been active, and values have fluctuated materially, influenced, mainly, by the extreme and persistent stringency in Money, said to be largely due to speculative manipulations of the supply of funds, though, in good part, also to the recent rapid increase of values and of stock dealings, at the Stock Exchange, which called for much more liberal pecuniary aid, to keep the speculative machinery in free working order.

There has been a brisk movement in Ingot Copper at a further material rise in prices; sales, 1,500,000 lbs. at 42c.@45c., closing at 45c., cash, and 35½c.@36c. for June to October delivery. Iron has been held above the views of buyers, and has been very quiet, with Scotch Pig scarce, and quoted $50@$52 for Glengarnock Pig, to arrive; $52@$55 for Eglinton do., on the spot; $52, for No. 1 American, do., and $50@51 for No 2 do., do. Lead, Spelter and Zinc, inactive. Pig Tin shows a further improvement in price, on an active business, stimulated by the continuously favorable foreign advices; sales, 3,000 slabs Straits at 40c. @40½c., gold, per lb. Tin plates have been strong in price and in good request, with sales reported of 1,000 boxes I. C. Charcoal, to arrive at $13 37½; 1,000 boxes Charcoal Terne, at $11 50 @$11 75; and 500 boxes Coke Terne, $10 50, gold, per box.

General business has been moderately active, with values of the leading kind of domestic produce fairly supported. Middling upland cotton closed on Wednesday at 23½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,458,058 bales, against 3,396,638 bales same time in the preceding year; exports 1,617,342 bales against 2,370,350 bales in the previous year; stock at the ports at latest dates, 371,429 bales against 555,208 bales same date 1871.

At the Live Stock Markets, Beeves have been in less demand and heavy at 9@13½ cts.; Veals at 9½ cts.; Sheep at 7@10 cts. Swine, dull at 4¾ @5 cts. per lb., all live weight. The week's receipt were 6,909 Beeves, 2,670 Veal Calves, 20,004 Sheep and Lambs; and 22,215 Swine.

Foreign goods have been in fair demand at generally firm prices. The week's imports of foreign goods reached the amount of $12,745,852 including $5,429,901 of dry goods.

Ocean freights have been moderately active but rates have been quoted lower, and very irregular particularly by Steam to British ports.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Mr. E. H. BIERDEMAN, a relative and one of the New York correspondents of Messrs. BISCHOFFSHEIM & GOLDSCHMIDT, of London, has joined Mr. JACOB RUBINS in establishing a Stock-exchange house here, under the style of Messrs. E. H. BIERDEMAN & Co., at No. 22 William-street.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ THE CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS are among the most substantial and satisfactory Securities which we can recommend for investment. The Iron and Coal Interests along the line of the road are attracting the attention and capital of practical workers in these minerals in this country and Great Britain, and are found to be more valuable and important than those of any other section of the country.

The IRON, COAL, SALT, TIMBER, and AGRICULTURAL RESOURCES of the region which it traverses, together with the through traffic which it will command as a *short, low-grade, economical East-and-West Trunk Line*, assure an immense and profitable business.

Price of the Bonds, 94 and accrued interest from Nov. 1. Principal and interest payable in gold in New York City.

Full information furnished on application.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for Chesapeake and Ohio Bonds at their current prices.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

THE

CANADA SOUTHERN RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of March, were:

ENTERED FOR CONSUMPTION.

	1871.	1872.

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—EFFECT OF SPECIAL NOTICE AFTER ACCEPTANCE OF GOODS.

The facts in the late case of The Detroit and Milwaukee Railway Company *vs.* Adams and others, (15 Mich. 458,) are fully and clearly stated in the following opinion by

CHRISTIANCY, J.—This was an action brought by the defendants in error against the company in a justice's court, to recover the value of one sack of wool alleged to have been delivered to them as common carriers for transportation.

The justice found the defendants below liable for the wool as common carriers. The proof of the loss was clear and uncontradicted, and that it occurred before the balance of the wool (of which it was a part) was shipped from the depot of the defendants.

And if there was evidence before the justice tending to show that the wool was delivered to and accepted by the company as common carriers, then the finding of the justice must be held conclusive though the case should be such that we if allowed to weigh the evidence might have arrived at a different conclusion—unless, indeed, it should appear that admitting the truth of the evidence, the plaintiffs, for some reason, had no right, to rely upon it, or admitted upon the trial some fact, or state of facts which would clearly defeat or avoid such tendency. Was there, then, any evidence, in this case tending to show that this sack of wool was delivered to, and accepted by the company as common carriers?

It was shown, and not disputed, that the general business of the company was that of common carriers of goods and passengers for hire or reward; that they kept a building or depot in Pontiac for the reception of property for transportation over their road, and for the delivery of property coming to that place upon their road there was evidence that the plaintiffs sent one hundred and two packages of wool to this depot at different times between the 15th and 25th of October. (On which particular day the package subsequently lost was sent, did not clearly appear) That this wool was sent to the defendants' depot for the purpose of transportation over their road consigned to H. Hollister, Hartford, Ct., which was plainly marked upon the packages, and that the freight agent in charge of the depot was notified for which it was sent, there, and of the wish of the plaintiffs that the whole might be sent off together. That the agent told the plaintiffs where to leave the wool, and pointed out the place in the depot where it should be put and defendants, men assisted in unloading the wool and putting it in. That after part of the wool had been thus delivered, the agent saying he could not then get cars to send it all together, it was agreed that plaintiffs should not send up the balance until notified by the agent that he could ship it as he said they were considerably filled up then in the depot with produce; that in a few days after, and about the 24th or 25th of October, having received notice from the agent, of his readiness to ship, the balance was sent to the depot. Part of the wool was shipped on the 26th of October, and part on the 3rd of November, but the sack in question was not shipped, and could not be found.

We think this evidence tended strongly to show the delivery to, and acceptance by the defendants as carriers; that it was thus delivered and accepted as it came, and was placed in the depot, and that the delay in the shipment was for the convenience of the company, till the necessary cars could be got ready. But it is insisted by the company that the effect of this evidence was entirely destroyed by a notice to plaintiffs that the company would not be responsible, except upon certain conditions, presently to be mentioned.

The only proof of such notice, and of the time and manner in which it is claimed to have been brought home to the plaintiffs, is this. After the defendants' agent had given the notice that he was ready to ship, and the balance of the wool had been brought to the depot, the plaintiffs signed a shipping request in the following words:

"The Detroit and Milwaukee Railroad Company will please receive the undermentioned property, addressed to H. Hollister, Hartford, Ct., and transport over its line, subject to its tariff, and forward under condition stated on the other side.

"102 sacks of wool. 20,300 lbs.

"H. Hollister, Hartford, Ct.

(Signed by plaintiffs.)

The printed form was furnished by the company and the blanks filled by the plaintiffs. On the opposite side of the sheet, under the head of "General notices and conditions of carriage," was, among others, the following printed notice:

"That they will not be responsible for any article or articles conveyed upon their railroad, unless the same be signed for as received by a duly authorized agent, and a declaration or shipping note upon the regular printed form, as provided, presented to the agent, setting forth the description of the goods, and the parties to whom they are to be delivered. And when goods are intended, after being conveyed by this railroad, to be forwarded by some other company or conveyance to their final destination, the duplicate receipt furnished by the consignor must specify the same, and the articles marked accordingly."

Whatever might have been the effect of this notice, if given in this manner before the property was delivered, at the depot; it certainly came too late to affect the question of a prior delivery to and acceptance by the company, as carriers, or their liability for its safe keeping, while awaiting transportation. At this stage of the transaction, if the property had already been accepted by them as carriers, the plaintiffs had a right to treat the notice as only intended to affect the liability of the company in respect to the carriage of the property; if, in fact, it could have been construed as anything more than this, if given before the property was received in the depot.

The judgment of the Circuit Court, affirming that of the justice, must be affirmed with costs.

Judgment affirmed.

☞ The Staunton (Va.) *Spectator* says work on the Valley railroad between Harrisonburg and Staunton, is about to be commenced. Two sections have been let to contractors, the ninth and the twenty-sixth, the former to Mr. P. M. McCabe, of Maryland, and the latter to Messrs. Kelly & O'Connor, of Virginia. The sections on this road are numbered from Harrisonburg, so that the twenty-sixth section is the last, counting from Harrisonburg.

Tax on Commercial Travellers.

From the Richmond Dispatch, April 5.

Judge Bond, of the United States Circuit Court, on yesterday rendered his decision in the case of the Commonwealth vs. W. H. Barrett, of New York city. Barrett is a non-resident trader, who was arraigned before the Police Justice of Richmond a few months ago for violation of the city ordinance and State law by selling goods by sample without license. He was duly fined, and thereupon carried his case, by writ of *habeas corpus*, before Judge Underwood at Alexandria. This judge decided both the State law and the city ordinance, under which the Police Justice acted, unconstitutional, and ordered the discharge of the prisoner. An appeal was taken by the representative of the State to the United States Circuit Court, whose decision affirming that of Judge Underwood was rendered yesterday. Judge Bond said:

I shall order the discharge of the petitioner in this case because I am of opinion that the law under which he is in custody is in violation of the second section of article four of the Constitution of the United States.

By the provisions of the twentieth section of the act of Assembly of Virginia, of March 24, 1871, the specific license required of every person not a resident merchant who desires to sell goods by sample in Virginia is fixed at one hundred dollars, It makes no difference what is the amount of his stock either at home or present with him. The tax is a fixed one, and is not dependent on the amount of his sales.

On the other hand, every merchant resident in Virginia is allowed by the same act to sell his goods by sample anywhere in the State without taking out any license such as is required of the non-resident trader. To be sure, the resident merchant pays a license also as a trader, but his special license is much lower than that fixed upon the non-resident, and the whole amount with which he is charged is dependent upon the amount of a resident merchant's sales.

In addition to the privilege of keeping a store and selling his goods to his customers, upon the payment of his license, the resident merchant is entitled by the law in question to exhibit his goods all over the State without a sample merchant's license.

I think this is a discrimination against the citizens of other States, and comes within the decision of the Supreme Court in Ward vs. State of Maryland, by which such discrimination is determined by the Supreme Court to be unlawful.

The ordinance of the city of Richmond requiring a license from non-residents and exempting residents from its application is so clearly illegal that no argument is necessary to show it.

The party must be discharged.

The Phœnixville Bridge Works.

The celerity with which work is turned out at these works is shown by this fact. On the 10th of February, Messrs. Clarke, Reeves & Co., the proprietors of these works, received an order for two very considerable iron bridges to go to Costa Rica, Central America. They were wanted for shipment by the 7th of March. Notwithstanding the short time allowed, the bridges were completed and shipped a week before the time agreed upon. Owing to the admirable system established, iron bridges of ordinary spans for road or railway purposes can be furnished with the greatest promptness. In fact, iron bridges, roofs and viaducts can now be bought and delivered with about the same rapidity as so many yards of tape or cotton cloth. The book of designs issued by Messrs. Clarke, Reeves & Co. is an interesting volume to engineers and others interested in this class of structures, and shows somewhat in detail many valuable features of the system in vogue there.

Public Debt Statement.

WASHINGTON, D. C., April 7.—The following is a statement prepared at the Treasury showing the progress of reduction of the public debt and interest from March 1, 1869, to April 1, 1872:

	Debt March 1, 1869.	Debt April 1, 1872.
Five-twenty six per cent. stock	$1,602,587,350	$1,120,717,350
Other six per cent. stock	283,677,400	283,681,200
Ten-forty five per cent. stock	194,567,300	194,567,300
Other five per cent. stock	27,022,000	20,009,000
Funded five per cent. 1881, new		200,000,000
Total funded debt	$2,107,854,050	$1,818,965,850
Greenback and old Demand Notes	$356,021,073	$357,590,906
Greenback Certificates, three and four per cent	71,140,000	80,198,000
Gold Certificates	28 775,560	29,283,400
Fractional Currency	36,781,547	42,283,399
Past due Notes and Bonds	6,422,464	26,684,652
Total Treasury Circulation	$499,140,644	$486,040,357
Less Gold in Treasury	98,741,261	120,200,610
	$400,399,383	$365,839,747
Less Currency in Treasury	18,853,529	10,431,299
Net Treasury Circulation	$383,545,854	$355,408,448
Total Debt less Cash.	$2,491,399,904	$2 174,374,298
Yearly interest in Gold,	$124,255,350	$104,992,278
Yearly Interest in Currency	2,134 200	912,720
Total amo'nt of yearly interest charge	$126,389,550	$105,904,998

The American Steamship Company.

The immense increase in the capital and production of the manufactures of this city in the last ten years, as revealed in the revised census, has barely ceased to attract attention and comment, when we have another subject which will first cause wonderment and then call forth admiration. The American Steamship Company is an enterprise which our generous neighbors have been asserting never had any other existence than on paper, and which long since had died a natural death. True, like most Philadelphia schemes, it was not every day advertised through general press agencies, nor did its directors keep themselves continually before the public; but it has gone on growing, nevertheless the lack of these features, which would be indispensable a hundred miles to the north of us. Its funds have been increasing, its ships are under way; and, some time in June, when the thousands of strangers will be here, they will be shown a spectacle that New York, Boston, Baltimore and none of the rest have ever seen—the launch of an American iron steamship, built of American materials, owned by American capital, and to be manned by an American crew. The report of the directors of the steamship company, submitted at the first annual meeting yesterday, is the most gratifying exhibit we have lately had of our city's growth and prosperity. The finances are in admirable order: Received on account of instalments to stock, $696,020; on account of subscription bonds, $1,358,000; on interest account, $3,175 92; total receipts, $2,157,155 93. Wm. Cramp & Sons have been paid to date $617,500, and $1,424,500 have been deposited with the Pennsylvania Railroad Company to secure the fulfilment of the steamship company's contract with these ship-builders. The entire fleet of steamships will be finished and delivered by the first of January, 1873.—*Philadelphia Press.*

Chicago, Danville and Vincennes Railroad.

The Chicago, Danville and Vincennes Railroad Company, and the Western Indiana Railroad Company have been consolidated into one corporation under the former name. This gives the C., D. & V. Company a line of its own directly through the best portion of the Indiana block coal fields, and the shortest line which can be made between them and Chicago.

The new line will begin at Rossville, cross the Wabash river at Covington, and run thence directly south to Coal Creek and the Southern line of Fountain County. All of the rails for the extension have been purchased; ten miles of the road are already graded, and track laying will commence in May.

It is not yet determined whether the company will continue the line to Brazil in Clay County.

The Rosendale Viaduct.

ROSENDALE, N. Y., April 7, 1872.

The crossing of the first train over the Wallkill Valley Railway bridge was celebrated at Rosendale yesterday. About five thousand people were present, including many prominent men from various points in the vicinity. The first train over consisted of an engine, tender and seven cars. The test was completely satisfactory, the bridge showing no signs of weakness.

The bridge was begun in August, 1870, and was completed last January. It is built of iron, in five spans, supported by heavy stone piers and abutments, and iron columns. It is 150 feet high being the highest span bridge in the United States, and its total length is 988 feet. It cost $225,000.

The Wallkill Valley Railway is now completed to that point and the track is ready for the rails to this city. The road is expected to be finished to this place in about two months.

☞ The Albany (N. Y.) *Evening Journal* says the proposed railroad to connect Buffalo, in this State, with the Pennsylvania oil districts seems likely to be built, notwithstanding the apparent defeat of the Southern Improvement Company's monopoly. It says the oil interests of Titusville will not be satisfied until any future combinations to oppress them are rendered impossible, and the inhabitants of Buffalo, Jamestown and other towns on the line of the proposed road extend substantial encouragement. The new company has been chartered by the New York Legislature and the Pennsylvania section can be constructed under the general railroad law of that State. The proposed route of the road, on a direct line, is a little more than one hundred miles long.

☞ The Atlantic and Pacific railroad is completed so as to connect with the Missouri, Kansas and Texas railroad in the Cherokee Nation. This, according to the Galveston papers, affords the shortest route from Texas to St. Louis.

☞ The bridge over the Occoquan, on the Alexandria and Fredericksburg Railroad, has nearly been completed, and it is expected that the trains will pass over it in two or three weeks.

☞ The interest due April 1 on the first mortgage bonds of the Wallkill Valley Railway Company will be paid at the Bull's Head Bank on presentation.

Movements of Produce.

Exports from New York to foreign ports of certain leading articles of domestic produce for three months from January 1st—

☞ The value of foreign imports at the port of Boston from January 1 to March 29, 1872, was $14,720,407, against $13,603,610 for the corresponding period of 1871—an increase of $1,116,797.

European Steam Communication with the Chesapeake and Ohio Railroad.

The steamship "Caspian" of the Allan line, which arrived at this port from Liverpool, last Friday, had among the steerage passengers more than one hundred who were going West, from this point through Cincinnati. They were obliged to go to Baltimore, The "Nestorian," of the same line, which left Liverpool on the 26th inst.; has more than one hundred and fifty colonists for this port bound to Nebraska. They, also, will have to be forwarded via Baltimore.

With the completion of the Chesapeake and Ohio Railroad this summer, this state of affairs will be changed, and the cheapest route to the West will be by this line. Colonel Lamb has arranged for an immigrant ticket to Cincinnati and the West, from Liverpool via Norfolk, so soon as this road shall be finished, which ticket will be the cheapest from Great Britain to the West, and will attract through this port a surging tide of humanity. The immigrants will go from here to Richmond, take the trains to Huntington, and at Huntington—until the railroad is extended west of the Ohio—take steamers one hundred and forty miles to Cincinnati, where trains are leaving hourly for all Western points.

It is apparent that our direct trade movement has much to encourage it in the certainty of an early completion of the Chesapeake and Ohio Railroad in an unbroken line to Huntington.—*Norfolk Journal, March* 31.

Boston, Hartford and Erie Railroad.

In the suits of the receivers of this road against Henry N. Farwell and against George W. Long and Co., the Supreme Court has decided in favor of the receivers. The case was made upon petitions to compel the respondents to surrender to the receivers coupons due July 1, 1857, and January 1, 1858, to the amount of $72,353 06 of bonds of the Hartford, Providence and Fishkill Railroad Company, secured by a first mortgage of the railroad between Providence and Waterbury, bearing interest at seven per cent., and also coupons due July 1, 1857, to the amount of $15,000 of bonds of the city of Providence—*Boston Journal.*

☞ A dispatch from Halifax (N. S.) states that the local government have adopted a series of resolutions to aid the Western Railway Company by a grant of 150,000 acres of the crown lands, and an annual subsidy of $30,000 for ten years. Also to give the New Glasgow and Louisburg Railway Company the same quantity of land and one-half the royalty on coal raised in Cape Breton for forty years. These measures, and others promised to furnish assistance to projected railroads, are said to meet with public favor.

☞ The Titusville *Courier* learns from private advices that the projected railroad from Erie south, to pass through Meadville and Franklin, and unite with the Baltimore and Ohio road, via the Connellsville route, is meeting with a good deal of encouragement. A committee from Erie, headed by Judge Marvin and William A. Galbraith, Esq., have lately visited Baltimore, and had a very satisfactory interview with the officers and directors of the Baltimore and Ohio road—so much so, in fact, that immediate steps will be taken to organize the movement.

☞ A dispatch dated Denver, April 5th, states that track laying on the second division of the Denver and Rio Grande narrow gauge railroad between Colorado Springs and Puebla began some days ago, and will reach Arkansas in time to commence running regular trains from Denver to Puebla by the first of May.

☞ The Manchester *Journal* says it is reported that the Delaware and Hudson Canal Company will relay the track on the old Albany Northern road bed, from Eagle Bridge to Albany, thus making a direct route over their own road all the way from Rutland to Troy and Albany. It is also said that a short line will be built from the State line end of the Harlem extension railroad to Wait's Corners, or some point on the Rensselaer and Saratoga railroad, perhaps Eagle Bridge.

☞ The ordinance providing for a renewal and extension of the mortgage due the city of Baltimore by the Pittsburg and Connellsville Railroad Company has passed both branches of the City Councils, and now goes to the mayor for his approval. The mortgage is extended to the extent of $5,000,000, some $280,000 being available for side tracks, equipment and paying present liabilities.

☞ The Wilmington (N. C.) *Journal* says that the Wilmington and Weldon, and Wilmington, Columbia and Augusta Railroad Companies have subscribed largely to the stock of the Wilmington, Charlotte and Ocean Steamship Company, and that new steamers are to be at once built and put on the line, with a schedule of two per week, between that city and New York.

☞ The Philadelphia *Press* says that the Wilmington and Western Railroad Company have just completed a contract for a branch road connecting the Wilmington and Western proper with Landenburg, on the Pennsylvania and Delaware Railroad.

☞ The directors of the Allouez Mining Co., recently elected, are: Horatio Bigelow, James P. Brewer, Oliver B. Cook, Samuel R. Spinney, Geo. F. Bemis, J. Frank Emmons of New York, A. P. Thomas of Michigan. The amount of assets over all liabilities is stated to be $53,567 62.

☞ The contract for constructing the Canadian North Shore Railroad has been awarded to Messrs. Dunlap, Smith & Keith of Chicago, who competed with Canadian and English firms for the job. The road is to cost $7,000,000, and be completed in 1875.

☞ The Westminster *Advocate* says that a survey has been made from Dillstown and Petersburg to Littlestown, and it is proposed to continue the survey on to Westminster, for the purpose of connecting that road either with the Western Maryland or the National railroad.

☞ It is stated that the contract for the construction of the Grand Junction (Ca.) Railway has been awarded to Messrs. Brooks, Ryan & Co., at from $15,000 to $16,600 per mile. The contractors bind themselves to construct any of the four routes surveyed.

☞ The total exports from Philadelphia during March, amounted to $921,314, of which $299,759 was sent in American and $621,555 in foreign vessels.

☞ Gilson Homan, vice-president of the Great Western Railway of Canada, has been elected a director of the Erie Railway Company, in the place of O. H. P. Archer, resigned.

☞ The Providence (R. J.) *Journal* says the construction of the Woonsocket Railroad is assured. The company has contracted with strong, reliable parties to build a first class railroad from Providence to Pascoag, the present season, completing the work by the first of January next. About $200,000 of the requisite capital for making it a first-class road remain to be subscribed.

☞ The Western Maryland railroad has been completed to the Antietam, within one mile and a half of Hagerstown. The bridge of the Antietam is in course of construction, and is expected to be finished during the present week, and the cars running through from Baltimore to Hagerstown by the 20th instant.

☞ The Williamsport *Pilot* says the Western Maryland Railroad work is to be at once recommenced on the Williamsport end of the Western Maryland railroad.

☞ The estimated earnings of the Erie Railway for the week ending April 7, 1872, were $356,514; against $200,949 for the corresponding period of 1871—an increase of $55,565.

RAILROAD IRON.

THE UNDERSIGNED HAVE FOR SALE 1,060 tons 80-pound fish pattern rails, now on the way to New Orleans.

PERKINS, LIVINGSTON & POST,
No. 31 New-St., New York.

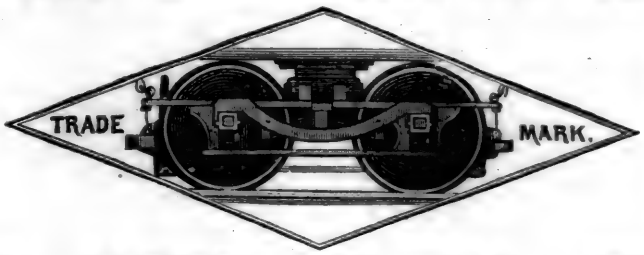
TRADE MARK.

Highest Premium awarded by American Institute Fair, 1871.

CAUTION.—Purchasers of **Prince's Metallic Paint** are requested to buy in original packages, and see that each package has our trade mark and name on the side, as Mineral and other worthless paints are thrust upon the public on the merit and often in the name of PRINCE'S METALLIC PAINT. For sale by the trade generally and PRINCE & BASS, Manuf's, 96 Cedar street, N. Y.

PATENTS.



THOMAS D. STETSON,
No. 16 Murray Street, New York.
Solicitor of Patents and Scientific Expert in Patent Cases.

The best service at a fair price. The same care and zeal as heretofore to promote the interests of clients. Send for circular.

ISAAC U. COLES & CO.,

19 NEW CHURCH STREET, NEW YORK.

TALLOW LUBRICATOR.

MACHINERY OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.
The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.
The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.
The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

☞ For sale by Booksellers generally.

Miller & Smith.

A year since we called the attention of our readers to Messrs. MILLER & SMITH, a young house then just commencing in the business of railway supplies. These gentlemen, as we then stated, have been in the schools of theory and practice in the manufacture of iron, and we consider them first class experts. They are men of integrity and education, and our prediction that their business venture would be crowned with the success which their knowledge and energy merited has been more than fulfilled, as many of our leading railroad men who have had large dealings with them can testify. We repeat that our railways need the services of just such a house as theirs, and the more such metallurgical experts are employed to aid railroad men in the selection of good material the more the quality of railroad iron will be improved, the running and maintenance expenses be decreased, and the fewer the accidents from broken rails whose fearfully increased number has so swelled the death record during the past winter. We again point out to our readers their advertisement which will be found in another column.

INVESTING

MONEY!

Banking House of

JAY COOKE & CO.

To all seeking investment combining large profit with abundant security, we offer and recommend the First Mortgage 7-30 Gold Bonds of the Northern Pacific Railroad Company.

The high character of these Bonds is permanently established, and holders are fully protected, not only by the ample security afforded in the mortgage, but by a most careful and economical administration of the affairs of the Company.

Capitalists, and all who require a pre-eminently safe security, should investigate the claims of the Northern Pacific First Mortgage Bonds. They have thirty years to run, and bear interest at the rate of 7 3-10 per cent. in gold.

Many holders of 5-30s are exchanging them for Northern Pacifics, and thereby INCREASING THEIR ANNUAL INCOME NEARLY ONE-THIRD.

The highest current rate will be paid for all marketable securities received in exchange.

JAY COOKE & CO.

New York, Philadelphia & Washington.

Schenectady's New Route to the East.

The Schenectady *Union* says a company has been organized to construct a railroad between Schenectady and Hoosac Tunnel, which will open a direct and short route between the two places. Such a link of road connecting the New York Central, West Shore and Schenectady and Susquehanna roads with the roads of New England, will be very important—being not only the shortest route between the western country and Boston, but also to the New England States. This new road from Schenectady, running in nearly an air line to Boston via Hoosac Tunnel, will be comparatively about fifty miles shorter than any other route, and will also open a direct route to the Pennsylvania coal fields.

New Routes for Commerce.

In ancient times, not only the growth but the very existence of important cities depended upon their relation to the means of prosecuting commerce between distant regions; and the varying routes which have been taken by the trade between Europe and Asia have an important place, not only in the history of commerce, but of civilization. Palmyra, or "Tadmor in the Wilderness," is an illustration of the idea intended to be conveyed. Built in a desert region, and without any self-sustaining surroundings, it nevertheless flourished for centuries, and attained enormous wealth and population, simply as a channel for the commerce carried on by means of caravans across the deserts lying between Southern Asia and Southern Europe. The discovery of the passage around the Cape of Good Hope was the death blow to its prosperity; and although but a few hundred years have elapsed since that discovery, nothing is left of the great city, but its rivers. Venice and Alexandria suffered from the same cause, though not to an equal extent, because they had some commercial importance of their own. Coming down to a later period, we find in the development and growth of Liverpool, Glasgow, and Havre, the natural result of the routes which the commerce of the world has been seeking. "Westward the star of Empire takes its way;" and practically commerce and Empire are nearly synonymous terms. Empire does not remain long where commerce does not flourish. Important political results also have followed the adoption of new routes by commerce, for there can be no doubt that Western and Christian Europe would have long ago ceased to tolerate Constantinople in the hands of Turks and Mahommedans, but for the fact that the seat of the ancient Eastern Empire has ceased to have any commanding commercial importance; its trade is as insignificant as its political influence.

We have been led into these reflections by some remarks in the late report of the Illinois Central

Railroad Company for 1871, touching the diversion of its trade by new railroads which tap its route at various points, and have direct communication with the Atlantic seaboard. Not that we anticipate any serious inroad upon the business or substantial prosperity of this great corporation, whose excellent and honorable administration has been of the greatest credit to American railroad management, both at home and in Europe; but the facts here adverted to may be accepted as a new demonstration of the truth that antagonism may be developed from what it aims at. The Illinois Central Railroad, traversing the whole length of the fertile state from which it takes its name, has been of almost incalculable value to it. Towns have sprung up, and the teeming soil along its route opened to cultivation; and thus it has developed the resources of the region through which it passes to such an extent that additional railroad facilities have been demanded and secured for reaching the ultimate markets. These railroads, grown, as it were, out of the loins of the Illinois Central, have become no inconsiderable rivals for its business. A glance at a railroad map shows how this is. For some years past it has been observed that the actual movement of grain has not been accurately shown by the receipts at the Lake Ports. St. Louis has asserted its pretentions as a leading grain receiving market; but her increased prominence is mainly due to the development of agriculture West of the Mississippi, and the grain reaches her mostly by river. But for several winters the quantity of grain, and other products of the West, received at the Atlantic seaboard, have been largely in excess of the reported shipments from the principal western markets, whence such shipments were formerly almost exclusively made—Chicago and Toledo, for example. The explanation is found in the fact, that by means of the railroads which cross the Illinois Central at several points on its route, it has been practicable to ship western products from interior towns at the West to consumers at interior towns of the East. The home trade of New York in Western staples has, from this cause, not had its natural growth. But this sort of business was soon overdone; the interior markets were found to be easily glutted, and two or three years ago much loss has resulted therefrom. Within the past year, therefore, business has in a measure returned to its accustomed channels, as is seen in the greatly increased demand at this market from coastwise and interior points, for flour and grain. The enormous surplus of agricultural products grown at the West will go where they may find prompt sale, abundant means of transportation, and ample banking facilities. But as the report very truly remarks, the railroads crossing that road give direct rail transportation to the Atlantic seaboard at the same cost as obtains from Chicago.

The prosperity of the Illinois Central Railroad is greatly promoted by the comparatively cheap and expeditious water communication with distant sections of the United States, and the Southern and Northern seaboards, by means of the Mississippi River at its Southern and the Great Lakes at its Northern termini. The report observes that "the loss of traffic consequent upon the Chicago fire was opportunely attended with an increased demand from the Gulf States for the products of the Northwest which made a heavy freight traffic South." How can a railway so eligibly situated incur more than a check to its prosperity? The very rivalry to which it is now exposed must soon redound to its advantage. Reference is made to the neglect by the General Government and by the State of New York to improve the canals connecting the Great Lakes with the Atlantic seaboard; and it is observed that until a more liberal policy prevails, "we must sensibly feel the loss of the control of the local traffic in Illinois, and be obliged, as we have been since 1866, to increase our tonnage and mileage of trains, without a corresponding gain in net earnings." These apprehensions are doubtless exaggerated. At any rate, the present position is a natural result of circumstances. Illinois now needs development in new fields and in new industries; and in such development her railroad system will have a basis of prosperity greater than it has yet enjoyed.

Columbus and Hocking Valley Railroad.

The earnings of this road for the year ending December 31, 1871, were:

From passengers		$120,660 95
" freight		417,545 77
" express and mail		9,867 31
" telegraph		868 38
		$548,942 41
Expenses viz:		
Road	$81,308 30	
Locomotives	23,758 44	
Transportation	106,791 83	
Car	18,224 57	
General operating	29,741 69	
Loss and damage	3,348 58	
		$263,209 41
Net earnings		$285,733 00

The earnings, expenses, etc., for the three years ending December 31, 1869, 1870 and 1871, compare as follows:

	1869.	1870.	1871.
Earnings	$150,229 73	$372,229 41	$548,942 41
Expenses	77,058 96	161,814 59	263,209 41
Net	$73,170 77	$210,914 82	$285,733 00

In 1869 about 40 miles of the road was open; in 1870, 62 miles; and in 1871, the whole road, extending from Columbus to Athens, O., 72.28 miles, with branch from Logan to Straitsville, 13 miles, was in operation. The ratio of expenses to earnings was in 1869, 51.30 per cent.; in 1870, 43.33; and in 1871, 47.95. The Vice President, in his report, says:

At a meeting of your board of directors, held February 8, 1871, the time of holding the annual meeting of the company for the election of directors was changed from the fourth Tuesday of January to the second Tuesday of April, in order to give sufficient time for the closing up of the business and making full reports of the fiscal year ending the 31st December.

The road having been completed to Athens and opened for business July 25, 1870, the past year has been the first full years business of the entire road, and the results, we trust, are satisfactory.

The road has been worked without an accident to a passenger and to but one employe.

With the opening of the Straitsville Branch on the 2d of January 1871, the increased business from the additional number of mines, and from the fact of the Straitsville coal proving superior for gas and furnace purposes, thereby creating additional markets, made us short of the necessary amount of cars to supply the demand, so that contracts were made for two hundred coal and twenty-four flat cars, and for two road and one switching engine, all of which have been received.

With the increase of equipment and business, we found it necessary to make over two miles of sidings at Columbus and on the line during the year.

The Cincinnati, Sandusky and Cleveland Railroad Company having located their road from Springfield to this city, during the early part of the year, an arrangement was made with them for the purchase of sufficient ground, by each company, to have a good connection for the transfer of cars before their track crossed the Cleveland, Columbus and Indiana Central Railway, thereby making for them, and us, an independent transfer track, which will prove valuable to both corporations.

During the year a valuable trade for coal, from your road, was commenced through Cleveland to points on the lakes, and with a large increase of cars which the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company are now having built for that trade, we hope to develop a large business—the quality of our coal, both from main line and branch, being such as to give us a preference over the majority of coals with which we come in competition.

During the last quarter of the year the miners advanced their rates of digging, and made such demands of the operators, that, on the first of December, all work stopped except at one mine, (Floodwood), where the men were not connected with the Miners' Union, and remained so during the entire month, which should have been the best month of the year; causing a loss to our company, for December and a part of January, of not less than $50,000.

About the middle of January the difficulties between the miners and operators were adjusted, and a scale of prices agreed on for fifteen months from January to April, 1873, and it is thought we will have steady work through the year.

The strikes that have occurred during the past two years have deranged our business, discouraged the operators, and delayed the furnishing of sufficient equipment, and occasioned loss to the miners, operators and our company.

It is hoped that the principle adopted of agreeing on a scale of prices for a year in advance will be continued, so that operators can, with safety, contract for coal to be delivered through the entire year, giving a uniform business to the road, and on which the company can estimate the amount of equipment that will be required, and arrange to have it furnished.

The heavy traffic on the road has made it necessary to renew some of the rails. Two hundred and seventy tons have been purchased and placed in main line during the year.

In order to have a test between iron and steel rails, fifty tons of steel rails have been purchased and placed in sidings at the South Depot, where the heaviest wear occurs of any part of the road. The result, so far, is largely in favor of the steel. Both the iron and steel rails above referred to have been charged to road repairs. During the present year quite an amount of iron or steel rails will be required for renewal.

During the year the masonry for the bridge at Walnut Creek has been built, and a combination bridge, built by McNairy, Claflin & Co., Cleveland, placed on the same, the entire structure costing $13,500.

The large amount of equipment required for the business of the road made it necessary to procure machinery and power to keep up the repairs, in place of having the work done at private shops as has been done since the opening of the road. Contracts were made with the Columbus Machine Company for the power, and with the Niles Works, of Cincinnati, for the machinery, to the amount of about $12,000, which are now in use, and will have to be increased as the business increases.

During the year valuable additional grounds have been purchased at Columbus, and one car house (for repairing) and a store-house built. Some fencing has been done, and quite an amount

of material has been contracted for to be used this season.

In order to meet the expenditures for equipment, additional sidings, shops and machinery made necessary by the increase of business, and to pay off the floating debt of the company, so as to be able to pay to the stockholders the net earnings of the road, the board, on the 16th of September, resolved to borrow one million dollars, and secure the same by a mortgage on its entire property. Accordingly, an issue of one thousand bonds of one thousand dollars each, payable in twenty years from January 1, 1872, was made, three hundred of which bonds being set apart for the redemption of a like amount, and the whole amount of the bonds issued on the Straitsville Branch. The consent of a majority of the stock of the company was obtained and placed on record.

About $250,000 of the above bonds have been sold by contract for the purchase of equipment and for cash. The balance will be used as the necessities of the company shall require.

It is hoped that the working expenses can be kept under fifty per cent., as has been done since the opening of the road, which is shown in the report of the Superintendent; but in that regard much will necessarily depend on the rates at which the business of the road shall be done. We are encouraged to hope that the rates can be maintained, as they are not only lower than those of a majority of the coal roads of the country for coal transportation, but are sufficiently low to compete successfully with the transportation on the Canal.

In submitting this report your Board can not but congratulate you on the steadily increasing value of your property. They regard the permamanent success of the road as established.

The company own 16 locomotives, 8 first-class passenger, 1 passenger and baggage combined, 3 baggage, 490 eight-wheel coal, 60 box and 50 flat cars; while that owned by private parties, and running on the road, consists of 357 eight-wheel and 100 four-wheel coal cars, which, with the small number of cars furnished by connecting roads, does not supply the demand. The company also own 8 caboose cars for freight trains, 16 hand and 10 small dirt cars. Miles run by passenger cars, 214,414; by baggage cars, 95,143; by freight cars, 3,666,435—total, 3,975,992. Mileage of locomotives, 348,437. Number of passengers carried east, 67,456; do. west, 75,144—total, 142,600. Pounds of coal forwarded, 605,532,485. Tons of pig iron transported, 16,086. Pounds of freight carried east, 69,098,035; do. west, 700,682,056—total, 769,780,091.

The St. Joseph Bridge.

An act to authorize the construction of a bridge across the Missouri river at or near St. Joseph, Missouri.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for "The St. Joseph Bridge Building Company," a corporation organized for that purpose under the general corporation laws of the State of Missouri, to construct a bridge across the Missouri river at or near Saint Joseph, Missouri, and to lay on and over said bridge railway tracks for the more perfect connection of any and all railways that are now, or which may hereafter be, constructed to the Missouri river at or near Saint Joseph, or to the river on the opposite side of the same, near Saint Joseph, and build, erect, and lay on and over said bridge ways for wagons, vehicles of all kinds, and for the transit of animals, and to provide ways for foot passengers, and to keep up, maintain, and operate said bridge for the purposes aforesaid; and that when said bridge is constructed, all trains of all railroads terminating at said river, and on the opposite side thereof, at or near Saint Joseph, Missouri, shall be allowed to cross said bridge for reasonable compensation, to be made to the owners of the same, under the limitations and conditions hereafter named. The owners of said bridge may also charge and receive reasonable compensation or tolls for the transit over the said bridge of all wagons, carriages, vehicles, animals, and foot passengers.

Section 2. That any bridge built under the provisions of this act may, at the option of person or persons, or corporation building the same, be built as a drawbridge, with a pivot or other form of draw, or with unbroken or continuous spans: *Provided*, That if the same shall be made of unbroken continuous spans it shall not be of less elevation in any case than fifty feet above extreme high-water mark, as understood at the point of location, to the bottom chord of the bridge, nor shall the spans of said bridge be less than three hundred and fifty feet in length, and the piers of said bridge shall be parallel with the current of the river, and the main span shall be over the main channel of the river and not less than three hundred feet in length: *And provided also*, That if a bridge shall be built under this act as a drawbridge, the same shall be constructed as a pivot drawbridge, with a draw over the main channel of the river at an accessible and navigable point, and with spans of not less than one hundred and sixty feet in length in the clear on each side of the central or pivot pier of the draw, and the next adjoining spans to the draw shall not be less than two hundred and fifty feet; and said spans shall not be less than thirty feet above low water mark, and not less than ten feet above extreme high water mark, measuring to the bottom chord of the bridge, and the piers of said bridge shall be parallel with the current of the river: *And provided also*, That said draw shall be opened promptly, upon reasonable signal, for the passage of boats whose construction shall not be such as to admit of their passage under the permanent spans of said bridge, except when trains are passing over the same, but in no case shall unnecessary delay occur in opening the said draw during or after the passage of trains: *And provided further*, That the corporation building said bridge may, if not unauthorized by the provisions of its charter of incorporation, enter upon the banks of said river, either above or below the point of the location of said bridge, for a distance of seven miles, and erect and maintain breakwaters or use such other means as may be necessary to make a channel for said river, and confine the flow of water to a permanent channel, and to do whatever may be necessary to accomplish said object, but shall not impede or obstruct the navigation of the said river; and all plans for such works or erections upon the banks of the river shall first be submitted to the Secretary of War for his approval.

Section 3. That any bridge built under this act, and according to its limitations, shall be a lawful structure, and shall be recognized and known as a post-route, upon which, also, no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States than the rate per mile paid for their transportation over the railroads or public highways leading to the said bridge.

Section 4. That in case of any litigation arising from any obstruction, or alleged obstruction, to the free navigation of the Missouri river, at or near the crossing of said bridge, and caused or alleged to be caused thereby, the cause shall be commenced and tried in the district courts of either judicial districts of Missouri or Kansas in which the said bridge or any portion of such obstruction touches; and the right to alter or amend this act so as to prevent or remove all material obstruction to the navigation of said river by the construction of said bridge is hereby expressly reserved, and all such alterations, when required by law, shall be made at the expense of said bridge company; and the plan on which such bridge is intended to be built, and shall be built, shall be first submitted to and approved by the Secretary of War.

Section 5. That the Saint Joseph Bridge Building Company, after the passage of this act, shall not have the right to assign the charter which said company now holds by assignment from the Saint Joseph and Denver City Railroad Company, and which was granted to said last named company by virtue of an act of Congress, approved July fourteenth, eighteen hundred and seventy, to any other company, person, or persons; nor shall said bridge building company be permitted, under the said charter so obtained as aforesaid, from the Saint Joseph and Denver City Railroad Company, to construct any other bridge than the one now being constructed at Saint Joseph, Missouri.

Approved, March 5, 1872.

☞ The Upper Hudson and Schuylerville Railroads have been consolidated, and will be leased for a term of years by the Delaware and Hudson Canal Company. D. A. Bullard is President of the new road.

☞ The official returns of the Union Pacific Railroad shows that the gross earnings for February were $534,115 and the expenses $392,354, making the net earnings $141,761.

From the Missouri Democrat, March 27.

Tax on Railroad Receipts.

LEGALITY OF THE CONVENTION ORDINANCE OF 1865.

The North Missouri Railroad Company, Mr. M. K. Jesup vs. Constantine Maguire.

OPINION OF THE SUPREME COURT.

This case comes here for review on appeal from the St. Charles Circuit Court, before which the parties voluntarily appeared, submitting the matters in controversy between them on an agreed statement of facts. The court entered judgment for plaintiffs, and it is to reverse that judgment that this appeal is prosecuted.

Whilst some minor and incidental matters have been discussed, the real questions presented by the record all resolve themselves into one, namely, the validity of the convention ordinance of April, 1865, relating to railroad indebtedness. The first section of the ordinance and all that is material to be here noticed, provides that "there shall be levied and collected from the Pacific Railroad Company, the North Missouri Railroad Company and the St. Louis and Iron Mountain Railroad Company an annual tax of ten per centum of all their gross receipts for the transportation of freight and passengers (not including amounts received and taxes paid to the United States) from the first of October, 1866, to the first of October 1868, and fifteen per cent. thereafter; which tax shall be assessed and collected in the county of St. Louis, in the same manner as other State taxes are assessed and collected, and shall be appropriated by the General Assembly to the payment of the principal and interest now due, or hereafter to become due, upon the bonds of the State, and the bonds guaranteed by the State, issued to the aforesaid railroad companies."

The tax specified in the ordinance was to be collected from each company only for the payment of the principal and interest on the bonds, for the payment of which each company was liable, and whenever such bonds and interest were fully paid, then no further tax was to be collected from the company.

The objections urged against these ordinance, and contained, in the argued case, are that it is unconstitutional; that it violates the Fifth and Seventh amendments to the Constitution of the United States, and it is also opposed to that provision which declares that no State shall pass any law impairing the obligations of a contract.

The position assumed that the ordinance is invalid because it is repugnant to the amendments designated, cannot be maintained. By a series of adjudications in the national courts it has been definitely settled that these amendments are limitations of power on the general government, and have no application to the States.

In the case of Bonen vs. the city of Baltimore (7 Peters, 243) the whole question was fully considered and ably examined upon a writ of error to the Court of Appeals of the State of Maryland. The error alleged was that the State court sustained the action of the defendant under the act of the State Legislature, whereby the property of the plaintiff was taken for public use in violation of the fifth amendment. The court held that its appellate jurisdiction did not extend to the case presented by the writ of error, and Chief Justice Marshall, declaring the unanimous judgment of the court, said:

"The question presented is, we think, of great importance, but not of much difficulty. * * * The Constitution was ordained and established by the people of the United States for themselves, for their own government, and not for the government of the individual States. Each State established a constitution for itself, and in that constitution provided such limitations and restrictions on the powers of its particular government as its judgment dictated. The people of the United States framed such a government for the United States as they supposed best adapted to their situation, and best calculated to promote their interests. The powers they conferred on this government were to be exercised by itself, and the limitations in power, if expressed in general terms are naturally, and we think necessarily, applicable to the government created by the instrument. They are limitations of power granted in the instrument itself, not of distinct governments framed by different persons for different purposes." And, in conclusion, after a thorough examination of the several amendments which had then (1823) been adopted, he observes: "These amendments contain no expression indicating an intention to apply them to State governments. This court cannot so apply them." * * *

The plaintiff here, the North Missouri Railroad Co., made default in the payment of the interest on the bonds guaranteed by the State, and by the provisions of an act of the Legislature, approved February 16, 1865, entitled "an act to provide for the completion of the North Missouri Railroad and its west branch, and for the construction of a bridge over the Missouri river," the mortgage or first lien of the State was released for $4,350,000 (the amount which the State had guaranteed for the company) and made a second lien, in order that $6,000,000 of first mortgage bonds might be placed upon the road to complete it and build the bridge. The act also provided for the appointment by the Governor of a fund commissioner for the company to receive all moneys belonging to the company and to disburse the same as follows:

First. To said corporation the amounts required from day to day for the actual, current expenditure in operating said railroad and carrying on the ordinary business of said corporation.

Second. The amount of his salary as such fund commissioner in monthly instalments.

Third. The interest upon said mortgage as the same should fall due.

Fourth. The cost of construction and equipment of the said railroad.

Fifth. The accruing dividends on preferred stock, not exceeding six per cent. per annum thereon, in accordance with the provisions of the act in relation thereto.

Sixth. The interest due on the outstanding bonds of the State of Missouri, previously loaned to the company.

Seventh. The payment of the principal of the first mortgage bonds, or if none should have become due, then to the payment of the principal of the bonds of the State; and

Lastly. The balance to be paid to the corporation.

The ordinance was adopted by the people in June, 1865, after the passage of the legislative enactment, and after its acceptance by the company. It is now claimed by the plaintiffs that the act of February, 1865, was a contract between the State of Missouri and the North Missouri Railroad Company, and that the ordinance levying a tax on the gross receipts of the railroad company was in direct violation of the contract, because the State's lien was postponed to the lien of the first mortgage authorized by that act, and it was expressly provided that the interest on the first mortgage so created be paid to the Fund Commissioner, out of the earnings of the road, in the third class of disbursements, and the interest on the lien of the State—the sixth class of disbursements; that the ordinance requiring a tax of ten per cent. on the gross earnings to be paid to the State was in violation of the distribution of the earnings provided for by law, and an attempt on the part of the State to make itself a distributee—the first class.

It is readily admitted that the law of 1865, was a contract, and within the protection of the Constitution of the United States, and the State, after the acceptance of that law by the corporation, could not by an act, except the extinguishment of the mortgage thereby authorized, resume the position of first mortgagee. But is there anything in the act to prevent the State from exercising the sovereign power of taxation? The act does not pretend to grant exemption from taxation in express terms, and the courts will never presume or infer that the State intends to abandon or surrender the important right of taxation. Whatever restrictions may have been imposed by the adjudications of the national tribunals on the sovereign right of the States to exercise this vital power of taxation untrammeled, in cases where the State had parted with the right for a valuable consideration, yet all the courts proclaim that the abandonment of the right can never be presumed—that the intention to abandon must appear in the most clear and unequivocal terms. Nor can their be any donbt of the power of the State, by reason of its sovereignty over the whole subject of taxation, to impose taxes on property previously exempt, or to raise the rates unless there has been some express contract in limitation of this power upon a consideration deemed to be a part of the value of the grant or the charter. * * *

It is also argued that the tax is unequal, and is therefore opposed to the clause in the Constitution which enjoins a uniform rule as to the imposition of taxes on all property. But it must be observed that the ordinance which we are considering is a part of the Constitution itself, expressly made so by its provisions on its adoption by the people. It is, therefore, a part of the fundamental law of the land. Of course it must stand as well as any other part of the Constitution, and cannot be nullified by the more general provisions of the same instrument concerning the powers of the Legislature in reference to the general subject of taxation.

We have thus far assumed that the assessment provided for in the ordinance came within the scope and character of taxation. But the point is taken and advanced by the plaintiffs that it is not a tax, that it amounts to a sequestration of property for the purpose of paying a debt, and has none of the criteria or element of a tax. The question then arises, is the burden thus imposed by the people on these corporations a tax within the proper meaning of that term, as legally defined? "Taxation," says Chief Justice Marshall, "is said to be an absolute power which acknowledges no other limits than those expressly prescribed in the Constitution, and, like sovereign power of every description, is trusted to the discretion of those who use it." (McCulloch vs. Maryland, 4 Wheat., 429.)

In the case of Glasgow vs. Rowse, (43 Mo. 498,) it was said, "taxes are burdens or charges imposed by the legislative power upon persons or property to raise money for public purposes or to defray the necessary expenses in administering the government," A tax differs materially and essentially from a debt. The one is founded on contract; the other is not. A law which specifically appropriated the property of the citizen, and took it from one person and transferred it to another, would not be an exercise of the taxing powers, no matter by what name it was called. To settle and fix the line of demarcation is a matter of great and perplexing difficulty; but mere oppressiveness in tax laws is no ground for setting them aside, or arresting their operation. (Glasgow vs. Rowse supra.)

The power of the sovereign authority to tax is unlimited, and is a power to destroy. The only restraint is in the responsibility of those in whom the power is intrusted. Thus in the People ex rel Griffin vs. the Mayor of New York (4 Coms. 419, 423) it was held that the two clauses of the Constitution, which declare that no person shall be deprived of his property without due process of law, and that private property shall not be taken for public use without just compensation, have no application to the taxing power. It was also decided in that case, that the power to tax implies a power to apportion the tax as the Legislature shall see fit, and that the power of apportionment has no limit where there is no Constitutional restriction. * * * Redress against unjust taxation must be sought in the same way, and no other, as redress against unjust and oppressive legislation in the general enactment of laws is sought.

The judical department of the government furnishes no redress in such cases. There is no oppression in a legislative act, except where, in the attempted injustice or oppression, some constitutional provision is violated. * * *

It is admitted by the agreed case that the bonds of the corporation are outstanding, and have never been paid. But the agreed case nowhere finds

that the ten per cent. tax levied upon the gross earnings of the road decreased the fund to such an extent as to endanger the prompt payment of interest on the preferred bonds in any manner, or to shut out any of the distributees prior in order to the claims of the State for interest.

I cannot therefore see that the ordinance is obnoxious to the charge of imparing the obligation of a contract, and I think also that it provides for nothing more than the legitimate exercise of the power of taxation.

As to whether there was any informality in the matter of making the assessment, need not be discussed. If the ordinance was valid, the assessor had jurisdiction, and in such a case, the collector cannot be held responsible for any informal or irregular proceeding of the assessor.

It follows, therefore, that the judgment of the Circuit Court must be reversed.

Judge Bliss concurs. Judge Adams was not a member of this court when this case was argued.

DAVID WAGNER.

Miller's Platforms, Couplers and Buffers.

The most careless reader of the daily papers of the present age must have been forcibly reminded at times, of the apparent carelessness, or rather, low estimate placed upon the value of human life by the public at large. Take the thousand and one hideous accidents, recorded by the historical record of the press, for one short year, and it would make a bulky volume, filled with tales of suffering, misery and horrible deaths. The every day reader of the daily paper long ago has become calloused by the oft repeated tale of accidents, which are so much alike in their ghastly monotonousness, that a new horror must be gigantic in its desolation, and heart-rendering in detail to ensure more than his passing attention.

There are so many ways for sending poor humanity across the border, in this wonderful America, that it would take volumes to elucidate them all, but of all accidents, the one most prolific in horrors, is the railroad accident. Year after year rolls on, thousands are crushed out of existence, burned alive, or else crippled to a living death by its cruel and criminally careless causes, but the public does not complain, except in a feeble spasmodic way, and accepts the results of bad railway management, as the necessary results of the present railroad system.

The wealthy corporations, which ostensibly were organized for the benefit of the public, have too long regarded its safety as a matter of trivial importance, in comparison with the draining of its pockets to accrue to their vast Aladdin growing wealth. The times are changing. The subject of safety is beginning finally to be discussed, and great and ingenious minds have been set to work to try and alleviate some of the greatest evils at least. Already marked improvements have been noted, and leading railroads have made use of them. When the important evils are remedied, then the minor ones may be attended to; and in time American railroads may do a more exclusive business of passenger transit. That is confine their carrying trade to stations in this world, and run not quite so many through trains to the Beyond.

Over three-fourths of the railroad accidents arise either from "telescoping" or "oscillation." These causes for accident are a peculiar outgrowth of the American railway system. They are unknown in other countries. Naturally one might desire to inquire into the nature and cause of the "telescoping," and its twin aid to death and destruction "oscillation."

First as to telescoping. This term is familiar to every reader of accounts of railway accidents. It is caused by the infirm, imperfect, means used in coupling cars. Under the old method of coupling, when two cars are brought forcibly together, as in a collision, the platform of one of the cars coming together is inevitably broken, and the car raised up and sent through the advancing car, after the manner of a closing telescope, gliding within its slides.

The terrible results of life and limb by such telescoping is too well know to need any comment. A new pattern of coupling recently invented by an old railway man, will when universally used make the word "telescoped" obsolete in reference to railway accidents. Constructed upon strictly mechanical principles to guard against this form of accident, this new coupling is eminently successful. For eight years the coupling has been introducing itself. During that time it has been adopted by over 100 railroads, and cars upon those roads are never telescoped. Thus one of the greatest causes of railroad slaughter is obviated.

Now as to the other "oscillation." Col. EZRA MILLER is the benefactor, who has done so much for the safety of the public, and he, in speaking of the direct causes of railroad accidents, opens the eyes of the public to the dangers arising from oscillation, that they perhaps never dreamed of. The old system of coupling is of so loose a nature that oscillation could never have been prevented without a new method being used. Oscillation is technically described as the lateral vibration of the cars of a train in motion. That is the swinging motion of the train. Each car has an independent motion, which beginning at the first car increases to the last. When at a high speed the position is always dangerous under the old system of coupling. The dangers of this motion is felt the greatest on levels, in long trains and at high speed, and on down grades, where the shock in the couplings is greatest. This is particularly dangerous for the rear cars, and the jumping of cars from the track while running at a high rate of speed, too often smoothed over by the story of a broken rail, or the like, is another one of the list of causes of railroad horrors.

Now, the Miller coupling obviates all this. It connects cars in such a manner, that there is no jerk in starting. The whole train gently moves. In motion the car is quiet as a parlor, and stops as quietly as it starts. Then its connection is automatic, and no danger is possible to the brakeman. Its many good qualities can be summed up briefly as follows: Its practical test for eight years, as to its saving millions of property and thousands of lives, are the only demonstrations necessary to their proof;

1, The platforms are held in a plane with the sills of the cars; 2, the platforms cannot be broken by any ordinary accident; 3, telescoping is impossible; 4, any required compression may be obtained to prevent accidents by oscillation; 5, no links and pins are required, and no one is required to go between cars to couple them; 6, the platforms may be held as close together as desired; 7, by close coupling the train is shortened; 8, they may be uncoupled without "shutting off," to make a flying switch; 9, telescoping and oscillation are impossible; 10, the great steadiness produced by them make sleeping cars desirable; 11, no person can fall between the cars when coupled.

The above are a few of the good qualities of "Miller's Trussed Platforms, Compression Buffers, and Automatic Couplers." The best roads are all using them. The Missouri Pacific Road here at home has wisely adopted them of late, and earnest commendatory letters from the leading officers of the Chicago, Rock Island and Pacific Railroad Company; Kansas City, St. Joe, and C. B. R. R.'; Chicago Burlington and Quincy; Michigan Central and all the leading Eastern roads, speak volumes in its favor. The time is not far distant when the public will refuse to ride on roads that refuse to care for its safety by the use of this great improvement.—*St. Louis Jour. of Com.*

☞ The Great Western Railway Company of Canada have leased the London and Port Stanley Railway.

Frederick and Pennsylvania Line Railroad.

The Westminster (Md.) *Advocate* says that "the bridge and trestle work spanning Little Pipe creek and the meadow lands of Samuel and Frank McGinnis, on the Frederick and Pennsylvania Line railroad, are complete and ready for the track. This is a magnificent structure, and is an honor to the company and its projectors. Mr. Hayden, engineer, and W. Bollman, contractor and builder. The entire length is 705 feet, the bridge proper is of wrought iron and 135 feet span, deck of bridge 60 feet above low water.—The trestling is of rolled iron plates, forming six angular tubular columns, securely riveted together, and apparently of great strength. The trestle consists of 19 spans, eleven on the Frederick and eight on the Carroll county side of the creek. All things considered, this is one among the most picturesque structures of the kind in the United States.

Ontario and Quebec Railway.

This proposed line is to run from the city of Toronto through or near Peterborough, Madoc and Carleton Place, to the city of Ottawa, and across the Ottawa River into the Province of Quebec, to effect a junction with railways in that Province, and to unite, amalgamate, and make running arrangements with railway lines in the Province of Ontario, situated upon the line authorized to be constructed. The company may be permanently organized so soon as $50,000 of stock is subscribed and ten per cent. thereon paid in. The estimated distances between the following places is as follows:—Toronto to Peterborough, 90 miles; Peterborough to Carleton Place, 126 miles; Carleton Place to Ottawa, 28 miles; Total from Toronto to Ottawa, 244 miles. The line proper extends only from Peterborough to Carleton Place 126 miles.

☞ The Omaha (Neb.) *Herald* says two new railroad lines are proposed from Denver, Col., to the eastward. The first is for a narrow gauge branch of the Union Pacific diverging therefrom at or near Julesburg, and following up the valley of the Platte to Greeley or Evans; thence to Longmont, and through the Boulder coal fields to a point of junction with the Colorado Central, about midway between Denver and Golden. The other plan is to build a wide gauge road from either Julesburg or Fort Kearney to Denver, leaving the valley of the Platte about the mouth of Beaver Creek, and striking straight for Omaha, making the shortest practicable route to Chicago and the East. At Kearney it would unite with the Burlington and Missouri road, and with two or three others that are being rapidly pushed to that point.

☞ The directors of the Baltimore and Ohio Railroad Company have declared a dividend of five per cent. upon the capital stock of the Main Stem, payable, free of tax, on and after the 1st of May, at the Merchants' National Bank of Baltimore. Also a dividend of five per cent. on the capital stock of the Washington Branch, payable, free of tax, at the same place on the 17th of April.

☞ The Lindsay (Ca.) *Warder* says that $150,000 stock in the Lindsay, Fenelon Falls and Ottawa Railway, has been subscribed, and ten per cent. thereon paid into the bank.

American Railroad Journal.

Saturday April, 20, 1872.

Stock Exchange and Money Market.

Money has been in less urgent request since our last. Lenders have been somewhat more liberal of aid, and rates have been working rather more favorably for the borrowing interests, with call loans quoted at from 7 per cent. currency to the same rate in gold, with in many cases an additional of $\frac{1}{32}$@$\frac{1}{16}$ for the turning of stocks, closing on the basis of the legal tender rate in currency to the Government houses, and about the same rate in gold to the Stock brokers. Mercantile credits were rated at from 8@10 per cent. per annum for the best grades. Yet the market was by no means an easy one for needy operators, against whom unusual discrimination was made. The speculative manipulations of the supply were less distinct and influential, but there was a sufficiently active inquiry for accommodation to enable lenders to realize very full rates on their advances. The U. S. Sub-Treasury office increased both its coin and its currency reserves quite fairly. The city banks reduced their loan and discount average about 4⅛ millions during the week, and their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $4,451,806, and a coin reserve, of $69,728 531.

The city banks, in their latest return, show a reduction of $1,866,409 of legal tender notes, $381,700 of specie, and $7,778,400 of deposits; $4,129,100 in their loan and discount averages, and $27,700 in their item of circulation. The city bank exchanges, last week, averaged $125,918,172 and thus far, this week, about 126½ millions daily. The bank now hold only $892,175 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,382,400, against $15,712,954 same time last year. The city bank deposits are now $193,287,100, against $214,725,638 week ending April, 15 1871. The legal tender reserve amounts to $36,828 800, against $52,534,143 same time last year. The circulation now stands at $27,987,000 against $31,646,127 same time last year. The loans are now $274,354 300 against $285,580,566 at this date last year.

The coin reserve of the city banks is now about 19⅜ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 36⅞ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury enlarged its currency balance $617,188, and its coin reserve $778,688 as the result of the week's business. The receipts of the office were $4,182,374 in coin, and $4,595,035 in currency; payments, $3,403,735 in coin, and $3,977,488 in currency. The office received $3,524,000 in coin or its equivalent, from customs; and disbursed $205,573, of coin interest.

Government revenues yielded moderately through the week. The excises yielded within the week about 2½ millions, and thus far since July 1, 1871, $101,800,576. The customs at the port of New York last week were $3,464 746; at the outports, equal to about $1,150,000 more, all in coin, or coin certificates.

The cash balances in the Treasury Department at the close of business on Monday were: Coin, $124,064,191; currency, $9,102 961. Coin certificates were outstanding for $27,108,500.

Gold has been in more confident speculative demand and quoted stronger as to price, though closing irregularly. The customs call was up to a full average; while the export movement was rather limited.

The range of the price during the week has been from 110¼@111⅛ and the closing quotation on Wednesday was 111 against 110⅜ the preceding Wednesday. The specie outflow, last week, was $471,023. The Gold Exchange Bank clearances have averages about 23⅞ millions per day during the week.

The customs demand for Gold last week, averaged $587,384 a day; thus far, this week, it has averaged $522,000 a day, or equal to a weekly aggregate of $3,132,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $2,100, and since Jan. 1, 1872, $578,316 against $2,907,667 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $127,322,799 against $117,895,068 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to April 18, 1872, $62,480,515, against $67,124,578 same time in 1870-'71.

The export drain of specie was $471,023 last week, against $1,690,422 same week preceding year. The shipments since July 1, 1871, have been $29,302,403 against $58,060,722 same time in 1870-'71.

Under the Treasury programme for April, Government proposes to sell Gold as follows: Thursday, April 25—One Million. And to buy in U. S. bonds as follows: Wednesday, April 24—One Million.

Foreign Exchange has been in better request closing more firmly. Bankers' sixty day bills on London closed on Wednesday at 109¼@109⅜; sight bills on London, 110⅛@110¼.

The produce exports from this port, week ending with April 16, were to the currency value of $3,820,952.

Government securities have been more actively sought after and have advanced in price, on lighter offerings.

U. S. sixes of 1881 closed here on Wednesday of the current week at 116@116⅛; U. S. Five-Twenties of 1862, (other than the bonds called in) 113¾@113⅞; U. S. Five-Twenties of 1864 at 113¾@113⅞; U. S. Five-Twenties of 1865, 114⅛@114⅝; U. S. Five-Twenties of 1865 consolidated. 112⅝@112¾; U. S. Five-Twenties of 1867, 113¾@114; U. S. Five-Twenties of 1868, 114 114¼; U. S. Ten-forties at 109⅛@109¼; U. S. Fives of 1881 (Funding Loan) 111@111⅛; Six per cent. currency bonds, 115¾@115⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 3.	April 10	April 17.
Consols	93⅛	92⅝	92⅞
U.S. 5-20's of 1862..	92¾	92¾	*90⅛
U. S. 5-20s, 1865....	94	94	——

" 10-40s	89¼	89¼	89⅛
Erie	54	54½@55	——

*Ex May interest.

State bonds have been in more general demand, and rather stronger in price, though closing irregularly.

The better class of Railway Bonds, have met with increased favor from investment buyers, and the older issues quoted scarce and strong in price. Central Pacific Sixes have been in good request, closing firmly at 101⅝@101¾. Chesapeake and Ohio have been more sought after at 94 per cent. and accrued interest.

Railway and Miscellaneous share property, has been fairly active, but variable as to price, though closing more firmly in the instances of the leading speculative favorites.

In the Metal line, Ingot Copper has been firm as to price, on quite moderate offerings and a fair inquiry; sales, 500,000 lbs. for Summer delivery at 35½c.@36c., and small lots on the spot at 45c. per lb. Iron has been in limited supply, and held with decided confidence, checking business; sales, 50 tons Glengarnock Pig, at $55; 400 tons Wrought Scrap, to arrive, and 300 tons old Rails, on private terms. Values remain fully as before quoted. No. 1 American, Pig closed at $51@$52; English Rails, $74@$76, gold; and American do., at the works, $83@85, Currency. Pig-lead is dull on the basis of $5 90@$6 for ordinary foreign. Foreign Spelter is quoted steady at 7⅛c.@7⅜c., gold, per lb., but is without animation. Pig Tin is held firmly, though now reported quiet, with Straits quoted at 42¼@42½c., Banca at 50c.@52c., and English at 42c.@42½c., gold, per lb. Tin plates have been less active, but quoted strong in price, with sales reported of 500 boxes, 14x20 Coke at $12 50, gold per box. Zinc at former figures.

General business has been on a moderate scale, in most lines of domestic produce. Breadstuffs have been quoted weaker and irregular. Provisions closed generally in favor of buyers. Petroleum and Naval Stores stronger. Middling upland cotton closed on Wednesday at 23⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,505,825 bales, against 3,459,217 bales same time in the preceding year; exports 1,650,888 bales against 2,445,102 bales in the previous year; stock at the ports at latest dates, 355,272 bales against 557,325 bales same date 1871.

At the Live Stock Markets, Beeves have been in more demand at 9½@13½ cts.; Veals at 5@9 cts.; Sheep at 4½@10½ cts. Swine, at 4⅞@5½ cts. per lb., all live weight. The week's receipts were 4,713 Beeves, 2 475 Veal Calves, 18,320 Sheep and Lambs; and 22,437 Swine.

Foreign merchandise has been in moderate request. Sugars and Coffee have been quoted a shade cheaper. The week's imports of foreign goods reached the amount of $10,670,650 including $2,767,892 of dry goods.

Ocean freights have shown rather more animation, though at low rates. The later engagements indicated a somewhat firmer market.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Attention is called to the First Mortgage, Sinking Fund Land Grant Bonds of the Cairo and Fulton Railroad Co. The bonds bear interest at 7 per cent. in Gold payable in January and July. The Land Grant of 1,926,400 acres is one of the most extensive and valuable ever made to any road by Congress. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling stock and lands, and are recommended as a safe investment.

☞ A new railway line from Marseilles to Calais is projected, as the present one is insufficient to carry the great international traffic forward. The road will cost 350,000,000 of francs, and will make the jouney across France by rail about 120 miles shorter than at present.

☞ The president has signed the act granting a right of way through the public lands for the construction of a railroad from Great Salt Lake to Portland, Oregon.

CAIRO AND FULTON RAILROAD CO.

First Mortgage, Sinking Fund

Land Grant Bonds,

Due 1891 in Gold.

INTEREST 7 PER CENT. GOLD, FREE OF GOVERNMENT TAX.

Payable January 1st and July 1st, in New York.

THE CAIRO AND FULTON RAILROAD IS the main artery for travel across the State of Arkansas. It is the continuation of the St. Louis and Iron Mountain Railroad, and under the same management. It will connect the St. Louis Railroads and the Illinois Central Railroad with the International Railroad, the Southern Pacific Railroad and the Texas system of roads. Its length is 301 miles, and it deviates from a straight line but six miles. It has no grades over 15 feet to the mile. It passes through the most thriving counties and the Capital, Little Rock. The Land Grant of 1,926,400 acres "is one of the most extensive and valuable ever made to any road by Congress." The whole road is under contract for building, 52 miles are now operated, and tracklaying will go on at the rate of about half a mile a day until the connection of Little Rock with St. Louis is completed. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling-stock and lands, and are recommended as a safe investment. The officers are:

THOMAS ALLEN, (St. Louis) ..... President.
H. G. MARQUAND, (120 Broadway) .. Vice-Pres.
D. W. McWILLIAMS, (120 Broadway). Treasurer.
W. R. DONALDSON, (St. Louis) ..... Secretary.

NEW YORK DIRECTORS.

WM. H. SWIFT, HENRY G. MARQUAND,
WM. T. BLODGETT, JOHN H. SWIFT,
H. M. ALEXANDER, ALANSON TRASK.

The Union Trust Company, Trustee of the Bonds. Price 90 and accrued interest in currency. The Company reserves the right to advance the price at any time. Marketable securities received in exchange at full market rates and Express charges paid. Maps and pamphlets may be obtained on application to

H. G. MARQUAND, 120 Broadway.

☞ CHARLES W. MEAD, late Assistant General Superintendent of the Northern Pacific Railroad, under Col. Hammond—and formerly General Superintendent of the Hannibal and St Joseph Railroad—on Monday of this week commenced the duties of General Manager of the Northern Pacific Railroad, with headquarters at Brainerd, Minn.

☞ A. B. Johnson has been elected President, C. W. Hutchinson Vice President, C. E. Barnard Treasurer, and J. J. Francis Secretary and Superintendent of the Utica and Mohawk Railroad Company.

☞ The citizens of Buffalo have voted, by an overwhelming majority, to subscribe one million dollars in aid of the Buffalo, Jamestown, and Oil Creek Railroad.

THE St. Joseph & Denver City RAILROAD COMPANY'S First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO., BANKERS,

NO. 11 WALL STREET.

☞ THE CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS are among the most substantial and satisfactory Securities which we can recommend for investment. The Iron and Coal Interests along the line of the road are attracting the attention and capital of practical workers in these minerals in this country and Great Britain, and are found to be more valuable and important than those of any other section of the country.

The IRON, COAL, SALT, TIMBER, and AGRICULTURAL RESOURCES of the region which it traverses, together with the through traffic which it will command as a *short, low-grade, economical East-and-West Trunk Line*, assure an immense and profitable business.

Price of the Bonds, 94 and accrued interest from Nov. 1. Principal and interest payable in gold in New York City.

Full information furnished on application.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for Chesapeake and Ohio Bonds at their current prices.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—WAREHOUSEMEN.

The facts in the late case of Buckley *vs.* Great Western Railway Company (18 Mich. 121,) are fully and clearly stated in the following opinion by

GRAVES, J.—The plaintiffs by their declaration allege that at the time therein mentioned, the company were common carriers between London in Canada and Detroit in Michigan, and that being such common carriers, the plaintiff delivered to them three hundred barrels of flour belonging to the plaintiffs of the value of $6,000 to be safely carried and conveyed by the company from London to Detroit, and then and there by the company to be safely and securely delivered to the plaintiffs, and that the company did not nor would safely or securely carry the flour to Detroit, nor at the latter place safely or securely deliver the same, whereby it was lost to the plaintiffs.

The company having pleaded the general issue, the jury upon the trial returned a special verdict by which they found that on the 17th of April, 1866, the plaintiffs delivered of their own property to the company at London, three hundred barrels of flour to be transported by the company to Detroit and then by the latter to be delivered to the plaintiffs, as common carriers; that on the 24th of April the plaintiffs complained that the flour was unnecessarily delayed; that on the 26th of April, in the afternoon, it arrived in Detroit, and was deposited in the warehouse of the company, of which the plaintiffs were notified at half past five in the same afternoon, and that the plaintiffs then commenced receiving the flour and took away ten barrels a little after six of the same evening, which was the usual hour of closing business for the day at the depot; that it was the custom of the company to keep open after business hours to deliver goods if requested. But such request was not made in this case; that on the night of that day the balance of the flour was destroyed by fire without negligence or fault of the company; that in the ordinary course of business, the company should have delivered the flour in three days after its receipt, and was therefore guilty of negligence in not carrying it from London to Detroit with diligence.

The damages were fixed by the jury at $3,459 44, to be recovered by the plaintiffs, if the court should think them entitled to judgment upon the facts.

Upon this verdict the court below awarded judgment in favor of the plaintiffs, and we are required to determine whether in this there was error.

The company object to a recovery against them upon two grounds. *First*, that their duty as carriers had ceased at the time of the fire; and *second*, that the delay in conveying the flour to Detroit, as found by the jury, will not support the judgment.

It is proper to observe that this is a special verdict, formally sufficient, and which we are required to examine according to the settled rules applicable to such proceedings. We are not permitted to assume any facts not therein stated, or to infer any from those found, but must take the finding as the jury have made it, subject however to the allegations in the pleadings. Street *vs.* Roberts, 2 Sid. 86.

A strict observance of the law on this subject was required of the court below, in order to preserve the relative powers of the court and jury; and this court, having neither original jurisdiction nor authority to ascertain facts by inference, or to presume any not actually found, should sedulously endeavor to avoid any infraction of these rules.

An opposite course would favor confusion of the separate functions of court and jury; would tend to subvert a vital distinction between original and appellate jurisdiction, and would imply an assumption of right in this court to go behind the record to which the law has carefully confined us.

On recurring to the declaration, it is very obvious that the plaintiffs have not counted on delay in the carriage of the flour, while the verdict, when coupled with the pleadings, and restricted by them, as it must be, denotes very clearly that the real ground of complaint against the company was the non-delivery.

It is alleged in the declaration that the company assumes to carry and convey safely, and, thereupon, safely and securely to deliver; and, if this were taken in the broadest sense, instead of most strictly against the pleader it could not be considered as averring a delay or undertaking to carry within any particular time.

Admitting it to be one of the duties of the carrier to transport without unreasonable delay, the neglect of that duty could not be a ground of recovery against him, without an averment to express and charge the duty, and the assignment of a breach of it.

I am therefore of opinion that for this reason, without suggesting others, the plaintiffs could claim no right to recover for the negligent delay in carriage which seems to have occurred.

It remains to inquire, whether a recovery upon this record was authorized on the ground of non-delivery.

The undertaking of the company, as common carriers, to transport the plaintiffs' flour from London to Detroit, and to deliver it safely and securely at the latter place, to the plaintiffs, was distinctly alleged; and the jury as distinctly found this allegation to be true. It is likewise alleged that, by the negligence and default of the company in the premises, the flour was lost to the plaintiffs; and the jury found that the carriage to Detroit took place, but that the flour after reaching the warehouse of the company at the latter place, was, with the exception of ten barrels removed by the plaintiffs, destroyed by fire in the warehouse in the following night. These findings taken by themselves supported that part of the plaintiffs' case based on non-delivery, and established a *prima facie* right in the plaintiffs to recover for the property destroyed.

The flour, according to the record before us, having been received by the company, and apparently in their character of carriers, simply for transportation to Detroit, and delivery to the plaintiffs at that place, it was for the company to show that the non-delivery, or the loss at their warehouse, which made delivery impossible, proceeded from causes, or was marked by circumstances, which relieved them from the liability imputed by the plaintiffs.

Having come under the responsibilities of carriers by receiving in that character, and ostensibly in that character only, the property for transportation and delivery, these responsibilities must have necessarily continued until delivery, or the occurrence of some event which the law would consider as sufficient to excuse it.

Recognizing the necessity of meeting the case thus made against them, the company take the position that a circumstance did occur, that an event did take place which relieved them from liability for the loss of the property.

They claim that, inasmuch as the flour had reached their warehouse or depot in Detroit, and had been by them deposited therein, their responsibility as carriers was by such act exchanged for their responsibility as warehousemen, and in which character of course they would not be liable.

No question arises in the case as to the necessity of notice, as that was, in fact given, and the verdict contained no facts which will enable us to judge of the effect of the notice, in respect to the right of the company to shift the character of the bailment. It must be assumed that no such facts existed.

That the same party may be both carrier and warehousemen at the same time, cannot be disputed; but the two employments, if carried on by one party, must after all be as separate and distinct in quality as though they were pursued by different parties, and their functions cannot be so commingled as to attach to the same property at the same time. This is made evident by the diversity of duties and responsibilities of the two employments, and the nature and incidents of the business; and the ground taken by the company that the custody was passed from and by them in the character of carriers to themselves in their character of warehousemen, and that this saved them from liability, is an admission of the ample nature of the distinction. Indeed, the difference is quite as striking between the quality of carrier and that of warehouseman, as between a party in his personal capacity, and in that of administrator.

As, therefore, the two characters are completely distinguishable, though belonging to the same party, it seems a necessary result that an engagement or agreement, ostensibly in the one only, does not by necessity imply any engagement or employment in the other also.

The circumstance that a party acts generally as a carrier, or being such, assumes in a given case to handle property apparently in that character only, can no more imply that an agreement has been made with him to deal with the property as a warehouseman, than will an engagement with a warehouseman to store goods imply a contract with the latter to act as carrier. And the agreement by the carrier to transport goods can never by itself involve an agreement with him that he may reduce his responsibility as carrier to that of warehouseman, at the end of his route by deposit in his depot. Without presuming to question the necessity of applying established principles to those cases to which they are suited, it appears to me that some of the courts in their desire to lay down general rules, have not attended sufficiently to the circumstance that carriers and their customers are still at liberty to regulate by contract, express or implied, much of the business to be done between them; and that the pro-

priety of the application of this or that legal rule must often depend upon such regulations.

The course to be pursued by the carrier, to shield himself from further responsibility in his quality of carrier when the transportation is accomplished, is not the subject of abstract law disconnected from the surrounding circumstances but is a matter depending upon contract, and to be determined by reference to the express stipulations of the parties, or the varying facts from which, when presented, the law will infer the rights, duties and obligations of the parties. When the party has taken it upon himself to act in his character of carrier in a given case, it becomes a question for the jury, upon the evidence, or for the court upon the facts when specially found, whether he also obtained the right or became obliged to act as warehouseman also in any stage of business; and the mere fact that the carrier though a railroad company, possessed a warehousing depot at the end of the route, would not suffice to raise the legal inference of a right to shift the characters by immediate deposit in the warehouse, especially if it appear that the carrier was ostensibly employed as carrier only.

If, when prosecuted for non-delivery to the consignee, the carrier would excuse himself by showing that the property was destroyed by fire, and that the destruction occurred shortly after he had changed the nature of the bailment, and exchanged his character of carrier for that of warehouseman touching the goods in question, he would have to satisfy the jury that the passage from himself as carrier to himself as warehouseman, was not simply his mere voluntary act, but one either warranted by an express contract, or a contract fairly inferrible from the nature of the business, the known necessities under which it was carried on, the established usage on the subject and the like; and in case of a special verdict it would be necessary that the express contract, if any, should be found, or if not, that the particular facts should be stated from which the law would infer the right assented by the carrier.

We have seen that the verdict in this case finds in terms that the company in the particular character of carrier undertook to transport the flour and deliver it to the plaintiffs at Detroit, while no undertaking by them as warehousemen, or any agreement by them in or for that character is found by the jury. It appears that the company were carriers by rail, and it is shown by the verdict that they had a warehousing depot at Detroit, in which they in fact deposited the flour a few hours before the fire, and that they had a custom to keep open after business hours when requested, for the purpose of making delivery, and these are the only facts in the verdict which can be claimed to warrant the legal inference of any right of the company to cast off their responsibility as carriers by deposit in their warehouse. The finding that the company undertook as carriers to transport and deliver, could not imply as matter of law the right claimed by them to change the form of the bailment by their own act of deposit in the warehouse; but in the state of this record such finding would tend rather to exclude the idea of an agreement that the company should possess the right to deal with the property of warehousemen or in any character than that of carriers; and it seems to me that the other facts taken by themselves or with those just mentioned, can afford no ground whatever to infer as matter of law the right claimed by the company. The existence of those facts appears to be quite as consistent with the absence as with the presence of the right asserted, since, for aught that is stated, a delivery at the warehousing depot without the intervention of the character of warehousemen or depository was altogether practicable, easy and usual, and was alone within the contemplation of the parties. The verdict discloses no usage or other circumstance to justify us in saying that the bailment for carriage included one for storage also, or which, in my judgment, would warrant the inference that the company were entitled to relieve themselves as carriers by the act of passing the flour from the cars to the warehousing depot. I think, therefore, the judgment of the court below should be affirmed with costs.

Illinois Central Railroad.

The statement of this Company for the month of March, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,965.48	for	$35,162 60
Acres Inter't Fund Lands Sold		for	
Acres Free Lands Sold	520.00	for	6,695 80
Total sales during the m'th of March, 1872	4,485.48	for	$41,858 40
To which add Town Lot Sales		for	320 00
Total of all	4,485.48	for	$42,178 40

Cash collected in March, 1872 ..... $72,432 85

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.

Lake Ontario Shore Railroad.

At the recent annual meeting of this company at Oswego, the President reported fifty two of the fifty-five miles of road put under contract last July, graded and ready for the ties and iron. There are two thousand tons of rails on the grounds of the company at Oswego, to be laid as soon as the frost is out of the ground. Less than $600,000 out of $1,900,000 subscribed has yet been expended, and the president gives assurance that another year will see the road completed to the Niagara River. The construction of this line is very important to Boston interests, as it is this road by which the tunnel route, when completed to Oswego, will connect with the West.

☞ Haveny & Buck have taken a contract for the construction of three miles of the Port Deposit and Columbia Railroad from the Maryland State line. McFadden has resumed work under his contract all along his sections.

☞ Thomas A. Scott has been re-elected President, Thomas N. Ashby Secretary, and B. K. Jamison Treasurer of the Shenandoah Valley Railroad Company,

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,

No. 10 Wall-St.

Our National Wealth.

An elaborate statistical *brochure*, complied by Mr. Francis A. Walker, Superintendent of the Census Bureau, contains interesting information pertaining to the wealth of the Union, obtained from the appraisement of each State and county by the United States Marshals. The amassed wealth of the whole country, according to these statistics, was in 1870 $30,068,488,507, against $16,159.616,068 in 1860, and $7,135,780,228 in 1850. It will thus be seen that notwithstanding the immense waste and loss of property during the exhausting four years war, together with the loss of $2,000,000 in slave property, the increment of national wealth during the past decade reaches a little over 86 per cent., while during the past two decades the gain has been a little more than three hundred and ten per cent! The growth of real and personal property in the leading States has no parallel in the world's history. New York greatly exceeds in wealth any other State in the Union, Pennsylvania, Ohio, Massachusetts, Illinois, Missouri and Indiana ranking next in the order written. The following table exhibits the increase of wealth in the States in the last decade:

REAL AND PERSONAL ESTATE.

States.	1870.	1860.
Alabama	$201,855,841	$495,237,078
Arkansas	156,394,691	219,256,473
California	638,767,017	207,874,612
Connecticut	774,631,524	444,274,114
Delaware	97,180,833	46,242,181
Florida	44,163,655	73,101,500
Georgia	268,169,207	645,895,237
Illinois	2,121,680,579	871,800,282
Indiana	1,268,180,543	528,835,271
Iowa	717,644,750	247 338,205
Kansas	188,892,014	31,327,895
Kentucky	614,318,552	666,043,112
Louisiana	323,125,666	602,118,568
Maine	348,155,671	190,211,600
Maryland	643,748,976	376,919,944
Massachusetts	2,132,148,741	815.237,433
Michigan	719,208,118	257,163,983
Minnesota	228,909 590	52,294,413

The true valuation of the property of the whole country it will be seen, is rising $30,000 000,000, and exceeds that of the British Isles, which is set by the eminent statistician, D. A. Baxter, at £6,-000,000,000 sterling. The two valuations differ in other particulars. In Great Britain the active capital exceeds that of the United States, the chief investments here being in land and buildings. In Great Britain, also, the returns upon investments average little more than four per cent., while in the United States they average nearly eight per cent. They differ also in this, that the debt of Great Britain is nearly twice that of the United States, and the American valuation would preponderate were the debt on each side to be deducted. A portion of our national debt is held abroad, but the yearly growth of that part abroad is more than balanced by an annual growth of $250,000,000 in our railway investments into which British iron enters. The wealth of the United States is more progressive in its character than that of Great Britain. It nearly doubles in a single decade, while that of England takes ten decades to accomplish an equal growth. This rapidity of our growth will carry the valuations further apart in the future. The foregoing figures clearly demonstrate that the material progress of the country, during the last ten years, has been extraordinary and unparalleled.—*N. Y. Shipping List.*

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 10th inst., Mr. J. W. Garrett, president, in the chair. In connection with the presentation of the report of the committee of finance, proposing the resolution for a semi-annual dividend, which had been unanimously recommended by that committee, of five per cent. upon the Main Stem instead of four per cent., as heretofore, the president remarked that it had been the policy of the company for many years to invest all its earnings, beyond the semi-annual dividends of four per cent. declared, in additional power, machinery and improvements, and in extending connections.

The pressure upon the company for increased expenditures continues heavily in view of the rapid development of its traffic and the great success of its policy in expanding the trade of Baltimore. During the last month 159 new cars, of various descriptions, and three first class locomotives were built at the shops of the company. During the year the increase of equipment required will probably be forty locomotives and 2,000 cars.

The various new and important connections of the company which have been formed and are being opened will demand large investments of capital; but as so great a sum has accumulated from the earnings which is not now represented by stock or bonds, and as, notwithstanding the advance in the dividends proposed, a large sum annually of earnings can be thus expended, it has been deemed proper, by the unanimous action of the committee, to increase the dividends as proposed by the resolution.

It is a subject of peculiar gratification to the managers of the Baltimore and Ohio Company that at a period when city taxation is so onerous, the company is enabled to extend so weighty a relief to the taxpayers of this community.

It will be remembered that the investment by the city of Baltimore in the stock of the company is $3,250,000, for which it issued its own stock, and on which it pays six per cent. Heretofore, with the eight per cent. dividends, the city has received a profit of two per cent. on this investment, making $65,000 per year; and, with the dividend increased as now proposed, (which increase it is believed can be properly hereafter continued,) the profit will be four per cent., making $130,000 a year, being a most sensible and valuable relief to the finances and property-holders of Baltimore.

It will be necessary, in order to maintain this system, to obtain by loans a large portion of the capital requisite for the future investments necessary to insure the progress and perfection of the great system of roads now managed by this company, as has been the practice generally of other railway companies, and with this object negotiations are now progressing in Europe.

The peculiar and interesting fact is thus presented that the city of Baltimore, whilst enjoying, to an extent unexampled in Europe or America, the advantages flowing from the construction of a great railway, realizes through her aid to the enterprise a large direct financial profit upon her investment.

The business of the company has grown to such proportions that the monthly disbursements for labor, materials, etc., (which are chiefly made in Baltimore and at points on its lines, which obtain their supplies from this city,) amount to $750,000. This great sum, thus continuously expended, creates activity in every branch of trade, in mercantile, manufacturing, and, indeed, nearly every character of employment and industrial pursuit connected with the prosperity and progress of the community.

It is especially gratifying that this company is thus enabled to contribute so largely to the treasury and resources of the city of Baltimore, and through the relief it affords contrast so markedly with the large losses made by the city in its investments in the Northern Central Railroad Company, and the heavy taxation connected with its investments in the Western Maryland railroad and other works.

After some further discussion, the resolutions declaring dividends of five per cent. for the six months ended on the 31st ultimo on the Main Stem and the Washington Branch were unanimously adopted.

After the close of the regular business of the board the president stated that on the 4th of October last, representing the company as joint proprieters of the Baltimore and Bremen line, he addressed the Hon. H. H. Meir, president of the North German Lloyd, urging, in view of the full and profitable employment of the steamers of that line, that it should be doubled. He stated in that communication that he "felt assured, with the rapid and important developments of the Baltimore and Ohio Railroad Company in extending and perfecting its system, that such an increased capacity and arrangements by the North German Lloyd could not fail to accomplish excellent and profitable results.

The president had the satisfaction of informing the board that whilst for the present that company has not decided to increase four steamers, as suggested by him, it has determined to add two splendid steamers for this service. The company has been advised that contracts have been effected with Messrs. Robert Steele & Co., of Greenock, Scotland, for two magnificent steamers, to cost about one million dollars, and to be of the following enlarged dimensions, viz: 351¼ feet in length, 39 feet in width, and 30½ feet depth of hold, with compound engines,—These steamers are to be fast, and in all respects of the most effective character, and to have all modern improvements. They are to be delivered in one year. Their capacity is to be about 3,000 tons, being materially larger than the present steamers of the line, and are to be named the Brunswick and the Nuremburg.

The officers of the North German Lloyd state that the route by Baltimore is being more and more appreciated by emigrants, and that whilst their company had larger interests with New York, it had not been their policy to explain the superior advantages of the line to and through Baltimore, yet by advices from emigrants who had used this route and otherwise, its great superiority was gradually becoming known throughout Germany, and the demand for tickets by the line was constantly improving and its general business increasing.

The president stated his confidence that the

line would be at an early period further enlarged. In this connection Mr. Garrett remarked that he had recently had an interesting interview with Sir Hugh Allan, the chief proprietor of the Allan line of steamers, now running between Livepool and Baltimore. The character and extent of the business with Baltimore have been very satisfactory, cargoes generally offering largely in excess of the capacity of the steamers. Within the past few weeks, arrangements have, for the first time, been made for the proper advertising of the advantages of the route in Great Britain, and the inward business of the last two steamers which have arrived has shown the valuable effects of disseminating this information. Arrangements are now being perfected by which tickets will be placed on sale at 3,300 offices in Europe, and the numerous agencies of the Baltimore and Ohio road and its Western and Southern connections will furnish through tickets via the Allan Line from Baltimore to Liverpool also.

Mr. Allan pressed again very urgently the absolute necessity of deepening the channel to Baltimore promptly. He stated that the line would be doubled in capacity as soon as the channel was deepened to twenty-five feet. The difficulties encountered by the larger ships getting from the port until this most important work is accomplished are the only drawbacks to retard the immense increase of the commerce of Baltimore. As the whole West, Northwest, Southwest and South are directly interested in the economies connected with large ships coming to Baltimore for the transportation of their exports and imports through this, their nearest and most economical route, it is trusted that this essential improvement will be no longer delayed.

Mr. Garrett then referred to the action of the board of trade and the representatives of the city in procuring from the Legislature, at its recent session, authority to submit for the decision of the people the subject of granting aid by the city of Baltimore, to the extent of $500,000, for the purpose of co-operating with the United States authorities in proceeding with rapidity in deepening this channel. He expressed his judgment to members of the board, and all interested in the prosperity of Baltimore, that they could accomplish nothing more vital to the interests of the city than to aid in every practicable form in bringing about this improvement with the least possible delay.

☞ Charles J. Peshall has been elected President, E. A. Nichols Treasurer, John J. Sumpter Secretary, and John J. Miles Chief Engineer of the Rockport and Ouachita Railroad Company. A note from the Secretary dated at Reckport, Ark., April 2, says: "We have our surveying party out on the road. The line will be surveyed and located from this point to Hot Springs by next Friday or Saturday. We intend to go ahead and grade and tie the road by the time the Cairo and Fulton reaches this point."

☞ The Waukegan, Ills., *Gazette* says that "work will be begun on the new railroad between Milwaukee and Chicago, as soon as the frost is out of the ground. Meanwhile ties are being delivered along the line. Deeds of the right of way have been made out, and the money is being paid along the route this week."

☞ J. J. Shryoch has been elected President, Henry Rawle Vice President, and G. H. McKibbin Secretary, Treasurer and Superintendent of the Shenango and Allegheny Railroad Company.

Paper Car Wheels.

The *National Car Builder* thus describes paper car wheels, the material of which is straw-board, in all respects the same as that used in the manufacture of paper boxes, and made of wheat, rye, or oat straw.

The tire is of steel, and, when turned up ready for the filling, is made taper inside, so that the inside diameter on the flange is one eighth of an inch smaller than on the other. The body of the wheel is a paper block made of straw-board, cut into circles thirty inches in diameter, pasted together with ordinary paste, and consolidated under a hydraulic pressure of about three hundred tons. This block, after being slowly dried for nearly two weeks in a dry house, is turned and fitted in a common pattern lathe. The turning tool is like that used for iron, but the speed is about the same as is used for brass. This block, thus turned to fit the tire, is of course somewhat larger, in order to insure a perfect fit. A hydraulic pressure of about four hundred tons is then used to force the block into its place. The tire is heated nearly to the boiling point of water, thus insuring a perfect bearing when cool.

When the paper block is in the lathe a suitable hole for a cast-iron hub is bored through the centre. This hub has a wide flange upon one end. Covering the whole of each side of the wheel are two side plates of Norway iron boiler plate, which fit against a shoulder turned in the tire. The hub is forced in after these plates are in place, the flange, on its outer end, of course, holding the outside plate firmly in its place. Sixteen bolts in the outer edge of the plates run directly through the paper, and hold everything fast; eight bolts go through the flange of the hub, securing the whole, and making the wheel, so far as its interior is concerned, water-proof. The paper itself is painted before it goes into the wheel, and is perfectly secure against dampness, even if the wheel were not water-tight.

☞ The Delaware and Hudson Canal Company are surveying for a railroad from Cherry Valley to Richfield Springs.

☞ The Williamstown Railroad of New Jersey connects with the West Jersey Railroad at Glassboro, and with the Camden and Atlantic Railroad at Atco.

☞ At an election held in Sheperdstown, Va., on the 1st inst., the subscription by the council of $8,000 to the Shenandoah Valley railroad was confirmed by a vote of 225 to 4.

Wallkill Valley Railroad.

We took a trip down the Wallkill Valley Railway the other day, from Rosendale to Goshen, and found the roadbed in a very excellent condition. The train made equally as good times as any on the Erie road. We learned from President McKinstry that the road would be finished to this city by June next, and that it was his purpose then to put on regular passenger trains through direct to New York without change of cars at Goshen. A morning train, to leave Kingston at about six o'clock, or half-past, that would land passengers in Jersey City, or foot of Chambers street, New York city, at ten A. M., and return again at about five, giving business men about six hours in the city, and landing them at their homes in Kingston before nine P. M., he considered, would be a good accommodation, and we coincided with his views. If the Wallkill Valley Railway Company will do as well as this for passengers and regulate its tariffs in proportion to the Hudson River road, it will do the passenger business of this city and vicinity beyond a doubt.—*Kingston Journal.*

INVESTING MONEY!

Banking House of

JAY COOKE & CO.

To all seeking investment combining large profit with abundant security, we offer and recommend the First Mortgage 7-30 Gold Bonds of the Northern Pacific Railroad Company.

The high character of these Bonds is permanently established, and holders are fully protected, not only by the ample security afforded in the mortgage, but by a most careful and economical administration of the affairs of the Company.

Capitalists, and all who require a pre-eminently safe security, should investigate the claims of the Northern Pacific First Mortgage Bonds. They have thirty years to run, and bear interest at the rate of 7 3-10 per cent. in gold.

Many holders of 5-30s are exchanging them for Northern Pacifics, and thereby INCREASING THEIR ANNUAL INCOME NEARLY ONE-THIRD.

The highest current rate will be paid for all marketable securities received in exchange.

JAY COOKE & CO.

New York, Philadelphia & Washington.

☞ The Hudson *Register*, of April 19th, says that the surveyors having finished their work on the West Side Railroad, the company's agents are busy buying the right of way, preparatory to giving out contracts for the construction of the road. Most of the land on the line of the proposed railroad has been purchased and paid for, and at two of the most difficult points—one near Rondout and another at Smith's landing—contractors have commenced work with a large body of men. Before next January we hope to see the track so far completed between Albany and Rondout as to enable the company to run passenger trains.

The Prices of Western Farm Products in their Relation to Railway Extension.

Within the past few months, prices of Western farm products have suffered a marked depreciation; values of leading Western staples have worked so steadily downward, and such low figures have been reached, that fears began to be entertained that an unfavorable effect would be produced upon the extension of farming operations in the more remote parts of the West, and indirectly upon the progress of railroad building in that quarter of the country. We adverted to the subject, at some length, a few weeks since. But there are many reasons for regarding the recent low prices of some of the products of Western agriculture, as the result of temporary causes—certain to be followed by a vigorous and permanent reaction, of which we have already many indications. It will be remembered that one year ago, under an unexpectedly large crop of cotton, the price of that staple had fallen to ruinously low prices; planters and factors lost confidence, and all joined in a race to sell at the best attainable price. This process went on for months, till it was discovered that there was very little cotton left in the country; and the result was an immediate advance of about 60 per cent., and the cloud which hung over the planting interest at the South was as speedily removed. The West has been going through a similar experience with some of its main sources of wealth. Its crops last year, except of spring wheat, were exceptionally large, and in swine, corn and oats, there has been much demoralization produced respecting their values; in this market on the 1st of April, 1872, prices of "hog products," corn and oats, were not more than 60 per cent. of those current on the 1st of April, 1871, and as freights to the seaboard have not been materially reduced, it follows that most of this serious decline has fallen upon the farmer of the Far West. When corn is a dollar a bushel in New York, the farmer in the South West part of Iowa can get 50 cents per bushel; but when the former market declined to 70 cents, the grower in Iowa can realize only 20 cents.

But, as we have already hinted, indications point to a speedy reaction from prices so discouraging to farming enterprise. With respect to hog products, it is already evident, from statistics published in the circular of the Produce Exchange of this city, that the exports alone (to say nothing of an increased consumption resulting from low prices) have already disposed of an enormously increased yield, and that the stocks in the country at this time are much smaller than they were a year ago, with a demand much more urgent now than then; indeed, it is believed in well informed circles that at the beginning of the packing season last November there was no greater deficiency in supplies than now exists. It follows that bacon and lard must speedily advance on their merits, and are not likely to escape the attention of speculative operators. The Western farmer will profit largely by this advance. Wheat is already high; the grower now realizing nearly twice as much per bushel in gold as he did ten years ago. Then, the best Spring wheat sold at $1.00 a bushel in gold at this market, and from 50 to 70 cents in the Western market. Now the same quality is worth $1.50 in gold, in this market, and $1@$1.20 in the Western markets. Still better, a further advance is promised immediately in this important staple. England has been buying very little wheat of us for several months. Her needs begin at length to assert themselves. But while she was taking little or nothing, the wants of other foreign counties, and our own home demand, affected a rapid reduction of stocks on hand; and, by stimulating speculation, the reduced supplies promise to establish at an early day a very important advance in prices.

The first effect of such an advance in the values of farm products, as we have shown may be reasonably looked for, will be, that improved farms in the Western States will be greatly enhanced in value; and secondly, there will a rush to take up new lands along the lines of new railways completed or in progress of construction. The drift of emigration is towards the mildly temperate latitudes; and this fact, together with the probability of a strong reaction in the value of farm property at the West, indicate that an extraordinary demand will prevail for the lands granted by Congress in aid of the St. Joseph and Denver City Railroad, lying between latitudes 38 and 40 degrees parallel with the most fertile regions of the United States, watered by numerous streams, and traversed in its whole length by one of the great branches of the Missouri, in soil, in climate, in healthfulness, and in natural advantages of every description, we should be at a loss where to look for a rival to so charming a region.

The Eastern, the Middle, and the Southern States must, with each recurring year, become more and more dependent upon the West for supplies of food. The Eastern and Middle States, with their manufactures and mineral wealth, and the South with Cotton and Tobacco bringing extravagant prices, will raise very few cereals or live stock. The enormous advance in the price of wool will cause a greater amount of sheep culture, and by the extent of this increase will the raising of cereals in the older States be curtailed. The lands of the St. Joseph and Denver City Railroad are admirably situated to meet a demand for their products whether from the Southern, the Middle or the Northern States. They will have railway and water communication with all.

Under these circumstances, the progress made in the construction of this railroad has a double interest. Besides forming a needed link in the great inter-oceanic railroad, it opens up to settlement a portion of the country which is destined to become the garden of the trans-Mississippi region, which under the hands of hardy sons of toil, will soon "blossom as the rose."

Each mile of this road, constructed and put in operation, multiplies its resources in almost geometrical proportion; and we are not surprised to learn that its bonds are regarded, by those who mingle sagacity with prudence, as among the very best securities offered on the market. With returning ease in money, they will undoubtedly be all taken up at an early day..

Marietta and Cincinnati Railroad.

	$1,342,156 27	$1,480,912 80
Net earnings.....	$78,189 28	$210,054 86

Compared with the previous year the gross earnings show an increase of $270,222 11, with an increase in expenses of $138,756 53, making an increase in the net earnings of $131,865 58. The ratio of working expenses is 87½ per cent., a decrease, compared with the previous year, of 7 per cent. The President in his report says:

The increase in every branch of traffic is highly satisfactory. The increase in passenger business, of 14,162 in the total number transported, and of $52,652 11 in revenue, is very gratifying. Of this improvement, the through passenger reports exhibit an increase of 9,424 in the number, and $42,779 60 in receipts, or fifty-eight per cent. compared with the previous year, indicating that the road is recognized as forming a portion of a first-class route for travel between the West and the Atlantic seaboard.

The increase of 72,575 tons in local freight, and $98,236 67 in revenue, is marked.

The improvement in through freight is largely due to the close alliance with the Ohio and Mississippi Company, perfected on the 26th day of July, 1871, at which date the gauge of that road was changed from six feet to four feet nine inches, to conform with the tracks of the Marietta and Cincinnati, and Baltimore and Ohio roads.

Each company in interest furnished its proportion of a line of freight cars, to run between St. Louis, Louisville, and the Atlantic cities; and although at the close of the year one thousand freight cars were thus employed, it was found that this large number was inadequate, and additional equipment was required to supply the large and constantly increasing demand for transportation.

Pullman cars have been placed upon the route between Baltimore, Washington and Cincinnati and St Louis, and a considerable increase in passenger receipts is expected from these improved facilities.

Harmonious relations have been maintained throughout the year with all connecting lines, and an increased traffic with each developed.

The business with the Indianapolis, Cincinnati and Lafayette Company shows a considerable improvement, caused in part by the completion of the Indianapolis, Bloomington and Western Road, by which line the shortest and best route between Baltimore and Peoria and Rock Island has been secured.

In the expenses are included many items properly belonging to "Extraordinary Renewals" or "Reconstruction," which, on account of the difficulty of accurate adjustment in the incomplete condition of the road, have been charged to 'Repairs."

The policy adopted in 1868 of making large expenditures to make the road effective by placing it in superior condition, and to supply ample equipment as rapidly as means could be obtained, was pursued more vigorously than heretofore during the year just ended, and the outlay has been very heavy, as will be shown by the following statements:

Sixty-one hundred and sixty-eight tons of new rails were placed in the track, renewing nearly one-third of the main line.

There has been repaired at the company's shops, and relaid on the branch roads and in sidings, 1,172 tons of old rails taken from the main track.

153,775 new cross-ties were used.

The ballasting of the main line was completed during the year, and eight miles reballasted.

In consequence of the inferior manner in which a portion of the road was ballasted several years since, it will be necessary to incur a considerable expense in 1872 for reballasting, but it will be economical to make this outlay, and have a perfectly ballasted road over the entire line.

Construction trains were continued during the year, and a great improvement in the condition of the roadway effected.

$51,990 89 was expended in widening cuts, and and making new embankments and retaining walls.

New iron bridges were erected as follows:

One over Lee's Creek, 253 feet long, in two spans, begun in 1870 and completion in 1871.

At the crossing of Walnut Creek, West, two heavy stone abutments, sufficient for double-track bridge, were built, containing 3,522 cubic yards of cut-stone masonry, and on them an iron bridge, 60 feet long, for single track, has been erected.

At the west crossing of Little North Fork of Paint Creek, there was also built an iron bridge, 93 feet long, with iron towers.

Walnut Creek, East, has also been spanned by an iron bridge, 93 feet long, with iron towers.

A through iron bridge, 94 feet long, has been built over Raccoon Creek, where a wooden bridge was destroyed by fire in 1868, and the track has since been on trestle work.

These five iron bridges have an aggregate length of 593 feet, and $63,991 99 were expended during the year on this account.

They are all of good design and workmanship, and of unusually heavy proportions, in order to provide for the increased weight of the equipment required by and which is being supplied for the heavy traffic on the road.

A large freight house and platforms and extensive shed for the protection of petroleum and other freights have been built in Cincinnati. A telegraph office at Cincinnati has also been erected.

At Cincinnati Furnace Station, a freight house has been built.

New water stations have been built at Madeira, Lee's Creek, Byer's, Zaleski, Mineral City, Big Run, and at the river near Scott's Landing.

All of these stations have been provided with steam-engines and the necessary pumps and pipes for furnishing the stations promptly with large supplies of water.

At Brown's Water Station, an engine-house

has been built, and a steam-engine put in operation, and at Vincent's an engine and penstock have been added.

The expenditures on account of new water stations and fixtures have amounted to $15,697 63.

A contract was made with Messrs. Gill & Son, of Columbus, Ohio, to exchange a portion of the coal lands owned by the company and one thousand shares of the stock of the Columbus and Hocking Valley Railroad and $75,000 in cash, for 335 cars, two-thirds of which were house and one-third coal cars.

In this transaction the company realized cost for the lands and stock, and paid cash prices for the cars, thus making effective in a most desirable form $150,000 of capital which had heretofore been unremunerative. 110 coal and 100 line cars were delivered on this contract, and the remainder will be previous to May, 1872.

In addition, eight house cars were purchased, and fifty box, twenty-five stock, twenty-five flat and fifty-one construction cars were built at Zaleski, at an aggregate cost of $90,974 45.

Five locomotives were purchased at a cost of $57,736 34.

Seven passenger cars purchased and built, at an aggregate cost of $33,181 64.

The new station houses at Chillicothe and Loveland were completed during the year, and $26,271 27 expended on this account.

The great expense involved annually in paying cattle claims, and the advantages to be derived from additional security to the trains, have caused the board to incur the expense of new fencing as rapidly as it could be economically built, and during the year thirty-one miles of new fences were added, at a cost of $17,838 65.

The work of cutting down to its true grade a part of the road, near Madeira, was begun last summer, and is now nearly completed. $24,295 01 have been expended on this account.

During the year 1872 the work of reducing the line at Norwood to the proper grade will be commenced, and when finished the road west of Hamden will have no grade exceeding fifty-two feet to the mile, the maximum originally adopted for the completed road.

$142,068 45 was advanced in cash to the Cincinnati and Baltimore Road.

The work upon the Cincinnati and Baltimore Railway has progressed satisfactorily during the year, and the road will be completed in the spring of 1872.

The Marietta and Cincinnati Company has subscribed and paid for $253,400, being over one-half of the capital stock of the Company. The remainder of the stock has been disposed of at par.

A perpetual contract with the Cincinnati and Springfield Company was made on May 6, 1871, and subsequently ratified by the stockholders of the Cincinnati and Baltimore and Marietta and Cincinnati Companies, which provides that the Cincinnati and Springfield Company is to pay for the privilege of using the Cincinnati and Baltimore Road, from the point of intersection, about seven miles from Cincinnati, into the city, at the rate of $35,000 per annum, until the Cincinnati and Baltimore Road shall be double tracked. After the double track is laid, $40,000 per annum for five years, and thereafter $45,000 per annum.

In view of this desirable arrangement, and the consequent improved value of the bonds of the Company, the price has been advanced to ninety per cent. and accrued interest.

$226,000 of the bonds remain unsold, but, in order that the work should not be delayed, the Marietta and Cincinnati Company have advanced $142,068 45, in cash, which will be reimbursed as the bonds are disposed of.

It has been determined, in view of the increased traffic of the Marietta and Cincinnati Road, and the necessity of providing amply for the business of the Cincinnati and Springfield Company, to construct the double track; and, to furnish means for this expenditure, an additional amount of stock, as provided under the laws of Ohio, will be issued.

Five hundred and forty thousand dollars of third mortgage bonds were sold during the year. The remainder, $460,000 will probably be disposed of during 1872.

The real estate belonging to the Company, not required for railroad purposes, valued at about $400,000, has been placed upon the market for sale, and it is expected the advantages anticipated from the completion of the Cincinnati and Baltimore Road, as affecting the value of this property, will be realized.

The large floating debt which, in view of heavy and unavoidable expenditures upon the road and for increased equipment, was necessarily created, has been carried, with the constant and liberal assistance of the Baltimore and Ohio Railroad Company, at rates of interest much below those usually paid by Western railroad companies.

Should the ratio of increase, established in 1871 over the preceding year, continue in 1872, the gross receipts will reach two millions of dollars. Such an estimate may be deemed not unreasonable in view of the regular increase of every description of traffic, and as the increase of expenditures will be relatively diminished, it may be anticipated that the results for 1872 will be better than in any previous year.

Confidence in the road is now fully established, and the great cities of St. Louis, Louisville, and Cincinnati, and of the vast producing regions of the West and South-West, are realizing that the short route to the seaboard, of which the Marietta and Cincinnati Road forms a part, can be depended upon to furnish the cheapest as well as the shortest and most reliable outlet for their immense and constantly increasing traffic.

The completion, in January, 1871, by the Baltimore and Ohio Railroad Company, of the great iron bridge at Parkersburg, has perfected the line as a passenger route, and to this cause may be attributed, to a great extent, the decided increase in through passenger business. A much needed improvement has thus been supplied, by which loaded cars are transferred without change and without delay at the Ohio river, thus avoiding the costly and tedious system of handling freights which previously existed.

A first-class grain elevator at Baltimore, with a capacity of more than 500,000 bushels, will be completed in January, 1872, and the through grain business will be largely increased from the facilities thus afforded.

In addition to these costly and desirable works, the Baltimore and Ohio Company has, during the year, added largely to its equipment of line cars adapted for running to all points of shipment upon the Marietta and Cincinnati Road and its connections.

The Metropolitan Branch of the Baltimore and Ohio Road, extending from Point of Rocks to Washington, by which the distance from the West to the National Capital will be reduced forty-nine miles, will be completed in the spring of 1872. This most desirable and needed improvement will doubtless prove of great advantage to the entire line.

The Board with pleasure makes the acknowledgement due to the officers and employes, generally, for their faithful and efficient service during the year.

The company have 66 locomotive engines, viz: 18 passenger and 48 freight; of these, 43 are first class 16 second class, and 7 third class. The condition of the engines has been fully maintained. The mileage of the engines during the year was as follows: pasenger, 686,500; freight, 894,000; construction and ballast, 462,200—total, 2,042,700. The average cost per mile run was: for repairs, 6.51 cents; for engineers, firemen and wipers, 6.68 cents; for oil and waste, 0.91 cents—total, 14.10 cents.

The number of through passengers transported during the year was 24,831; do. local do., 344,922—total, 869,753. Number of tons of through freight, 183,841; do., local do., 345,056—total, 528 395.

This shows an increase in mileage of engines of 413,100; in number of passengers carried, 14,162 and in tons of freight transported, 135,952.

Secretary and Auditor.—CHARLES F. LOW.

☞ The estimated earnings of the Erie Railway for the week ending April 15, 1872, were $423,020; against $351,107 for the corresponding period of 1871—an increase of $71,913. Total earnings since April 1, 1872, $779,534—an increase over the same time in 1871 of $127,478.

The San Francisco Port Charges and the Overland Railroad Terminus.

San Francisco is our most important port on the Pacific coast line; indeed, it is almost the only good harbor we have there. No really good roadstead is found for a thousand miles to the southward, until we reach the Gulf of California, belonging to Mexico; nor for a thousand miles northward, until we reach Puget Sound, one shore of which belongs to Great Britain. The Pacific slope of the United States territory, besides having unsurpassed advantages for the production of the precious metals, wheat, wool, cattle, fruits and esculents; is also happily situated for carrying on an extensive commerce with the crowded millions of Eastern Asia and the Australian Colonies. Asiatic commerce is eagerly contended for by the nations of Western Europe. Notwithstanding the lateness of our appearance on these shores, Americans have a firm foothold in China and Japan. Every inch of advantage is jealously watched, however, by our more wealthy rivals both in our relations with the people and in the contest for cheap and expeditious transportation. Obviously, we cannot tolerate any artificial hinderances or throw away any positive advantage, if we intend not to be beaten in this field of enterprise.

The Pacific Mail Steamers, the only line of American steamers of note now running to foreign ports, have developed a gratifying business in carrying passengers, teas, silks, and the like, across the Pacific ocean to San Francisco, where they are re-shipped, overland, to their destination, via the Pacific Railroad. This they are barely able to do in competition with the routes via Suez, Panama and Cape Horn. One of the most serious obstacles encountered by this route consists of the vexations and onerous port and transfer charges at San Francisco. For examples: the Commissioners of Immigration, so called, levy a tax of five dollars on each person landing there; every vessel of 100 tons burden is charged $6 per day, vessels of 1000 tons burden $25 per day, and vessels of 2,500 tons $50 per day, for the mere privilege of tying fast to a dock structure; vessels under or above these measurements in the same proportions. For unloading goods on the wharves there are additional charges of twenty five cents per ton, or in case of goods discharged from ship to lighters, twelve and a half cents per ton. Add to these the inevitable charges for drayage to warehouses, cost of warehousing, drayage back to ships or cars—all upon the same high level—and the loss and damage occasioned by these repeated handlings, and we have a total toll of more than two dollars per ton upon merchandise for passing through this city—a serious tax on both, domestic and foreign commerce.

It is not to be wondered at that the shippers and transporters have cast about them for some escape from this exorbitant, enforced tribute to the dock owners and warehousemen of San Francisco. So far as freights destined to pass directly through to their destination were concerned, this detention and expense was felt to be unnecessary as well as injurious. "Why not," it is asked, "transfer the tea, silk, rice, &c., directly from the ship's hold to the rail car, or *vice versa* turn the California flour and grain, wool and hides, by the force of gravity, from the car to the vessel?" To do this it is necessary, first, to have a secure mooring place for the fleet of vessels; and second, some way of hauling the cars alongside the vessel when so moored.

The configuration of the Bay of San Francisco, and the site of the City are such, that to reach the docks with the end of the overland railroad track would involve making a circuit of 70 miles around the southern arm of the Bay, or full forty miles greater distance than to approach, as near as possible, by the direct course across the Bay. Now, the eastern shore of that Bay consists of a gradual shoal of waters; the main land nowhere abuts upon the deep water until one gets 20 miles away from the City. Into the yielding mud and sand of this shore the Pacific Railroad Company have driven piles, on which to extend their track, a mile and a half into the Bay, in order to reach 20 feet of water, a depth sufficient to accommodate temporarily their steam ferry for passengers. But this is not a suitable structure—neither sufficiently solid nor enduring—to be used for the transfer of cargoes of valuable merchandise; there is not room enough; a fleet of vessels made fast to it in a heavy gale would endanger the whole connected mass; the goods could not be protected while so exposed; the teredo is continually eating away the timbers, thus weakening its foundation. To build new wharves at points having the requisite depth of water where the track could follow, would be to take the trade far away from the city.

What then can be done? The only spot of solid ground suitable for the shipping and accessible to the railroad, is found on a rocky islet, "Yerba Buena," or Goat island, lying on the eastern edge of the ship channel, right opposite the City of San Francisco, and about midway between the City and the present temporary wharf of the railroad company. This island belongs to the Government; it is reserved as a military position and a fort will probably at some time be erected on its northern extremity. The Government does not contemplate the sale of this island; it is held for purposes of public defense; it ought not to pass into the hands of private parties. It may hereafter be useful, since it commands the city. The main defences of the harbor are some miles to westward, at the entrance to the Golden Gate. There is more room than the Government is likely to need—130 acres—and the position would be greatly strengthened and improved in value by railroad communication with the mainland.

In this view of the situation, it is not surprising that the government should be appealed to in the interests of general commerce, to devote the use of a portion of this island to the purposes of a terminus of the Pacific railroad line, the line in which the whole people have taken such a deep interest, and which has already begun to change the trade currents of the world. The suggestion has come from several quarters, that the railroad company should extend their wharf to Goat Island, on the south side of which they could get what accommodation is needed, viz: solid foundation for their docks, 30 feet of water and a sheltered position for the huge vessels plying the Pacific, and room for the transfer of heavy freights, as well as a shorter and more commodious ferry for passengers, mails, &c. To do this it will cost the Company two million dollars to bridge the intervening arm of the Bay, and over a million more to hew down the necessary space for road-way, tracks, shops, &c. This expenditure they are willing to make in the hope of building up an enlarged traffic thereby; and have asked Congress for permission to do so. They have not asked for the fee of the land, but simply for the use of it for these purposes, with all needful provisions for its resumption whenever needed for military purposes.

Now it would be impossible for a railroad corporation—especially if at all prosperous—to ask anything at the hands of Congress in these days, without some one raising the cry of "jobbery." There is a combination of noisy people in San Francisco, principally the owners of the strip of water front, who comfortably sit taking toll of every pound of merchandize passing through that city, who would like to keep the end of the railroad track as far back in shoal water as possible, that commerce might be continued in its present channels. This is the best reason why the rest of the country should desire a change. Every traveler who visits that city, comprehends the situation at a glance. All talk about the destruction of the harbor is simple absurdity, intended merely to conceal the real anxiety of the middlemen about the loss of their perquisites. A large part of the burdens now borne by freights, passing through San Francisco is needless and vexatious, and might be dispensed with. The Government have control of the only spot of ground which can give the desired relief, it lies useless to everybody, but might, at no cost to the public, become the most serviceable bit of territory to general trade in the whole country. It is the natural, fitting, proper terminus of the Pacific Railroad Line; it must be connected with the main land ultimately as a military measure, at the public cost; it can now be done for nothing.

Housatonic Railroad.

The receipts from operations of this road for the years ending December 31, 1870 and 1871, were as follows:

The company have 16 locomotives, 1 twelve-wheel, 11 eight-wheel, and 2 four-wheel passenger, 9 baggage and 330 freight cars. The report says:

A careful examination of the accounts will show a marked increase in the gross receipts, and also a reduction in the expenditures as compared with those of 1870.

We have laid in the track 1,428 tons of new rails, at a cost of $86,785 83, and also built one

mile of new track at Van Deusenville, and three miles of additional sidings at various parts of the line.

Our motive power having been found insufficient for the increasing traffic, both local and through, we have added three new locomotives, at a cost of $31,418 25. One of these was built at our own works.

Our car department has been increased in value about $45 000.

Contracts have been made for 1,500 tons of new rails, to be placed in the track during the coming season.

$50,000 of 6 per cent. bonds have been issued during the year, to complete the $100,000, authorized in 1869, to be expended in permanent improvements.

Our trains have been run with increased regularity and immunity from casualties.

The number of miles run by locomotives in 1871 was 321,600; do. in 1870, 314,416—an increase of 7,184.

President.—DAVID LEAVITT.

Vice President.—WILLIAM H. BARNUM.

Directors.—David Leavitt, Samuel Willets, Wm. H. Barnum, Geo. W. Peet, Geo. H. Noble, Horace Nichols, Wm. D. Bishop, David S. Draper, Charles A. Peck.

Secretary and Treasurer.—CHARLES K. AVERILL.

Superintendent.—H. W. FRANKLIN.

☞ The St. Albans *Messenger* says: "We saw a car-load of paper car-wheels at the depot, on Tuesday which was consigned to Detroit. The paper, which is as compact as metal, is enclosed in iron plates, the whole being firmly bolted together; and the tires and flanges are of steel. They weigh about the same as iron wheels, and are apparently models of strength and durability. They are manufactured by the American Paper Car Wheel Company, at Pittsford."

☞ The St. Louis *Register* says that the McNairy & Claflen Manufacturing Company, Cleveland, Ohio, have closed a contract with the Mobile and Montgomery Railroad for iron bridges across the Mobile river, constructed on iron screw pile piers.

Copper Mining.

The scarcity of Copper and its consequent rise are waking up the attention of capitalists to the subject. We see it stated in the Montreal *Herald* that among the proverbially careful and thrifty Scotchmen of the staid city of Glasgow a company has been formed to purchase and work some of the Canadian mines. They have brought the Huntington mine which is said to contain the greatest mass of ore of any that has yet been worked in the Province of Quebec, at £125,000 Sterling. The company has started with a capital of £200,000, and on opening the books for subscription stock was applied for to the amount of £1,000,000. The market price for the stock immediately advanced to 50 per cent. premium. Since the original purchase of the Huntington mine they have authorized Mr. Huntington to purchase for them any other mining properties which promise fair returns, and he has secured for them the Acton mine, including all machinery and royalties, for $25,000. The Acton was formerly owned in Boston, and will be remembered by a large class of sufferers who were induced to invest in it. The Glasgow company, by the introduction of Henderson's process, expect to make the mines at once profitable and self-sustaining. We may, perhaps, learn a lesson from this new movement not to cast aside, as worthless, mines which do not make immediate returns and not to work them in so superficial a manner as quickly to exhaust them. If a mine produces, at a moderate expense, a large amount of Copper we are satisfied with the result and the shares are run up in the market, not considering that by this process the mine will soon become unproductive and worthless. The careful results of science show that as much is obtained by utilizing the resources of the inferior mine as by superficially working a rich one, and as the supply of Copper is becoming one of the great industrial forces in this country the attention of all interested in them should be directed to the best modes of obtaining the largest and most permanent results.—*Boston Journal.*

Whitehall and Canada Railroad.

From a recent consultation with gentlemen connected with the New York and Canada Company, we are enabled to state that the new company have perfected arrangements with the Delaware and Hudson Canal Company, by which that company agree upon the performance of conditions to build and fully equip a railroad from Whitehall north, as follows: To Port Henry within two years from March 26th, 1872, and to the Canada line within three years from that date. The conditions were, first: That the New York and Canada Railroad Company should procure certain rights from the Grand Trunk Railroad Company of Canada; and second: That there should be subscribed to the capital stock of said company $125,000 south of Port Henry, and $300,000 north of that point. The first of these conditions has been complied with, and all that remains to secure the road to Port Henry is that $125,000 should be subscribed by Whitehall, Dresden and Putman, and all necessary to secure the road through is the $300,000 subscribed north. These subscriptions bind the Delaware and Hudson Canal Company absolutely to do this work; and binds it also to lease the new road when built, and to pay a rental of thirty per cent. of the gross receipts therefor per annum. Now, it rests with the people along the line to say whether they shall have a road, and at once, or whether by inaction we shall let it go by the way of Fair Haven, West Haven, Benson and Orwell across the bridge at Ticonderoga and thus more effectually cut us off then we are now. The town of Whitehall is expected to subscribe one hundred thousand dollars to the stock of the new company, and Dresden and Putnam twenty-five thousand dollars. We have been shown a letter from the president of the Delaware and Hudson Canal Co. to W. W. Cooke of this village, saying that the Delaware and Hudson Canal Company will, if the town come up promptly and subscribe, complete the road to the Canada line within eighteen months. And we are informed if the towns of Whitehall, Dresden and Putnam subscribe the $125,000 that the work will be commenced on this end within one month.—*Whitehall Times.*

Troy and Greenfield Railroad.

The report to the present legislature of the joint standing committee of last year, on the Troy and Greenfield Railroad and Hoosac tunnel, which was presented to the senate a short time since and ordered to be printed, has made its appearance in type. The committee embrace in their report the whole length of railroad route owned by the State, extending from Greenfield westward through Massachusetts and the southwest corner of Vermont, of which the distance of about two-thirds of a mile from the present terminal station of finished railroad up to the east portal of the Hoosac tunnel—the tunnel itself, 4¾ miles long, and a length of about two miles extending from the west end of the tunnel to the village of North Adams, form the only portion now unfinished. The details of the progress of the work in the tunnel, some account of the special difficulties encountered at the central shaft and the means employed for surmounting them, and a computation relative to the probable date of completion, with a diagram of the tunnel showing the distances opened to the close of the year, are included in a communication from Mr. Frost, State Engineer, which the committee have introduced into their report. The leases to different railroad companies under which the finished portions of the railroad east and west of the mountain are respectively operated—the initiatory steps thus far taken toward completing the unfinished links of the railroad east and west of the tunnel, with suggestions as to some further legislation thought to be desirable, are successively mentioned in the report, which closes with some brief and appropriate general remarks as to the value of the enterprise and the development of important interests which may be anticipated from the opening of the route.

London and Port Stanley Railway.

As mentioned last week, this line has been leased by the Great Western Railway Company. The term is twenty years, and the annual rental $20,000; the road, which is now of the 5 ft. 6 in. gauge, will be changed to 4 ft. 8½ in. It is understood to be the purpose of the Great Western, now that this lease has been obtained, to lend such aid in the promotion of the London, Huron & Bruce line, as will render its construction tolerably certain. In case it is so constructed the gauge will be 4ft. 6 in. instead of 3ft. 6 in., as first proposed. If by the leasing of the London and Port Stanley the citizens of London have removed the almost insuperable obstacles encountered in the attempt to make a direct line from that city through a valuable and extensive tract of country to Lake Huron, they have good reason to feel pleased with the arrangement. When this road is made, and the London and Port Stanley renewed, London will stand in as good a position with respect to railway service as any city in the Dominion. *Monetary Times.*

☞ The Port Huron and Lake Michigan Railroad, only as yet completed to Flint, has earned during the past six months $106,341 80, and expended in expenses $32,649 84. As the interest on the bonds thus far issued is only $50,000, this shows a handsome margin. Congress has confirmed the Michigan land grant to this road—which is to be pushed to early completion.

☞ Work along the entire line of the Lynchburg and Danville Railroad is being pushed ahead with extraordinary energy and activity. The laying of the track immediately at Lynchburg, it is expected, will be commenced by the first day of July and along the line generally by the first of August.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday April, 27, 1872.

Stock Exchange and Money Market.

The Money market has been working more smoothly and satisfactorily for the borrowing interests since our last, with a freer offering of funds noted, at, in some instances, exceptionally low rates, though the more generally current quotations for call loans were from 6@7 per cent. to the more prominent Government houses, to 7 per cent. gold to the Stock Exchange firms. The demand for accommodation, though active, as a rule, has been more promptly met by lenders, who have been less reserved in there advances to responsible borrowers. In the way of discounts, there has been rather more currency for the very best class of commercial paper at 7@8, with also a somewhat readier market for prime to good grades at from 9@12 per cent. per annum. The U. S. Sub-Treasury office increased its coin balance 1½ millions and reduced its currency reserve 1½ millions. The city banks reduced their loan and discount average about 1⅜ millions during the week, and their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $3,876,868, and a coin reserve, of $71,532,008.

The city banks, in their latest return, show an increase of $3,080,500 of legal tender notes, with a reduction of $1,104,000 of specie, and an increase of $2,343,600 of deposits; a contraction of $1,303,700 in their loan and discount averages, and $75,500 in their item of circulation. The city bank exchanges, last week, averaged 121⅛ and thus far, this week, about 135 millions daily. The banks now hold $2,302,150 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,278,400, against $13,970,878 same time last year. The city bank deposits are now $195,630,700, against $217,180,796 week ending April 22, 1871. The legal tender reserve amounts to $39,909,300, against $56,536,788 same time last year. The circulation now stands at $27,911,500 against $31,488,404 same time last year. The loans are now $273,050,600 against $285,207,796 at this date last year.

The coin reserve of the city banks is now about 18¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 39⅞ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $1,136,746, and enlarged its coin reserve $1,540,601 as the result of the week's business. The receipts of the office were $4,883,406 in coin, and $3,641,726 in currency; payments, $3,292,805 in coin, and $4,778,473 in currency. The office received $3,182,000 in coin or its equivalent, from customs; and disbursed $104,354, of coin interest.

Government revenues have been up to a fair average through the week. The excises yielded within the week about two millions, and thus far since July 1, 1871, $103,795,754. The customs at the port of New York last week were $3,099,015; at the outports, equal to about a million more, all in coin, or coin certificates.

The cash balances of the Treasury Department on Monday were: Coin, $128,131,303; currency, $7,592,683. Coin certificates were outstanding for $26,834,000.

Gold has been in brisk request, mainly on speculative account, and prices have been quoted higher and buoyant, as a rule, with an enlarged export drain, and a fair customs call. On Wednesday, the U. S. Sub-Treasurer at this port under instructions from Washington commenced the disbursement without repate of the May coin interest on the public debt. Owing to the cancellation since last November of May and November Five-Twenties, the amount of the interest due May 1st is much less than usual comprising about $18,500,000, including that on the older issues of the Five-Twenties of '62, '64 and '65, and the quarterly interest on the new 5 per cent. funding loan.

The range of the price during the week has been from 110¾@112⅛ and the closing quotation on Wednesday was 112@112⅛ against 111 the preceding Wednesday. The specie outflow, last week, was $899,592. The Gold Exchange Bank clearances have averages about 41⅛ millions per day during the week.

The customs demand for Gold last week, averaged $530,334 a day; thus far, this week, it has averaged $550,000 a day, or equal to a weekly aggregate of $3,300,000. The arrivals of

specie from Europe, Havana and other foreign ports last week were $12,693, and since Jan. 1, 1872, $591,000 against $2 919,461 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $130,484,395 against $121,597,100 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to April 20, 1872, $62,584,869, against $67,867,065 same time in 1870-'71.

The export drain of specie was $899,592 last week, against $3,332,799 same week preceding year. The shipments since July 1, 1871, have been $30,291,995 against $61,393,521 same time in 1870-'71.

Foreign Exchange has been in more confident demand and quoted stronger in price. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109½; sight bills on London, 110¼@110⅜.

The produce exports from this port, week ending with April 23, were to the currency value of $3,244,186.

Government securities have been in more urgent demand, for investment purposes, at firmer and buoyant prices, on very moderate offerings of all issues, particularly the later gold bearing bonds.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117¼@117½; U. S. Five-Twenties of 1862, (other than the bonds called in) 114⅞@115; U. S. Five-Twenties of 1864 at 114⅞@115; U. S. Five-Twenties of 1865, 115⅛@115⅝; U. S. Five-Twenties of 1865 consolidated, 114@114⅛; U. S. Five-Twenties of 1867, 114⅝@114¾; U. S. Five-Twenties of 1868, 114⅞ 115; U. S. Ten-forties at 110@110¼; U. S. Fives of 1881 (Funding Loan) 111@111⅛; Six per cent. currency bonds, 116⅛@116¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

*Ex May interest.

State bonds have been in fair demand, and the more popular issues have been quoted stronger in price.

More disposition has been manifested by investment buyers, to purchase the better class of the Railway Mortgage Loans, which have been quoted firmer throughout the list. Central Pacific Sixes have been in fair demand at 102¾@103. Chesapeake and Ohio have been more sought after at 94 per cent. and accrued interest.

Railway and Miscellaneous share property, has been quite active, but variable and generally weaker as to price, under more extensive offerings of the speculative favorites, chiefly on speculative account, and in part, with a view to the depression of values, in the interest of the bear operators. The general market closed tamely.

The Metal trade has shown less activity. Copper has been in less request, and prices have favored purchasers, with sales reported of 500,000 lbs. Ingot, at 43c.@44c. for prompt, and 35½c. for forward delivery. Pig-iron has been very scarce, particularly Scotch, and has been held above the views of buyers, checking business. Glengarnock was quoted at $55, here, and $49 to arrive; American as before. Iron Rails have been in fair demand, and sales have been made of 1,000 tons English on private terms—quotations remaining as in our last. Of Wrought Scrap-iron, 500 tons were sold on private terms. Lead Spelter and Zinc dull at former figures. Of Regulus Antimony. 10 casks were disposed of at 16½c., gold, per lb., showing firmness. Pig-tin was dull and weak, with sales reported of only 250 slabs Straits, at 41½c., gold, thirty days' credit, closing in favor of purchasers. Tin Plates were fairly active, and held with confidence, with sales reported of 2,000 boxes Charcoal Plates at $13 25@$13 75; 500 boxes Charcoal Terne at $12; 500 boxes Coke Terne on private terms; 500 boxes Coke Plates at $12 50, gold per box.

At the auction sale of Scranton Coal on Wednesday, 130,000 tons were offered and disposed of at reduced prices the range of quotations having been from 3.37½@4.00, as against 3.47½@4.17½ in March.

General business has been more active, Flour, Wheat, Corn, Rye, Pork, Lard, and Bacon firmer Petroleum and Naval Stores lower, Butter and Eggs, cheaper. Middling upland cotton closed on Wednesday at 23½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,534,813 bales, against 3,531,063 bales same time in the preceding year; exports 1,713,782 bales against 2,523,964 bales in the previous year; stock at the ports at latest dates, 318,516 bales against 557,743 bales same date 1871.

At the Live Stock Markets, Beeves have been in firm demand at 9½@14 cts.; Veals at 5@8½ cts.; Sheep at 7½@11½ cts. Swine, at 4¾@5 cts. per lb., all live weight. The week's receipt were 7,663 Beeves, 3 350 Veal Calves, 14,035 Sheep and Lambs; and 25,593 Swine.

Foreign goods have been in fair demand at generally firm prices. The week's imports of foreign goods reached the amount of $13,104,110, including $3,063,711 of dry goods.

Ocean freights have been moderately active and quoted stronger on berth, though weaker for charters.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ In consequence of the rapid construction of the Wallkill Valley Railway, together with the increasing business and the consequent appreciation of the Bonds by investors, Messrs. Mead & Clark have advanced the price of the first mortgage 7 per cent. Gold Bonds to 92½ and Interest in Currency, at which price they find a ready market, and increasing demand. This road has been operated to Rosendale for some months, and the completion of the great Rosendale Bridge, together with the fact that the road-bed is now ready, and the iron purchased for the remaining section to Kingston, where a junction is formed with the Rondout and Oswego Railroad, assures a large and remunerative passenger and freight traffic. A prominent feature of these securities is the close proximity of the enterprise to New York.

☞ We take pleasure in calling attention to the card of Mr. Bowen, Patent Lawyer and Solicitor. Mr. B. has representatives in Washington and London to aid him in procuring United States and Foreign Patents, and gives special attention to Patent suits in the United States Courts.

☞ The Alabama and Chattanooga railroad has been sold under a decree of bankruptcy. It was bought in for the State of Alabama by Governor Lindsay.

HARVEY FISK. A. S. HATCH.

Fisk & Hatch, Bankers,

No. 5 Nassau st., New York.

We are having constant inquiries as to the most desirable ways of investing money or reinvesting the proceeds of Five-Twenty Bonds, already called in, or soon to be called in, in the form of portable securities in which the greatest possible safety will be combined with fair and satisfactory income.

The first inquiry often is: "Shall we buy any of the issues of Government Bonds having the longest time to run?"

No one needs now to be assured that Government Bonds are *good*. But at present market prices, the rate of interest which they pay upon their cost is too low to meet the views of most investors. Hence the constant inquiry for something *safe* that will pay better.

To meet this inquiry satisfactorily to ourselves and customers we can recommend only such securities as we *know* to possess the essential qualification of *unquestionable security*. The securities to which we have given the necessary attention to enable us thus to recommend them, are:

The Bonds of the Central Pacific Railroad Co., originally negotiated by us, and which we now buy and sell at market rates. They are widely known and highly esteemed in all the principal money markets of the world, and are dealt in at all the principal Stock Exchanges in this country and Europe, where they take rank in popularity and market value next to the Bonds of the United States Government. Present market price, about 102¼.

The 6 Per Cent. Gold Bonds of the Chesapeake and Ohio Railroad Company, secured by a First Mortgage upon their great East and West Trunk Line of Railroad extending from the Chesapeake Bay to the Ohio River, forming a short, easy, low grade and economical through route for the transportation of Western products to the sea, and traversing the wonderful Iron and Coal deposits of Virginia and West Virginia, which are well known to be among the most important, varied, and valuable on this continent.

We have these bonds still for sale for account of the Company at 94 and accrued interest. Interest payable May and November. Principal and interest payable in Gold in the City of New York. Denominations $1,000, $500, and $100, Coupon or Registered.

There is no good reason why these Bonds should not take equal rank with the Central Pacifics.

Full information furnished on application.

We buy and sell Government Bonds; receive deposits, and allow interest on balances; make collections; issue Certificates of deposit, and do a general banking business.

FISK & HATCH.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR DAMAGES FOR INJURIES SUSTAINED ON ACCOUNT OF NEGLIGENCE AND CARELESSNESS OF EMPLOYEES. RULE OF EVIDENCE.

The case of Sloan *vs.* The New York Central R. R. Co. (45 N. Y. 125,) was an action brought to recover damages the plaintiff claimed to have sustained from injuries through the negligence and carelessness of the defendant in not keeping its road in a safe and proper condition, and in carelessly and negligently running its cars upon such road. The plaintiff purchased a passenger ticket at Fort Plain for Canandaigua, and while in the cars on her way, the car in which she sat was thrown down an embankment, inflicting serious and incurable injuries upon her. The accident was caused by the breaking of a short rail on a curve, and by the alleged unsound condition of the ties. The jury rendered a verdict for the plaintiff for $12,000 damages. The following is the opinion of the court delivered by

CHURCH, CH. J.—Several exceptions were taken upon the trial, and are presented to this court for review. The witness Townsend, who was the trackmaster of the defendant, had given evidence in relation to repairs which he had made at the point of, and immediately adjacent to, the place of the accident, and tending to establish that the track was in good condition. On cross examination, he was asked, in various forms, if he did not state, in the presence of different individuals, in substance, that he was not to blame for the accident, and that he could not get ties or material to fix it; to which the witness answered, that he had no recollection of any such conversation.

The plaintiff then called one of the persons referred to, and put to him the following question:

"Will you state what you heard Townsend say, on Sunday morning, about the track, and about his application for materials to put it in order, and what was said to him that drew him out?"

This was objected to as immaterial, and also on the ground that the precise question should be put to the witness which was put to Townsend. The objection was overruled and an exception taken, and it is claimed that this ruling was error.

We think it was competent to contradict Townsend for the purpose of effecting his credibility, as he had testified to facts somewhat inconsistent with the statement proposed to be proved. He had testified, substantially, that the road was in good order at the place of the accident, and the statement implied at least, that it was not in good order in consequence of the failure of the company to furnish materials.

This precise point was decided in Wheeler *vs.* The same defendants (not reported), in an action for an injury occurring at this accident. It was competent only as impeaching evidence, and the court so instructed the jury in the charge.

The objection as to the form of the question involves a point not very definitely settled. It is competent, for the purpose of impeachment, to prove that a witness has made statements out of court in conflict with his evidence in court upon a material question in the case. To lay the foundation for contradiction, it is necessary to ask the witness specifically whether he has made such statements, and the usual and most accurate mode of examining the contradicting witness, is to ask the precise question put to the principal witness. Otherwise, hearsay evidence, not strictly contradictory, might be introduced, to the injury of the parties, and in violation of legal rules. But the practice upon this subject must be, to some extent, under the control and discretion of the court. It is important that the jury should understand that such evidence is collateral, and not evidence in chief; and the witness sought thus to be impeached should have an opportunity of making explanation, in order that it may be seen whether there is a serious conflict, or only a misunderstanding or misapprehension; and for the purpose of eliciting the real truth, the court may vary the strict course of examination.

In this case, the question, although not the precise one put to the principal witness did direct the attention of the impeaching witness to the time and place and subject, and the answer was substantially a contradiction of the statement of the principal witness.

There was no substantial error committed, in the form of the question, and no injury could have resulted from the evidence given.

The question put to the female attendant; how far the plaintiff helped herself, and at what point she required assistance to do what was necessary to be done, called for facts, and not mere opinion, and was not objectionable. It is also objected that the physician's bill was not proved by legal evidence. When the attending physician was on the stand, he was asked by the defendant's counsel the amount of his bill against the plaintiff, to which he answered that he could not tell, that his partner attended to that. The partner was called and proved the amount of the bill under objection which is claimed to be error. The evidence upon this point was not as full and explicit as is desirable, but it might be inferred from the evidence of both witnesses that the partner kept the accounts, making such charges as the attending physician directed, and that the charges thus directed amounted to the sum named. Some evidence was also given of the time during which the physician attended the plaintiff, and something also of the nature of his services, from which it might be inferred that the bill, $266 50, was not extravagant. I do not think there was any substantial error committed in this respect, and if there had been, we should not feel justified in reversing the judgment and ordering a new trial, if the plaintiff consented to deduct the amount from the judgment. The only remaining point urged by the defendant's counsel was the decision of the court sustaining the objection to the question to Dr. Rice, whether the plaintiff had the venereal disease while under his care as a physician. We think this was privileged under the statute. The question did not in terms ask for any communication from the plaintiff, but it was an inquiry as to the existence of a disease which the plaintiff had while under the care of the witness as a physician. The presumption is, from the question, that he learned it as a physician for the purpose of prescribing. The question itself implies it. To require the plaintiff to make the preliminary inquiry whether he learned the fact for the purpose of prescribing would in effect, if the fact existed, have deprived the plaintiff of the protection of the statute. It would have proved the fact indirectly, which might be as injurious as if proved legitimately.

The case does not disclose whether the evidence was excluded under the statute, or on account of its remoteness; but that it was properly excluded there is no doubt.

The case was fairly submitted to the jury on the facts, and as there was no error in law committed, the judgment must be affirmed.

All concur except Peckham and Andrews, J. J., not voting.

Judgment affirmed.

Consolidation of the Old Colony and Newport and Cape Cod Railroads.

A special meeting of the stockholders of the Old Colony and Newport Railroad Company was held in Boston on the 12th inst., for the purpose of acting upon the question of union of this company with the Cape Cod Railroad Company, and forming one corporation, agreeably to the Act of the Legislature of Massachusetts, approved March 27, A. D., 1872, entitled "an act to unite the Old Colony and Newport Railway Company, and the Cape Cod Railroad Company, and for other purposes," and to pass any votes which are authorized by said Act.

John S. Brayton, clerk of the corporation, read the case for the meeting, after which C. F. Choate, Esq., counsellor of the corporation, offered a series of votes, which were adopted by a stock vote of 7,070 yeas and 68 nays; by proxy, 1,116 yeas and 71 nays. Total yeas, 8,186; nays, 139.

Voted. To accept the act of the Legislature of Massachusetts, approved March 27, 1872, entitled an act "to unite the Old Colony and Newport Railway Company and the Cape Cod Railroad Company, and for other purposes," and to unite and form one corporation with said Cape Cod Railroad Company under the terms of said act.

Voted. That the directors are hereby authorized to purchase the rights, powers, franchise, privliges, easements and property of said Cape Cod Railroad Company upon the following terms, viz: To assume the debts, obligations, duties and restrictions to which said company is subject, and to pay a sum equivalent to seventy-five dollars for each share of full paid stock of said Cape Cod Railroad Company outstanding, and in the same proportion for stock not fully paid or not entitled to dividends, or in lieu of said payments to issue to said company stock of this corporation in the proportion of seventeen shares for each twenty-three shares of said Cape Cod Railroad Company, with a rateable deduction to be made on shares not fully paid up or not entitled to dividends, and full power is hereby given to the directors to make and execute all deeds and papers, and do all other things necessary to carry the said purchase and union into full effect.

Voted. To increase the capital stock of this company by the issue of new shares to the amount of the authorized capital stock of said Cape Cod Railroad Company, not exceeding in number 15,000 shares; and the directors are hereby authorized, under the provisions of section 2 of said act, to issue the said stock to stockholders of said Cape Cod Railroad Company, in lieu of stock of said company, upon the basis of valuation set forth in the preceding vote, and to buy and sell shares and fractions of shares at not less than par, in such manner as to secue an equitable adjustment of fractional rights; and further, to issue the balance of said stock, or so much thereof as may be necessary to provide means for the completion of said extensions to Wood's Hole and Provincetown.

Voted. To change the name of this corporation to "Old Colony Railroad Company," when authority may be obtained from the State of Rhode Island.

Mr. Choate, in presenting the above motions, submitted the reasons which in the judgment of the directors renders the union advantageous to the Old Colony Corporation.

The Cape Cod Railroad, which was chartered in 1846 as a branch of the railroads now owned by this company, has been gradually extended from Middlesex to Wellfleet, a distance of 75 miles. There is now under construction a branch from Monument to Woods Hole, a distance of 18 miles, and an extension from Wellfleet to Provincetown, 12 miles, has been located, making the aggregate length of road constructed and in progress 105 miles. The gross earnings of the road from Middleboro' to Wellfleet in 1871 was $308,928 93, and the net earnings $76,970 46, liberal allowance having been made for renewals and repairs. The earnings both gross and net will be largely increased by the extension to Wood's Hole and Provincetown. A large extent of the most attractive portion of the New England section is made accessible and the travel over the Cape Cod Railroad, as well as over the Old Colony, will be greatly increased. The present stock is about a million dollars, and its debt $275,000. The cost to this company after consolidation upon the terms proposed, and completing the projected extensions will be about $1,850,000, in stocks or bonds of this company. The directors believe that the net earnings of the road will ultimately if not immediately pay a rate of interest equal to the dividends of the Old Colony and Newport Railway. While the relations of the companies have been in the main at all times friendly, it has not always been easy to fix rates and terms of connection entirely satisfactory to both parties. Operated as parts of a continuous line, it has not always been practicable to adjust the running of trains so as to give entire satisfaction to the patrons of the two roads. It is a clearly settled principal of railroad management that continuous lines of road can be more cheaply and more efficiently managed if under one control. By working the two roads together the directors believe that considerable saving can be made in expenses, and that trains will be run in a manner more satisfactory to the public. In other respects the directors believe that this union will be permanently beneficial to this corporation. The Cape Cod Railroad is now the chief feeder of the railroad of this company, and for the business which it furnishes we have been under large expenditures in stations and terminal facilities, and it seemed to the charterers expedient that measures should be taken to secure this business permanently to our line.

Negotiations commenced for the purpose of consolidation satisfied the directors of both companies that a union would be more advantageous to both than a lease of the Cape Cod to the Old Colony for a term of years. The Cape Cod Company owning 105 miles of railroad extending from the extremity of Cape Cod and from Vineyard Sound to within thirty-five miles of Boston, would naturally seek to extend its line to the metropolis. While our own line offered the most direct and easy route, it was perfectly feasible to reach other lines without great difficulty, thus diverting from us a valuable business and at the same time creating a rival line of road through the country, which we have spent years in developing. This danger would increase with the increase of business on the Cape Cod Railroad, and with the increased value of its business to us. Under these circumstances the charterers of the two companies have agreed to subject to the approval of the stockholders the terms of the union as passed by the Legislature, taking substantially as a basis the market value of the shares of the two companies.

At the conclusion of Mr. Choate's remarks a Committee consisting of Seth Turner of Randolph, William Latham of Bridgewater, and Henry Sigourney of Boston, was appointed to collect, assort and count ballots upon the adoption of the votes, the result of which is noted above.

The meeting was addressed by E. H. Derby, Esq., who congratulated the stockholders upon the prudent and successful management of their president and directors, and upon the union of two roads whose interests were identical. The meeting then dissolved.

Union Pacific Railroad.

The Traffic of the Union Pacific Railroad for February, and its Land business for February and March, are shown in the following official statements, furnished by Messrs. Morton, Bliss & Co., Financial Agents:

	February, 1872.	February, 1871.
Earnings	$534,115 09	$378,924 77
Expenses	392,354 05	237,467 69
Net earnings	$141,761 04	$146,457 08
	Jan. 1 to Feb. 29, 1872.	Jan. 1 to Feb. 28, 1871.
Earnings	$808,051 17	$853,497 53
Expenses	772,095 81	629,821 74
Net earnings	$35,955 36	$223,675 79
Decrease net earnings 1872, compared with 1871, January		105,805 68
Increase net earnings 1872, compared with 1871, February		5,303 96

☞ The following despatch, published in the Memphis *Appeal*, is sent to us for publication:

NEW ORLEANS, April 15, 1872.

Editors *Appeal*: I have just shipped to Chicot City twenty miles of railroad iron for the Little Rock, Pine Bluff and New Orleans Railroad. I am awaiting the arrival of several cargoes more of iron, purchased for that road, which will be forwarded as soon as it reaches this port. The company has purchased enough iron to complete the road to Pine Bluff, and track laying will be resumed immediately. A. H. RYAN, General Agent.

THE

CANADA SOUTHERN RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

Mississippi River Bridges.

AN ACT to authorize the construction of a bridge across the Mississippi river at or near the town of Clinton, in the State of Iowa, and other bridges across said river, and to establish them as post-roads.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for any person or persons, company or corporation, to build a bridge across the Mississippi river, at such point on said river, within fifteen miles of the town of Clinton, in the State of Iowa, as may accommodate the Chicago, Burlington and Quincy railroad and its connections on the west side of said river, and to lay on or over said bridge railway tracks for the more perfect connection of any railroads that are, or shall be, constructed to the said river at or opposite said point, under the limitations and conditions hereinafter provided; that said bridge shall not interfere with the free navigation of said river beyond what is necessary in order to carry into effect the rights and privileges hereby granted; and in case of any litigation arising from any obstruction, or alleged obstruction, to the free navigation of said river, the cause may be tried before the district court of the United States of any State in which any portion of said obstruction or bridge touches: *Provided*, That said bridge shall not be so located or constructed as to interfere in any manner with the approaches to the railroad bridge now erected at Clinton, or with the piers of the same, or so as to obstruct in any manner the passage of said bridge by boats, vessels, or rafts, or to render such passage more difficult or dangerous: *Provided, however*, That this clause shall not be construed to prohibit the crossing of the approaches to said bridge, if such crossing shall be found necessary.

Section 2. That any bridge built under the provisions of this act may, at the option of the company building the same, be built as a draw bridge, with a pivot or other form of draw, or with unbroken or continuous spans: *Provided*, That if the said bridge shall be made with unbroken and continuous spans, it shall not be of less elevation, in any case, than fifty feet above extreme high-water mark, as understood at the point of location, to the bottom chord of the bridge; nor shall the spans of said bridge be less than two hundred and fifty feet in length, and the piers of said bridge shall be parallel with the current of the river, and the main span shall be over the main channel of the river, and not less than three hundred feet in length: *And provided also*, That if any bridge built under this act shall be constructed as a draw-bridge, the same shall be constructed as a pivot draw-bridge, with a draw over the main channel of the river, at an accessible and navigable point, and with spans of not less than one hundred and sixty feet in the clear on each side of the central or pivot pier of the draw; and the next adjoining spans to the draw shall not be less than two hundred and fifty feet; and said spans shall not be less than thirty feet above low-water mark, and not less than ten above extreme high-water mark, measuring to the bottom chord of the bridge; and the piers of said bridge shall be parallel with the current of the river where said bridge may be erected. *And provided also*, That said draw shall be opened promptly, upon reasonable signal, for the passage of boats.

Section 3, That any bridge constructed under this act, and according to its limitations, shall be a lawful structure, and shall be known and recognized as a post route, upon which, also, no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States than the rate per mile paid for their transportation over the railroad public highways leading to the said bridge; and the United States shall have the right of way for postal-telegraph purposes across said bridge.

Section 4 That all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage of the same, and in the use of the machinery and fixtures thereof, and of all the approaches thereto, under and upon such terms and conditions as shall be prescribed by the Secretary of War, upon hearing the allegations and proofs of the parties in case they shall not agree.

Section 5. That the structure herein authorized shall be built and located under and subject to such regulations for the security of navigation of said river as the Secretary of War shall prescribe, and the said structure shall be at all times so kept and managed as to offer reasonable and proper means for the passage of vessels through or under said structure; and the said structure shall be changed at the cost and expense of the owners thereof, from time to time as Congress may direct, so as to preserve the free and convenient navigation of said river. And the authority to erect and continue said bridge shall be subject to revocation, modification by law whenever the public good shall in the judgment of Congress so require without any expense or charge to the United States.

Section 6. That the Muscatine Western Railroad Company, or their assigns, a corporation existing under the laws of the State of Iowa, be, and is hereby authorized to construct and maintain a bridge across the Mississippi river at the city of Muscatine, in the State of Iowa. The bridge authorized to be built by this section is hereby declared to be a post-route, and shall have all the privileges, and is subject to all the terms, restrictions, and requirements contained in the foregoing sections of this act.

Section 7. That a bridge may be constructed and maintained across the Mfssissippi river, at any point they may select, between the counties of Carroll and Whitesides, in the State of Illinois, and the counties of Jackson and Clinton, in the State of Iowa, either by the Western Union Railroad Company or the Sabula, Ackley and Dakota Railroad Company, or both of them, or by either or both of their successors or assigns, or by any person, company, or corporation having authority from the States of Illinois and Iowa. The bridge authorized to be built by this section is hereby declared to be a post route, and has all the privileges, and is subject to all the terms, restrictions and requirements contained in the foregoing sections of this act.

Section 8. That a bridge may be constructed and maintained across the Mississippi river, at any point they may select, between the county of La Crosse, in the State of Wisconsin, and the county of Houston, in the State of Minnesota; by the Milwaukee and Saint Paul Railway Company, their successors or assigns, or by any person, company, or corporation having authority from the State of Wisconsin and Minnesota. The bridge authorized to be built by this section is hereby declared to be a post route, and has all the privileges, and is subject to all the terms, restrictions and requirements in the foregoing sections of this act.

Section 9. That the right to alter or amend this act, so as to prevent or remove all material obstructions to the navigation of said river by the construction of bridges, is hereby expressly reserved.

Section 10. That this act shall take effect and be in force from and after its passage, without any expense or charge to the United States.

Approved April 1, 1872.

New Orleans, Mobile and Texas Railroad.

G. W. R. Bayley, Esq., Chief Engineer of the New Orleans, Mobile and Texas Railroad, makes the following statement:

A thousand men or more will soon be at work on different parts of the road. A large force will commence work at Vermillionville, and will work west toward the Sabine. A large force is about repairing to Lake Charles, near the sulphur mines. Another force will commence work at Berwick's Bay. As the road is already graded from Berwick to Vermillionville, a distance of about 60 miles, gangs will be at work all along this line repairing the road, building culverts and bridges, and preparing the road bed for cross ties and iron. The whole work of connecting Berwick's Bay and the Sabine by the iron-link is to be completed by March, 1873. The old Texas Railroad, extending from Houston to Beaumont, about 25 miles from Orange, on the Sabine, has been purchased by the same company now building the road from Berwick's Bay to the Sabine, at $1,000,000. It is understood that this road is to be worked over and improved while the work on this end of the road is progressing, and that when the Louisiana end shall be in good running order, in March, 1873, cars from New Orleans may cross the Sabine, and proceed on a good road to Houston.

Canada Southern Railway.

The Canada Southern Railway first mortgage 7 per cent. gold Sinking Fund bonds, offered now at 90 and accrued interest by Messrs. LEONARD, SHELDON & FOSTER, are in active demand. Many small investors who have deferred buying until the monetary stringency passed away, are now purchasing. The road is one of the most important trunk lines now building, and is in the hands of capitalists who control its western feeders, which will give it a profitable business from the very day of its opening. From Toledo to Buffalo it is 23 miles shorter than any other route, and has lower grades than any other line. With the Chicago and Canada now building it will form the shortest line between Buffalo and Chicago. From the rapidity with which the bonds are selling it is more than probable that the subscription price will be advanced at an early day.

☞ At the time of the lease of the Rensselaer and Saratoga to the Delaware and Hudson Canal Company it had a bonded debt of $1,625,000, comprising the bonds of the Rensselaer and Saratoga, the Saratoga and Whitehall, the Troy, Salem and Rutland and the Glen's Falls railroad companies, payable at different periods. To give the bonds a market value it was deemed desirable to consolidate them into one mortgage, to run fifty years, the Delaware and Hudson Canal Company guaranteeing the interest. The amount of this mortgage is $2,000,000, $375,000 of which is to be used in completing and fixing the road. Parties having the old bonds have been invited to exchange them, and the transfer is rapidly going on.

☞ The Walloomsac Railroad Company have ratified the contract for the lease of their road, when completed, to the Troy and Boston company.

☞ A meeting of gentlemen interested in the construction of the proposed Rhode Island and Massachusetts Railroad was held in Worcester, Mass., on the 16th inst. The object of the meeting was to take prelimmary steps for the purpose of organizing a company, under the general railroad law recently passed by the legislature, to construct a line of road from Worcester, through the towns of Grafton, Upton, Milford, Bellingham, Franklin, where it forms a junction with the Boston, Hartford and Erie, and Wrentham to the Rhode Island line, and from there to Providence, running down on the east side of Seekonk River, to tide water. The *Spy* says that Mr. E. H. Stone, the civil engineer who has surveyed the line, states the total cost of the road would be $583,966, or $26,855 per mile. Resolutions were adopted in favor of constructing the road.

☞ At a meeting of the directors of the Schuylerville and Upper Hudson Railroad company on the 15th inst., it was unanimously voted to consolidate with the Upper Hudson Railroad, and the roads are now consolidated. The name of the new corporation is the Schuylerville and Upper Hudson Railroad, running from Mechanicsville to Fort Edward, a distance of twenty-seven miles, and a saving of eleven miles from the old route, through Saratoga Springs, and mostly a level grade. The office of the company is at Schuylerville. The officers are: President, Daniel C. Bullard; Vice-President, Charles H. Payne; Treasurer, George F. Watson.

☞ The surveyors have completed the survey of the branch from the New York, Chicago and West Shore Railroad, at James' Corners, in the town of Bethlehem, to Albany. The land through which the branch will run is level and just what is needed and desired. The survey is not final, however, and may be changed.

☞ The proprietors of the Lee and New Haven Railroad has been in Hartford negotiating for connections with the Connecticut Western at Winsted. The line will probably run through Robertsville and Riverton to Colebrook River, a distance of eight miles in Connecticut, thence through New Boston and Otis to Lee.

☞ The Athens (Pa.) *Gleaner* says that the Northern Central Railroad have employed a corps of engineers to survey a route from Troy to Athens who have been at work for the past two weeks. The present indications are that the road will run via Burlington, Smithfield and Milan to the Athens depot.

RAILROAD IRON.

THE UNDERSIGNED HAVE FOR SALE 1,060 tons 30-pound fish pattern rails, now on the way to New Orleans.

PERKINS, LIVINGSTON & POST,
No. 31 New-St., New York.

CAIRO AND FULTON RAILROAD CO.

First Mortgage, Sinking Fund

Land Grant Bonds,

Due 1891 in Gold.

INTEREST 7 PER CENT. GOLD, FREE OF GOVERNMENT TAX.

Payable January 1st and July 1st, in New York.

THE CAIRO AND FULTON RAILROAD IS the main artery for travel across the State of Arkansas. It is the continuation of the St. Louis and Iron Mountain Railroad, and under the same management. It will connect the St. Louis Railroads and the Illinois Central Railroad with the International Railroad, the Southern Pacific Railroad and the Texas system of roads. Its length is 301 miles, and it deviates from a straight line but six miles. It has no grades over 15 feet to the mile. It passes through the most thriving counties and the Capital, Little Rock. The Land Grant of 1,926,400 acres "is one of the most extensive and valuable ever made to any road by Congress." The whole road is under contract for building, 52 miles are now operated, and tracklaying will go on at the rate of about half a mile a day until the connection of Little Rock with St. Louis is completed. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling-stock and lands, and are recommended as a safe investment. The officers are:

THOMAS ALLEN, (St. Louis) ..... President.
H. G. MARQUAND, (120 Broadway) .. Vice-Pres.
D. W. McWILLIAMS, (120 Broadway). Treasurer.
W. R. DONALDSON, (St. Louis) ..... Secretary.

NEW YORK DIRECTORS.

WM. H. SWIFT, HENRY G. MARQUAND,
WM. T. BLODGETT, JOHN H. SWIFT,
H. M. ALEXANDER, ALANSON TRASK.

The Union Trust Company, Trustee of the Bonds. Price 90 and accrued interest in currency. The Company reserves the right to advance the price at any time. Marketable securities received in exchange at full market rates and Express charges paid. Maps and pamphlets may be obtained on application to

H. G. MARQUAND, 120 Broadway.

OFFICE OF PORT ROYAL RAILROAD COMPANY, No. 39 SOUTH-ST., NEW-YORK.

THE COUPONS ON PORT ROYAL RAILROAD Bonds, due May 1, will be paid at the office of the Company at maturity.

TRAUTWINE'S

CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

☞ For sale by Booksellers generally.

Junction Railway.

This road, which is intended to connect the Michigan Branch of the Canada Southern Railway with Toledo, will be commenced immediately and hurried to completion. The stockholders of the Junction Railway met in Toledo on the 24th ult., for the purpose of perfecting an organization, and the following Directors were elected: Milton Courtright, of Erie, Penn.; Sidney Dillon, of New York; J. S. Casement, of Painesville, Ohio; Robert Cummings, C. A. King, G. W. Davis, and C. B. Phillips, of Toledo.

At a subsequent meeting, the Directors elected officers as follows: President—Gen. J. S. Casement; Vice President—C. A. King; Secretary and Treas.—C. B. Phillips.

The Company will at once proceed to the construction of a road from Toledo to the Michigan State Line, and have a connection completed with the city as soon as the main line of the Canada Southern Railway is finished which will probably be by the close of navigation next fall.

MAY INVESTMENTS.

Banking House of

JAY COOKE & CO.,

20 Wall Street.

We offer for sale at par and accrued interest the First Mortgage Land Grant Gold Bonds of the Northern Pacific Railroad Company. They are free from United States Tax to the holder, and are issued in the following denominations: Coupons, $100, $500 and $1,000; Registered, $100, $500, $1,000, $5,000 and $10,000.

The Bonds are secured by a first and only mortgage on all the property and rights of the Company, which will embrace, on the completion of the work: First, Over Two Thousand Miles of Road, with rolling stock, buildings and all other equipments; Second, Over Twenty-three Thousand Acres of Land to every mile of finished road. This land extends in a broad, fertile belt from Wisconsin, through the richest portions of Minnesota, Dakota, Montana, Idaho, Oregon and Washington, to Puget Sound.

Both Principal and Interest on the Bonds are payable in Gold coin, at the office of JAY COOKE & Co., New York City—the Principal at the end of 30 years, and the Interest (at the rate of seven and three-tenths per cent. per annum) first of January and July.

These Bonds are at all times receivable at ten per cent. premium, in payment for the Company's lands (now being offered for sale), at their lowest cash price.

In addition to their absolute safety, the Bonds yield an income larger we believe, than any other first-class security. Persons holding United States 5-20s can, by converting them into Northern Pacifics, INCREASE THEIR YEARLY INCOME ONE-THIRD, and still have a perfectly reliable investment. And with the same entire confidence with which we commended Government Bonds to Capitalists and People, we now, after the fullest investigation, recommend these Northern Pacific Bonds to our friends and the general public.

Further information, pamphlets, maps, &c., will be furnished, on application, by any of the Banks or Bankers acting as Agents for the Loan.

JAY COOKE & CO.

New York, Philadelphia and Washington.

FISCAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

Accidents upon Railroads.

The subject of accidents upon railroads has not generally been discussed in a spirit and manner befitting its character. It is usually entirely neglected, until some misfortune befalls a railroad, when the daily press join in the most violent clamor and the most ridiculous vaticinations respecting railroad management in general, and safeguards against accidents in particular, which have little more influence than the uncorking of a bottle of soda water.

There are, of course, three kinds of accidents, 1. Those resulting from neglect or misunderstanding on the part of the officials of a railroad. 2. Those resulting from the breaking of any part of a train, or of the track. And, 3. Those resulting from the carelessness of passengers, or of persons crossing or re-crossing a track.

It speaks well for the general excellence of the management of our railroads, that so few serious accidents occur from the first of these causes. But it happens that when accidents do occur from the neglect or incompetence of employees, they are usually of a very severe character. A collision, or what is usually worse, the running of one train into the rear of another, seldom takes place without resulting in a serious loss of life. Five such accidents, which have occurred within the past eighteen years, caused a loss of more than two hundred lives, an average of more than forty each. We do not suppose that this class of accidents can be entirely avoided. Until men become perfect we must look for collisions between railroad trains. It was supposed that by means

of double tracks, and the use of the telegraph, they would become much less frequent; as indeed they have, in proportion to the number of trains that are run; but with better means of avoiding danger, greater risks are taken, and the public will undoubtedly be occasionally startled by accidents of this character, involving serious loss of life and limb.

Accidents from the second cause are of much more frequent occurence and not less disastrous. A broken rail, a broken truck, a spread track, or an imperfect bridge, not unfrequently produces the death or serious injury of many scores of people. That these occur as frequently as they do, is partly the fault of railroad management, and partly the fault of our railroad system—the manner in which our railroads are constructed. Strength and solidity have not been the primary considerations in the construction of many railroads in the United States. They must be built and operated cheaply, and with only such excellence as is consistent therewith. Even this is not always secured, for in the building of many land-grant roads, with politicians directing their affairs, much jobbery has either added to the cost or impaired the quality of the work. We look for improvement under this head. As old structures are rebuilt they will be made stronger. The steel rail will be less liable to break. Experience has pointed where caution must be exercised to guard against accidents resulting from the breaking of material. One division of this branch of the subject, however, still baffles management, and is full of danger to the public. We refer to draw-bridges. Some of the most serious accidents in the history of railroads have been the plunging of trains through draw-bridges. That at Norwalk, though occurring 19 years ago, is still fresh in the memory of the public. There seems to be no safety except in the extreme measure which the New Haven Company then resorted to, namely, requiring every passenger train to come to a full stop before crossing any such bridge. A draw-bridge is from its nature a movable structure. It must be opened and may not be fully closed; and thus requires extraordinary provision against accidents from its use.

Of the third cause of accidents—the carelessness or recklessness of people themselves—little need be said. The only wonder is that they do not more frequently occur. In no other country in the world, are steam locomotives allowed to run along and across public highways. Here, again, has public security been sacrificed to economy. The public practically has said to railroad companies substantially this: "To build a railway as it is built in Europe will greatly increase its cost, which will increase your charges upon passengers and freight; therefore occupy our public and private highways wherever you may conveniently do so, and we will take our share of the risk." Nothing but the complete isolation of the tracks of our railroads can reduce the number of accidents of this character; and such isolation seems not, as yet, to be generally demanded.

If it be supposed, that accidents occur in this country more frequently and more disastrously than in Europe, it is a mistake. The following are late statistics upon the subject;

ACCIDENTS UPON RAILROADS IN BELGIUM.

Year.	Total of casualties.	Whole No. of passeng's carried to each casualty.	Miles of road operated to each casualty.
1866.....	168	69 270	2.93
1867.....	150	84,113	3.56
1868.....	157	81,683	3 42
1869.....	117	116,043	4.58
ACCIDENTS UPON RAILROADS OF GREAT BRITAIN.			
1866.....	850	328,829	16.29
1867.....	1004	286,562	14.19
1868.....	812	374,753	17.00
1869.....	1553	190,446	9.75
ACCIDENTS UPON RAILROADS OF MASSACHUSETTS.			
1866.....	115	192,407	12.13
1867.....	134	176,570	10.56
1868.....	119	209,378	12.06
1869.....	164	171,502	8.89

We grant that our railroads are more liable to accident. They are not so well built. They are more subject to the action of severe frosts. Their tracks are much more open to the approach of pedestrians, vehicles, and cattle, the employes are not subject to as rigorous discipline, nor as thoroughly trained. But our people are much more intelligent, have more presence of mind, and easily avoid dangers which the average European would stumble into. Our railroad employes, if not under so good discipline, are less subject to mere routine, less trammeled by red-tape, and rigid conventionalities. With us a conductor or engineer will not hesitate to act as brakeman, switchman, or to bear a signal in any direction, should the safety of his train demand; in Europe this would be impossible. Doubtless, the manner of building our ordinary passenger cars serves to diminish the injury resulting from accidents. In one case, a train ran into the rear of another; but the passengers in the rear cars were warned in time, and nearly all made good their escape. This could not have been done in an English train. The peculiar severity of accidents which have happened to sleeping cars also suggests the superiority in point of safety of the day passenger car which is mostly in use.

Wheeling and Lake Erie Railroad.

The common council of Wheeling, W. Va., on the 23d ult. passed an ordinance submitting to the people, at an election to be held on June 1st, the proposition to subscribe $300,000 to the construction of a railroad bridge across the Ohio river at that point. The purpose of the bridge is to make a connection with the Wheeling and Lake Erie Railroad, now under construction. This road has a capital stock of $4,000,000, with authority to issue bonds for $3,200,000, and runs to Sandusky on Lake Erie, 150 miles, and thence to Toledo 45 miles. The whole line has been put under contract to be completed within two years after the surveys shall be made and the local subscriptions filled up. The Wheeling *Intelligencer* prints a report on the road made by Joel Wood, its president, in which he claims that it will shorten the distance between Baltimore and Sandusky by 70 miles, and "will materially stimulate the trade between Baltimore and the Western cities and great lakes."

☞ Hugh J. Jewitt has been elected President, Daniel Applegate Treasurer, and W. King Secretary of the Central Ohio Railroad Company.

Pittsburgh, Cincinnati and St. Louis Railway.

To the Stockholders of the Pittsburgh, Cincinnati and St. Louis Railway Company:

Your Board of Directors, in surrendering the trust confided to them at the last annual election, beg leave to submit the following report of the operations on the different roads owned and leased by your company, and of its financial condition at close the of the fiscal year.

The Annual meeting occurring so soon after the end of the year, it is quite impracticable, in view of the extended operations of the company, to give the actual results of the year's business.

Those herewith presented, thereupon, are based upon the settlement of the company's accounts to November 30th, ult., with an estimate for the additional month of December.

The earnings and expenses of the road operated by your company during the past year were as follows:

PITTSBURGH, CINCINNATI & ST. LOUIS RAILWAY.

EARNINGS.

From freight		$2,320,076 23
" passengers		773,532 04
" mails, express, &c		223,365 17
Total for 1871		$3,316,973 44
Total for 1870		2,864,559 24
Increase (15¼ per cent.)		$452,414 20
Earnings per mile of road		$16,500 00

EXPENSES.

To conducting transportation		$871,217 70
" motive power		703,253 14
" maintenance of way		567,517 61
" maintenance of cars		180,949 68
" general expenses		51,140 54
Total for 1871		$2,374,978 67
Total for 1870		2,115,790 36
Increase (12 2-10 per cent.,)		$258,288 41

Per cent. of earnings absorbed by expenses 1871, 71 6-10; do., 1870, 73 9-10.

The net earnings of this road were		$942,394 77
From which deduct for one year's interest on funded debt	$669,090 00	
Hire of equipment (since purchased)	27,322 07	
		696,412 07
Profit in operating P., C. & St. Louis Railway		$246,482 70
Of this amount there has been paid for interest that matured prior to January 1st, 1871	$260 108 05	
Rent of equipment	61,260 15	
Sundry old claims	41,854 53	
		363,222 73
Actual loss in 1871		$116,740 03

LITTLE MIAMI RAILROAD.

EARNINGS.

From freight		$929,233 95
" passengers		690,595 51
" mails, express, &c		146,730 42
Total for 1871		$3,766,559 88
Total for 1870		1,873,468 38
Decrease (5 7-10 per cent.,)		$106,908 50
Earnings per mile of road		$8,981 00

It is proper to state in this connection, with reference to the foregoing decrease in earnings, that there was included in the earnings of 1870, $41,564, for dividends on 10,391 shares in the stock of the Columbus and Xenia Railroad Company, held by the Little Miami Railroad Company, and transferred to this company with the assets of the former company at the time of the lease. Although forming a legitimate source of revenue, and properly to be taken into consideration in computing

the value of the lease, they cannot be treated as earnings, strictly speaking, of the Little Miami Railroad.

EXPENSES.

For conducting transportation		$446,254 57
" motive power		327,432 33
" maintenance of way		272,276 62
" maintenance of cars		134,232 60
" general expenses		79,606 60
Total for 1871		$1,259,802 73
Total for 1870		1,219,236 72
Increase (3½ per cent.,)		$40,566 01

Per cent., of earnings absorbed by expenses 1871, 71 3-10; do., 1870, 65 1-10.

The net earnings of this road were		$506,757 15
Add revenue from miscellaneous sources		55,372 49
Total		$562,129 64
From which deduct for one year's interest on funded debt of the companies embraced in the lease of the Little Miami Railroad	$188,934 31	
One year's dividend and U. S. Tax on the same, under said lease	493,847 73	
Organization and other expenses	13,874 97	
Interest on bonds of Cincinnati Street connection	6,384 52	
		703,041 53
Loss in operating Little Miami Railroad		$140,911 89
Add for sundry claims paid, incurred in previous years		23,151 16
Total loss in 1871		$164,863 05

COLUMBUS, CHICAGO & INDIANA CENTRAL RAILWAY.

EARNINGS.

From freight	$2,852,014 23
" passengers	1,145,831 62
" mails, express, &c	172,492 03
Total for 1871	$4,170,337 88
Total for 1870	3,531,018 10
Increase (18 1-10 per cent.,)	$639,319 78
Earnings per mile of road	$7,104 00

EXPENSES.

For conducting transportation	$969,788 60
" motive power	1,135,753 17
" maintenance of way	658,384 33
" maintenance of cars	277,017 85
" general expenses	89,062 30
Total expenses 1871	$3,130,106 25
Total expenses 1870	2,856,910 16
Increase (9 56-100 per cent.,)	$273,196 09

Per cent. of earnings absorbed by expenses 1871, 75 1-10; do., 1870, 80 9-10.

The net earnings of this road were		$1,040,231 63
From which deduct for rental from Feb. 1, to Dec. 1, 1871, being 30 per cent. of gross earnings	$1,154,313 73	
Less difference in adjustment to April 1, assumed by Pennsylvania Railroad Co.	135,088 70	
		1,019,225 03
Profit in operating C., C. & I. C. Railway		$21,006 60
Sundry claims paid belonging to previous years		51,006 70
Actual loss in 1871		$30,000 10

The net result of the operating of the three roads controlled by the company may now be stated as follows:

Profit in operating P. C. and St. Louis Railway	$246,482 70
Profit in operating C., C. and I. C. Railway	21,006 60
Total	$267,489 30
Less loss in operating Little Miami Railroad	140,911 89
Net profit on all the lines of	$126,577 41
Claims paid belonging to previous years as before stated	438,180 59
Actual loss on all the lines in 1871.	$311,603 18
To which add net loss to December 31, 1870	575,795 57
Shows a total deficit to December 31, 1871	$887,398 75

FINANCIAL CONDITION.

The foregoing result places the financial condition of the company, December 31, 1871, as follows:

Common stock		$1,774,700 00
" of S. I. & I. R. R. Co., unconverted		725,300 00
Total common stock		$2,500,000 00
Preferred stock	$2,917,250	
" of S. & I. R. R. Co., unconverted.	7,100	
Total preferred stock		2,924,350 00
Funded debt		10,004,140 24
Bonds of Cincinnati Street Connection Railway assumed with lease of Little Miami Railroad		262,500 00
Loan of Pennsylvania Railroad Co.		3,049,893 21
Loan of Union R. R. & T. Company		100,000 00
Bills payable		640,290 72
Due other companies		184,779 96
Due for current expenditures		925,991 86
Miscellaneous liabilities		125,803 01
Supplies and other assets received with leased roads payable at the termination of leases		1,100,479 96
Total		$21,818,228 46

To represent which the company has the following fixed property and assets, viz:

Cost of road, real estate, equipment, &c	$18,030,444 30
Additions made to Cincinnati Street Connection Railway	64,639 00
Due for betterments to leased roads, payable in stock and bonds of companies owning said roads	636,467 35
Supplies on hand	513,728 86
Due by Station Agents, &c	284,350 21
Due by other companies	416,736 94
Miscellaneous assets	333,378 96
Sundry securities	506,855 50
Cash	144,228 50
Total	$20,930,829 71
Leaving a deficit as before explained, of	$887,398 75

While the aggregate result of the operating of the roads owned and leased by your company thus shows a loss, the steady increase of earnings, growing control over outlay and expenses and near approach to completeness of the entire properties, justify the belief that henceforward they will, as a whole, be self-sustaining, and ultimately yield a return to the shareholders.

During the year much has been done towards improving the properties, and the equipment of the roads owned and operated by your company, the cost of such improvement having been charged to repairs. The increased amount expended on your own road on this account, and in providing for the business represented by increased earnings was $258,288 41.

Extensive additions have been made to your road and equipment during the past year, amounting to $1,311,793 22, composed as follows:

For locomotives	$514,812 98
" cars	396,731 56
" tunnel widening	158,509 84
" double track and sidings	182,787 76
" real estate and right of way	46,995 27
" miscellaneous purposes	12,455 81
Total	$1,311,793 22

This amount appears in the accounts as part of the "Cost of Road and Equipment." The means whereby this outlay was met, were derived mainly from the Pennsylvania Railroad Company, and with similar expenditures previous to 1871, form the greater part of the indebtedness to that company, which as stated above is $3,049,893 21. Of the whole amount of this debt $2,122,571 28 was incurred prior to January 1, 1871, as certified by your late President, Hon. Thomas L. Jewett, and $2,626,618 91 had accrued to April 1, 1871, the date at which your Board assumed the active charge of the property. It has been arranged to pay $3,000,000 of this debt by an issue of an equal amount of preferred stock at par, the Pennsylvania Railroad Company having signified its willingness to receive such stock in payment. You will, therefore, be requested to vote upon the question of authorizing an increase of $3,500,000 of preferred stock, the excess of $500,000 to be held in reserve for future contingencies. The remainder of the debt due the Pennsylvania Railroad Company, $49,893 21, is payable in the income bonds of the Columbus, Chicago and Indiana Central Railway Company at par, receivable by your company in payment of betterments made to that road.

The line of your company to St. Louis terminates at that important point with the St. Louis, Vandalia and Terre Haute Railroad, in the operating of which, as co-lessee, you have a large direct interest. The current operation of this road is self-sustaining, but the necessity for increased equipment for its growing business has required some outlay which promises a large return, but for the present is a draft upon your resources.

You are asked to sanction the lease of the Chartiers Railway, which will be laid before you. Its terms impose no responsibility on your company, beyond the superintendence of its operation, and its accounts, and the payment of its net earnings to the Chartiers Railway Company.

The independent access of the line of your company to the great starting point for the South, at Louisville, had become so important, and was so entirely dependent upon mere comity, which might any day be terminated by the intervention of rival interests, that your Board has taken action to secure an approach to Louisville, by a lease of the Jeffersonville, Madison and Indianapolis Railroad, which lease will also be presented to you for your consideration, and you are asked to ratify and confirm it at your present meeting. It provides for a rental to be paid equivalent to the interest and sinking fund on the funded debt of the proprietary company, and a dividend of seven per cent. per annum on its capital stock of $2,000,000. Its terms are guaranteed by the Pennsylvania Railroad Company, and it is believed that the property it embraces will be self-sustaining, besides forming an indispensable link in the lines of your company.

Your Board takes pleasure in acknowledging the valuable aid it has received from the officers of the company, and the efficient manner in which they and the employees, in all departments, have conducted that portion of the business committed to their charge.

By order of the Board.

THOMAS A. SCOTT, *President.*

☞ The contractors for the grading of the Atchison, Topeka and Santa Fe railroad are pushing forward rapidly to Fort Larned.

Commerce of New York.

The foreign imports at New York for the month of March, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$22,639,471	$20,779,299
Do. for warehousing	13,271,955	15,585,953
Free goods	2,577,244	2,561,827
Specie and bullion	207,394	291,189
Total entered at port	$38,696,064	$39,218,268
Withdrawn fr. wareh'use	11,695,478	10,998,300

The foreign imports at New York for the three months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$53,804,068	$59,763,377
Do. for warehousing	37,376,557	45,061,042
Free goods	8,884,144	7,715,276
Specie and bullion	2,914,681	574,212
Total entered at port	$102,979,450	$113,103,907
Withdrawn fr. wareh'se.	84,386,994	35,132,208

The foreign imports at New York for the nine months ending March 31, were:

	1871.	1873.
6 months ending Jan. 1.	$156,339,208	$183,028,276
January	28,792,062	35,679,496

Add specie	55,092,032	27,537,547
Total exports	$222,463,901	$200,538,029

☞ The Elkhorn *Independent* states that the surveyors are busily at work surveying the line of the Old Wisconsin Central Railroad via Geneva, Elkhorn, Whitewater, &c., and hopes to see the road built the present summer.

Texas Pacific Railroad.

The amended Texas Pacific Railroad bill has been passed by the United States Senate. It provides that the company must build and maintain a line from Marshall, Texas, to Shreveport, Louisiana, and requires the gauge to be uniform with other Pacific roads. Twenty-five miles must be built from the western terminus eastward within three years, and not less than one hundred miles within two years from the eastern end, and not less than one hundred miles a year thereafter, and the whole road to be completed in ten years. An amendment limiting the issue of construction bonds to $40,000 a mile, and authorizing the company to include in mortgages to secure their bonds any lands they may acquire by consolidating with other roads to whom land grants may have been made, along the same route, was passed. The company is also required to begin the construction of the road from San Diego eastward within one year from the passage of the act.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS.

The receipts on capital account during the half-year to January 31st, 1872, amounted to 155,270*l.*, as follows:

Five per cent. preference stock, fourth instalment	£102,617	
Ditto in anticipation of the last instalment	2,547	
Ditto paid up in full for conversion into ordinary shares	177,288	
		£282,402
Deduct 4 per cent. bonds due 1st Jan., 1872, paid off	£142,203	
Ditto difference in exchange on 292 shares transferred from Canada to London	14	
		142,217
		£140,185
Shares issued on conversion of preference stock during the half-year at the rate of 5 shares for every 100*l.* stock, viz.:—		
602,740*l.* stock converted into 30,137 shares of 20*l.* 10s. each	£617,808	
620*l.* stock converted into 31 shares of $100 each	637	
	£618,445	
Less preference stock cancelled on conversion	603,360	
		15,085
		£155,270

The total receipts on capital account amounted, on 31st January, to 6,559,578*l.*

The charges on capital account during the half-year amounted to 284,410*l.*, of which 106,661*l.* has been expended on account of the Glencoe, 19,877*l.* the balance to complete the Brantford branch, 30,438*l.* for 13 new narrow gauge freight locomotives, being additional stock, 39,735*l.* for 50 new platform cars and 239 new freight box cars, and the increased value of 50 new eight-wheeled box freight cars, replacing the same number of four-wheeled box cars, which have been transferred to the engineer's department, also being additional stock, 6¼ miles of additional sidings at various parts of the line, proportion of charge (3*l.* per ton) of 4,000 tons of steel rails laid in the main line during the half-year, and sundry smaller expenses, the details of which are shown in the engineer's and mechanical superintendent's reports.

The total expenditure to 31st January amounted to 5,985,563*l.*, leaving a balance unexpended of 574,015*l.* at the credit of capital account.

The receipts and expenditure on revenue account for the half-year have been as follows:—

Gross receipts		£527,351
Working expenses, including renewals and all charges		313,636
		£213,715
From which is deducted—		
Interest on bonds	£40,379	
Discount and charges on conversion of American currency	27,818	
Amount set aside for renewals of ferry steamers	3,000	
Loss on working Erie and Niagara	1,082	
Alteration of gauge account—proportion charged this half-year	9,100	
Amount paid for repairs and compensation Nith River Bridge accident account	5,993	
Vote of shareholders to Chicago fire relief fund	1,000	
		88,373
		£125,341
Add profit on working Galt and Guelph	£1,139	
Balance of interest account	4,670	
		5,810
Profit on half-year's working		£131,151
Add surplus from last year		4,846
Available for dividend		£135,998

The dividend for the half-year on the 5 per cent. preference stock amounts to 7,429*l.*, leaving a balance of 128,568*l.* From this balance the directors recommend the payment of a dividend for the half year on the ordinary shares at the rate of 6 per cent. per annum, payable in London on 30th April, which will absorb 122,924*l.*, and leave a balance of 5,643*l.* to be carried forward to the next half-year.

The aggregate revenue receipts (exclusive of Galt and Guelph), compared with the corresponding half-year, exhibit a gross increase of 83,002*l.*, as follows:—

In way passenger traffic	£10,142
Through passenger traffic	9,391
Way freight and live stock traffic	28,341
Through freight and live stock traffic	32,957
Mails and express freight	2,119
Rents	49
	£83,002

With these increased gross earnings producing an increased net revenue of 36,847*l.*, the directors are unable to declare a larger dividend than in the corresponding year, the result having been adversely affected in comparison with the corresponding half-year by the following items, among others—

Proportion of alteration of gauge account	£9,100
Proportion of Nith River Bridge accident account	5,993
Special vote to Chicago fire relief fund	1,000
Amount credited in corresponding half-year, being balance accrued under working of Tripartite agreement for year 1870	8,196
Increased loss by converting a greater amount of American currency than in corresponding half-year	10,458

The balance being increased dividend on account of the participation of further instalments paid on preference stock, and the large amount paid up in full and converted into ordinary shares during the half-year.

The renewal fund for the ferry steamers amounts to 17,980*l.*, after debiting 8,287*l.* on account of new Car ferry steamer under construction. There remains yet to be expended for this steamer 3,700*l.*, so that if the total costs of the boat had been charged in the accounts of the 31st January, there would still be a credit at the renewal fund of 14,280*l.*, with a new steamer in addition to the two already owned by the company. A portion of this balance, however, is applicable to writing off the debit standing against

the late steamer "Transit," and will be so dealt with.

The discount and charges on the conversion of American currency for the half-year amounted to 27,818*l.*, as compared with 17,360*l.* in the corresponding half-year.

This increased loss, notwithstanding the lower rates of gold, is due to the increased amount of earnings in American currency.

The average rate of conversion was 111 1-16th, as compared with 113¼ in the corresponding half-year, the average price of gold having been 111¼ this half-year. The amount of assets in American funds at 31st January was $360,519 91, as compared with $348,022 41 at the commencement of the half-year.

The following table exhibits the receipts and expenses (including renewals) for seven corresponding half years:—

Half-year ending	Receipts.	Expenses.	Per cent.
31 Jan., 1866	£387,039	£170,003	143.93
31 Jan., 1867	331 513	166,632	50.26
31 Jan., 1868	400,812	193,666	48.31
31 Jan., 1869	423,311	209,752	49.55
31 Jan., 1870	424,182	243,379	57.37
31 Jan., 1871	444,348	267,481	60.19
31 Jan., 1872	527,351	313,636	59.47

It should be observed that the expenses during the half-year include a sum of 3,401*l.* for locomotive renewals, and also a sum of 4,109*l.* for car renewals, in addition to the amount actually expended, which sums have been carried to the credit of a renewal fund account, it having been impossible to carry out the full repairs during the half-year in consequence of the great demand for the rolling stock. The directors have, during the past half-year, had under consideration a recommendation from the company's officers in Canada, that the half-yearly charge to revenue for the future repairs and renewals of rolling stock should be made at a fixed rate per mile. This principle, which is in conformity with the views of the auditor, has been approved by the board and will be adopted in the next half-year's account.

The following is a summary of the revenue results of the past half-year, compared with the corresponding period (including Galt and Guelph traffic:—

Half-years ending	1872.	1871.
Passenger traffic:—Way	$442,117	$390,520
Through	451,568	405,864
Total	892,685	796,384
Freight traffic:—Way	591,044	453,202
Through.	1,034,382	873,989
Total	1,625,426	1,327,189
Excess baggage, mails, and express freight	67,780	57,430
Total traffic earnings	$2,586,892	$2,181,005

It is satisfactory to note in the earnings for the past half-year that the local traffic continues to show a steady increase, the per-centage to the total traffic being 39.93 per cent., as compared with 38.67 per cent. in the corresponding period.

The analysis of traffic receipts during the half-year gives the following results:—

Passenger earnings per mile—

	1872. Cents.	1871. Cents.
Receipts per way passenger	2.896	2.707
" per through passenger	2-256	2.304
Freight earnings per mile—		
Receipts per ton way freight	3.254	3.430
" " through freight	1.223	1.369

During a large portion of the half-year, Westbound freights were carried at excessively low rates; but an arrangement was arrived at in the last week of November for a restoration to nearly corresponding rates, and those increased rates have since been maintained.

The cost of ordinary working expenses per train mile for seven corresponding half-years is as follows:—

Jan. 31,	Sterling.	Jan. 31.	Sterling.
1866	4s. 6¼d.	1870	4s. 9¼d.
1867	4 7¼	1871	4 6¼
1868	4 5¼	1872	4 8
1869	4 3¼		

The condition of the roadway may be stated as excellent, enabling the trains to run with great regularity. The use of steel rails continues to prove satisfactory. Of the 229 miles of main line 79 miles are laid with steel rails, and it is proposed, during the year 1872, to add about 80 miles more of steel track, and in 1873 to relay the remainder of the main line 70 miles with steel rails.

On 31st January the whole of the company's car stock had been converted to the 4ft. 8½in. gauge, but the third rail, affording also the 5ft. 6in. gauge, is still kept down between London and Hamilton, 76 miles, on which to run the broad gauge locomotives until they can be sold or are worn out.

Adopting the formula of the auditors, but applying the careful estimates of the mechanical superintendent, the cost of completing the conversion from broad to narrow gauge is expected to be somewhat less than stated in the last report; but in order to allow for contingencies, the same amount (9,100*l.*) as in last half-year's accounts has been deducted.

The Wellington, Grey, and Bruce was opened for traffic to Harriston, 48¼ miles, on 27th November. There is, therefore, the result of only nine weeks' working of the extended mileage in the half-year's results. The increase to the Great Western traffic during the half-year was 7,293*l.*, while the profit of working the line at 70 per cent. of their earnings amounted to 42*l.* 18s. 2d. Recently 7 additional miles to Clifford have been opened.

The directors consider it desirable that the company should become owners of the Erie and Niagara, a line of 31¼ miles, extending from Lake Erie to Lake Ontario, along the Niagara River, which has been worked by the Great Western since the autumn of 1866. An agreement has been entered into for the transfer of this railway, with all its property, franchises and privileges, to be secured if necessary by parliamentary title, for the sum of 75,000*l.*, which will be submitted for the approval of the proprietors.

The branch line from Suspension-bridge to Buffalo, belonging to the Erie and forming an alternative route to New York by that railway, continues to prove of great value, and the relations with that company for the interchange of traffic cannot fail to be improved by the recent reorganization of the Erie board.

The receipts and expenditure of the Detroit and Milwaukee have been as follows for the year ending 31st December 1871:—

Gross earnings		£309,702
Working expenses, taxes, &c.	£193,476	
Interest on bonds, &c	88,445	
		281,921
Balance		£27,780

The new lines in Michigan, across the Detroit and Milwaukee, have naturally affected that company's traffic, but not so seriously as might have been expected.

The directors have the satisfaction of stating that the great Western of Canada is in every respect a sound property. The condition of its permanent way and rolling stock, with its narrow gauge track throughout, and its established connections in the United States, will enable it to claim its full share of the inexhaustible traffic flowing from the Western States to the Atlantic seaboard.

☞ The Pittsburg City Councils have authorized the erection of new water-works, at a cost of $3,000,000. The works are to be constructed on Brilliant Hill on the banks of the Allegheny river, about seven miles from the city.

Philadelphia Scale Works.

The Messrs. Riehle Bros., proprietors of the Philadelphia Scale Works, who succeeded Abbott & Co. and Banks, Dinmore & Co. a few years since, are gaining for themselves an enviable reputation by their manifest perseverance, energy and enterprise. Their Testing Machine which recently appeared in the *Scientific American* of 50 tons capacity, and the one of a different description which appears in May number of the *Franklin Institute Journal*, are proofs of a spirit of advancement possessed by them which is certainly commendable.

These machines are exceedingly accurate, and spoken of as being most satisfactory in their working; they have several in operation for some years; but recently, on account of the many inquiries received from all directions, they have made the subject of Testing Metals, Rope, Chain, Stone, &c., a matter of study, and have made several valuable improvements in it. They make the only Wrought Iron Lever Railroad Track Scale whose excellence is acknowledged by numbers having them in use. The fulcrums are made on philosophical principles, being composed of steel knife edges cushioned in wrought iron, carefully finished and accurately fitted into the levers. This scale has never broken down in any instance, but is strong, durable and reliable. Their celebrated Stock House or Charging Scale, with any desired number of beams, used in Iron Furnaces, &c., is well and favorably known and is considered indispensible. These Compound Parallel Crane Beams, for weighing heaving castings, &c., are constantly manufactured by them, originating, as they did, at their works. Their Rolling Mill Scales are made extra heavy, and particularly adapted for the purpose intended.

This firm have made for several years past a patented frost-proof Wagon Scale. The levers are placed at right angles, from the edge of platform, and all the jar comes necessarily upon the ends of the fulcrum, instead of striking them obliquely, as in the case of other scales, and thus producing a serging motion so injurious to the fulcrum points and knife edges. They are built upon sill wall, and do not hang from the surrounding foundation walls which are more or less subjected to the action of the frost. This scale has a steady platform, and with the Patented Double Beam attachment comprises the best scale for the purpose ever presented to the public. Any one visiting Philadelphia would be well repaid if they call at the Philadelphia Scale Works, and will be shown through them, and receive every attention; or if they have no time to call, will receive illustrated catalogue upon application. Their card can be found in another column of this paper.

☞ The Danville (Va.) *Register* says that about 500 hands are now employed on the grading of the Lynchburg and Danville Railroad throughout its length. The work is being everywhere prosecuted with energy. They are getting ready to construct a bridge across Cherrystone, near the court-house, and the present expectation is that the Banister will be closed with trestle-work.

☞ The laying of the Sugar River (N. H.) Railroad track from Newport to Claremont, commenced on the 30th ult.

RAILROAD EARNINGS—MONTHLY.
